

Education Estimating Conference for PreK-12 Enrollment
Executive Summary
August 9, 2021

The Education Estimating Conference met on August 9, 2021, to adopt a revised PreK-12 Full-Time Equivalent (FTE) enrollment forecast for FY 2021-22 through FY 2026-27. This forecast incorporated the April 1, 2021 adopted forecast, legislative changes from the 2021 Session, and the most recent participation data on school choice.

The FTE forecast for 2021-22 incorporated a shift of 20,000 Gardiner program students into the new Family Empowerment Scholarship for Unique Abilities (FES-UA) program. However, 21,128 Gardiner students were actually added to the FEFP—20,000 of which comprise the full program and an additional 1,128 who were previously forecasted to leave the FEFP to pursue the now repealed Gardiner program. These former FEFP leavers are now expected to stay in the FEFP and pursue the FES-UA program as exceptions to the cap.

Additionally, the 2021-22 FTE forecast incorporated an expansion of the Family Empowerment Scholarship for Educational Opportunities (FES-EO) program. Based on current award data from the scholarship funding organizations, FES-EO is expected to reach capacity in 2021-22, with a capped maximum of 75,573 students. All FTEs above previous expectations were added to the forecast to account for this growing program (38,851 FTE).

The FES-UA program is anticipated to reach capacity in each of the remaining years of the forecast (2022-23 through 2026-27) due to a combination of historical prior non-public participation data and the newly expanded eligibility requirements. The FES-EO program is anticipated to steadily grow, and reflects historical prior non-public and kindergarten participation trends in Florida income-based scholarship programs. With the exception of the current school year, the FES-EO program is not expected to reach the available capacity during the forecast period.

Overall, 59,979 students were added to 2021-22 and roughly 29,000 additional students were added to each school year during the 2022-23 through 2026-27 period. After taking into account grade progression, migration, and graduation, the difference between the April 2021 forecast and the August 2021 forecast ranged from 59,979.00 FTE in 2021-22 to 163, 832.10 FTE in 2025-26. The final year of the forecast, 2026-27, is forecasted to reach 3,138,787.84 FTE.

There are three tables below: Table 1 provides a summary of the forecast by program category, Table 2 displays total FTE enrollment by year, and Table 3 illustrates the differences between the April 2021 and August 2021 forecasts.

Table 1. April 1, 2021 Forecast Summary

General Notes...

The Education Estimating Conference for PreK-12 Enrollment forecasts full-time equivalent (FTE) students whose educational instruction is funded through the Florida Education Finance Program (FEFP). There are ten program categories in two groups:

Group 1

- Three for basic education students who are not exceptional education students (101: for PreK through Grade 3; 102: for Grades 4 through 8; 103: for Grades 9 through 12) and
- Three for basic education exceptional educational students by grade grouping (111, 112, and 113).

Group 2

- One for English Language Learners (130),
- Two for exceptional education students who need higher levels of services (254, 255) and
- One for students taking career education instruction (300).

The funded educational time for a student may be in a single program category or spread through two or more program categories.

The FEFP is calculated five times throughout the year to arrive at each year's final appropriation. Each calculation ("calc") uses the latest information regarding the number of students that is available:

- (1) First Calculation (1st Calc) – This calculation is completed immediately after the annual legislative session. FTE student enrollment is the forecast used by the Legislature for the General Appropriations Act.
- (2) Second Calculation (2nd Calc) – This calculation is made upon receipt of the certified tax roll from the Department of Revenue. FTE student enrollment is the forecast used by the Legislature for the General Appropriations Act.
- (3) Third Calculation (3rd Calc) – This calculation includes the July and October actual FTE student enrollment surveys and the February and June estimated FTE enrollment. It is available in November.
- (4) Fourth Calculation (4th Calc) – This calculation includes July, October, and February actual FTE student enrollment surveys and the June estimated FTE enrollment. It is available in March.
- (5) Final Calculation – This calculation includes the actual final FTE student enrollment surveys for all four counts (July, October, February, and June) and is available in September or October of the next fiscal year.

Among other changes, the Conference principals may adopt forecasts that include revised FTE enrollment estimates due to known errors in district reported data or other supporting data that warrants an adjustment in the five calculations above. These revisions are typically numbered as they are updated. For the conference held on April 1, 2021, the 2020-21 "Spring Estimate" represented preliminary Fourth Calculation FTE adjusted for anticipated additional FTE.

Both the FES-UA and FES-EO programs have the ability to grow based on statutory requirements. In addition, both programs have statutorily identified student groups that do not count towards the growth cap.

'PreK' figures include only pre-school age children with disabilities (ESE) and pre-school age children whose parents are in the Teenage Parent Program. It does not include children participating exclusively in the Voluntary Prekindergarten Program who receive those services through the public school system.
