Discount Rate Assumption for HIS and National Guard GASB Valuations
GASB Discount Rate Assumption

- Currently, the Health Insurance Subsidy and Florida National Guard benefits are effectively funded on a pay-as-you-go basis.

- Accounting standards first effective several years ago (GASB 67 & 68) give direction on the discount rate assumption to be used for financial reporting of programs funded on a pay-as-you-go basis:
  - The assumption should reflect an **index of 20-year, tax exempt, high quality (AA/Aa or higher) general obligation municipal bonds**.
  - The assumption selected should be based on **market conditions as of the measurement date** of the financial reporting in question.

- After consideration of these requirements at the time of initial implementation of the accounting standards, the Conference adopted the **Bond Buyer General Obligation 20-Bond Municipal Bond Index** for use in HIS and National Guard GASB calculations:
  - That index has been used for pay-as-you-go GASB financial reporting valuations by all public systems with which I am familiar.
Historical Values of the Bond Index

- The table below shows the value of the Bond Buyer General Obligation 20-Bond Municipal Bond Index as of the last five fiscal year-end measurement dates:

<table>
<thead>
<tr>
<th>June 30</th>
<th>Index</th>
</tr>
</thead>
<tbody>
<tr>
<td>2018</td>
<td>3.87%</td>
</tr>
<tr>
<td>2017</td>
<td>3.58%</td>
</tr>
<tr>
<td>2016</td>
<td>2.85%</td>
</tr>
<tr>
<td>2015</td>
<td>3.80%</td>
</tr>
<tr>
<td>2014</td>
<td>4.29%</td>
</tr>
</tbody>
</table>

- The **higher** the index, the **lower** the calculated liability, with an index increase from 3.58% to 3.87% estimated to **decrease** HIS liability and National Guard liability by approximately $360 million and $30 million, respectively.

This work product was prepared solely for the Department of Management Services for the purposes described herein and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Milliman recommends that third parties be aided by their own actuary or other qualified professional when reviewing the Milliman work product.
Other Assumptions for HIS and National Guard GASB Valuations
HIS GASB Valuation Assumptions

- In addition to the discount rate assumption, other assumptions about member behavior (e.g., timing and nature of cessation of employment) and life expectancy are used in the HIS valuation.

- Those assumptions mirror those used in the valuation of the FRS Pension Plan and were established by the most recent Experience Study (conducted in 2014).

- No changes are recommended at this time based on observed experience since adoption of those assumptions.
  - Continuing “no change” recommendations include assumptions based on observed experience that:
    - 95% of eligible members elect coverage at retirement.
    - 30% of retiring members elect a spousal protection form of benefit.
National Guard Valuation Assumptions

- The initial valuation for the National Guard program was conducted in 2014 to comply with the new GASB financial reporting standards.

- Assumptions used in valuations prior to this year incorporate FRS Pension Plan assumptions along with estimates of future military experience as National Guard benefits are tied to federal pay levels and retirement benefits.

- Based on observed experience over the past four years since assumptions were initially established, a solitary assumption modification is recommended: an increase to the average annual future COLA on National Guard benefits from 1.5% to 2.6%.
  - 2.6% is the average observed COLA increase over the past four years, and it is also the inflation assumption adopted for the FRS Pension Plan.
Needed Guidance
Needed Guidance

- From Conference Principals for GASB financial reporting calculations of HIS and National Guard:
  - Re-confirmation of the continued use of the Bond Buyer General Obligation 20-Bond Municipal Bond Index as the discount rate for the GASB valuations of the two programs
  - Re-confirmation of the previously used assumptions other than discount rate for the HIS program
  - Re-confirmation of the previously used assumptions other than discount rate for the National Guard program, with the exception of average annual future COLA increase, where the recommended change is to increase the assumption from 1.5% to 2.6% based on recently observed program experience over the past four years
    - Benefits for this program are currently around $15 million per year, so adoption of the recommendation would increase estimated fiscal 18-19 costs by around $165,000, but actual costs would be unaffected by adopting the assumption
Appendix
Certification

This presentation summarizes recommended assumptions for valuations of the HIS and National Guard programs as June 30, 2018. Those valuations, when finalized, will develop mandated financial reporting for the fiscal year ending June 30, 2018.

In preparing this presentation, we relied, without audit, on information (some oral and some in writing) supplied by Division of Retirement (“Division”) staff. This information includes, but is not limited to, statutory provisions, employee data, and financial information. We found this information to be reasonably consistent and comparable with information used for other purposes. The results in this presentation depend on the integrity of this information. If any of this information is inaccurate or incomplete our results may be different and our calculations may need to be revised.

The material in this presentation have been made on a basis consistent with our understanding of the plan provisions described in the appendices of our most recently published formal actuarial valuation reports for the programs.

Milliman's work is prepared solely for the internal business use of the Florida Department of Management Services (“DMS”). To the extent that Milliman's work is not subject to disclosure under applicable public records laws, Milliman’s work may not be provided to third parties without Milliman's prior written consent. Milliman does not intend to benefit or create a legal duty to any third party recipient of its work product. Milliman’s consent to release its work product to any third party may be conditioned on the third party signing a Release, subject to the following exception(s):

(a) The System may provide a copy of Milliman’s work, in its entirety, to the System’s professional service advisors who are subject to a duty of confidentiality and who agree to not use Milliman’s work for any purpose other than to benefit the System.

(b) The System may provide a copy of Milliman’s work, in its entirety, to other governmental entities, as required by law.

No third party recipient of Milliman’s work product should rely upon Milliman's work product. Such recipients should engage qualified professionals for advice appropriate to their own specific needs.

This work product was prepared solely for the Department of Management Services for the purposes described herein and may not be appropriate to use for other purposes. Milliman does not intend to benefit and assumes no duty or liability to other parties who receive this work. Milliman recommends that third parties be aided by their own actuary or other qualified professional when reviewing the Milliman work product.
Certification

The consultants who worked on this assignment are pension actuaries. Milliman’s advice is not intended to be a substitute for qualified legal or accounting counsel. The presenting actuaries are independent of the plan sponsors. I am not aware of any relationship that would impair the objectivity of Milliman’s work.

On the basis of the foregoing, I hereby certify that, to the best of my knowledge and belief, this presentation has been prepared in accordance with generally recognized and accepted actuarial principles and practices. I am a member of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein.
