Tax: Ad Valorem

Issue: Natural Disaster/ Abatement of Taxes

Bill Number(s): PCS HB 49 – Strike All

✓ Entire Bill✓ Partial Bill:

Sponsor(s): Representative Eagle

Month/Year Impact Begins: January 2016 Date of Analysis: February 17, 2017

**Section 1: Narrative** 

a. Current Law: No law currently exists.

b. Proposed Change: In the event that a residential improvement is rendered uninhabitable due to damage or destruction to the property caused by a natural disaster, taxes due in the year following the disaster may be partially abated. Then natural disaster may be an event for which the Governor has declared a state of emergency under s. 252.36, F.S., or a sinkhole as defined under s. 627.706(2)(h), F.S. The process of determining the value requires the property owner to file an application with the property appraiser after the damage or destruction occurs but no later than March 1 of the year following the year of the natural disaster. The property appraiser checks the application to determine if the applicant is entitled to a partial abatement. The property appraiser, determining an abatement application is valid, submits the number of months in the calendar year that the residence is uninhabitable, a period being at least 16 days is treated as a month; the just value of the property; the post-disaster value of the property; and the percentage change in value applicable.

The tax collector then calculates the damage differential and disaster relief credit. "The tax collector reduces the taxes initially levied on the property in the year the application is due by an amount equal to the disaster relief credit. If the value of the credit exceeds taxes levied during the year in which the application is due, the remaining value of the credit shall be applied to taxes due in subsequent years until the full value of the credit is exhausted." Furthermore, "If a residential property is rendered uninhabitable due to damage or destruction by a natural disaster in 2016, the property owner must file an application with the property appraiser before March 1, 2018, and once approved by the property appraiser, the owner shall receive the appropriate reduction on taxes initially levied in 2019. No later than May 1, 2018, tax collectors shall comply with the notification". Also, noting that this draft "applies retroactively to January 1, 2016, and expires on January 1, 2020."

The bill language states that residential improvements that are uninhabitable shall have no value placed thereon.

Florida Office of Insurance Regulation Hermine and Matthew Claims data

# Section 3: Methodology (Include Assumptions and Attach Details)

# **Methodology 1: Economic Cost Estimate Basis**

All estimates assume that any credits are exhausted in the year they are awarded. Corelogic indicates that for economic cost estimates 66.7% of the damage is due to structural damage. The property tax roll data shows that the improvement value for all residential properties is 75% of the improvement value for all properties. The tax credit calculation values are based on the property being rendered uninhabitable for a 1-month period in the low estimate. There are no middle or high estimates for the damages incurred in 2016. The potential damage estimates use 6 months in the high and 4 months in the middle to generate the tax credit.

The economic cost analysis consists of two different pieces. The first piece is based on damage incurred in 2016. The second piece is the average value for a sample of disaster events starting with Hurricane Andrew in 1992. All damage cost estimates in the sample

Tax: Ad Valorem

Issue: Natural Disaster/ Abatement of Taxes

Bill Number(s): PCS HB 49 – Strike All

were converted to 2017 dollars using the chained price index for housing. The sample spans 25 years and the average value for the Base Damage is \$4.9 Billion.

Per Tampa Bay Times a category 4 hurricane would generate \$175 billion in damages if it were to hit Tampa directly, and a direct hit on Miami would generate \$80 billion in damages. This estimate compares these values to the impact from Hurricane Andrew. This ratio is then used to estimate what other disasters would look like if they were to hit either Tampa or Miami.

The High estimate assumes that all the sample events occurred in Tampa, and the middle estimate assumes that all events occurred in Miami. The low estimate uses the base damage estimates.

# Methodology 2: 2016 Claims basis

This estimate uses total claims from the Florida Office of Insurance Regulation (OIR) to generate estimates for the one-time cost of damages incurred in 2016. The OIR claims are broken down by residential, commercial residential, and total claims. Residential claims as a percent of total claims and commercial residential as a percent of total claims are calculated and applied to the total claims by county. The claim numbers for residential, commercial residential, and total claims are multiplied by the average property improvement values for residential <10, residential >10, and all properties, respectively. These values are taken as the maximum property value exposure for the 2016 damages.

The high estimate is based on the total for all properties, the middle is based on all residential properties, and the low estimate is based on residential properties <10. The high estimate uses 3 months and 100% of damages due to loss of occupancy or use. The low estimate uses 1 month and 25% of damages due to loss of occupancy or use. The middle is and average of the high and the low.

Both methodologies 1 & 2 assume that any affected residential dwelling would file their claims on the final date they were eligible. For the impact from events in 2016 this means they occur in FY 2019-20. For the potential impact piece of the 1<sup>st</sup> methodology there are impacts in FY 2018-19 and FY 2019-20.

Tax: Vessel Registrations

Issue: Emergency Position-Indicating Beacon - Rate Reduction

Bill Number(s): HB 711/SB 718

☑ Entire Bill☑ Partial Bill:

Sponsor(s): Representative Magar and Senator Powell

Month/Year Impact Begins: July 1, 2017 Date of Analysis: February 24, 2017

#### **Section 1: Narrative**

a. Current Law: Section 328.72, F.S. provides for a reduction of base vessel registration fees for recreational vessels equipped with an emergency position-indicating radio beacon or for a recreational vessel the owner of which owns a personal locator beacon; for each vessel registration qualifying for the fee reduction, an amount equal to the difference shall be transferred from the General Revenue Fund to the Department of Highway Safety and Motor Vehicles to be distributed pursuant to section 328.76, F.S.; the fee reduction is to expire July 1, 2017.

b. **Proposed Change:** Revises section 328.72, F.S. to where the base registration fee reductions mentioned above would be increased and would no longer have an expiration date. The difference between the regular rate and reduced rate would continue to be transferred from the General Revenue Fund to the Department of Highway Safety and Motor Vehicles to be distributed pursuant to section 328.76, F.S.

# **Section 2: Description of Data and Sources**

Correspondence with staff from the Department of Highway Safety and Motor Vehicles December 2016 Highway Safety REC

# Section 3: Methodology (Include Assumptions and Attach Details)

The Department of Highway Safety and Motor Vehicles supplied counts of vessel registrations reduced pursuant to section 328.72, F.S. for the time period July 2016 through January 2017. These amounts were annualized to get a total for FY 2016-17 which was then grown by the vessel growth rates per the December 2016 Highway Safety REC. The forecasted counts were next multiplied by the rate reduction in the bill. The result ranged from \$12.589.45 to \$13,992.90, producing an impact of negative insignificant assuming current market conditions persist. The impact will continue to be to the General Revenue Fund because no changes were made to section 328.72(18)(e), F.S.

**Section 4: Proposed Fiscal Impact**

2020-21			(insignificant)	(insignificant)		
2021-22			(insignificant)	(insignificant)		

# **List of affected Trust Funds:**

Per section 328.72(18)(e), F.S., General Revenue is to be transferred to HSMV in an amount equal to the difference in fees collected and distributed pursuant to section 328.76, F.S.

Section 5: Consensus Estimate (Adopted: 02/24/2017): The Conference adopted the proposed estimate. The impact to HSOTF will be offset by a transfer from General Revenue that will make HSOTF whole.

Tax: Insurance Premium Tax

Issue: Direct Primary Care Agreements
Bill Number(s): CS/HB161 and CS/CS/SB240

☑ Entire Bill☑ Partial Bill:Sponsor(s):

Month/Year Impact Begins: July 1st, 2017

Date of Analysis: 2/22/17

#### **Section 1: Narrative**

**a. Current Law**: Direct primary care agreements are not addressed in Florida law. Direct primary care agreements could be classified as Prepaid Health Clinics.

**b. Proposed Change**: Recognizes agreements entered into by patients, legal representatives or an employer and primary care providers to provide primary care service. Direct primary care agreements would not constitute insurance and not be subject to the Florida Insurance Code.

# **Section 2: Description of Data and Sources**

# Section 3: Methodology (Include Assumptions and Attach Details)

The Affordable Care Act allows for individuals and primary care providers to enter an agreement of primary care service that does not constitute as insurance but satisfies the requirement for healthcare as long as the Direct primary Care Agreement is coupled with a catastrophic insurance policy. As of June 2016, 16 states across the country have passed legislation allowing for the creation of these agreement. The impact from the bill is indeterminate and the number of doctors under such an arrangement nationwide is small. That number however was up 25% from 2011. With the Affordable Care Act now in place, it's reasonable to assume that a cheaper option such as Direct Primary Care will be a viable an attractive alternative to high insurance premiums for those who had previously been uninsured. Qliance, a Direct Primary Care group near Seattle maintains monthly fees ranging from \$54 to \$89 dollars a month.

Our understanding is there are few Direct Primary Care arrangements in the state. If enough are created or grow larger as a result of the ACA then OIR may make the determination on a case by case basis as to whether these qualify for either a prepaid health clinic plan or a prepaid limited health service organization. Both groups are to be licensed and subject to the provisions of insurance code. The prepaid limited health service organization is also subject to a 1.75% insurance premium tax. The impact would be these agreements not becoming one of these two groups thus not remitting any revenue in the future.

Tax: Insurance Premium and Corporate Income Tax

Issue: Telehealth Tax Credit
Bill Number(s): PCB HQS 17-01

Entire Bill

Partial Bill: Sections 1 and 2

**Sponsor(s)**: Health Quality Subcommittee

Month/Year Impact Begins: For tax years beginning on or after January 1, 2018 – impact will begin Spring 2019

Date of Analysis: 2/22/2017

#### **Section 1: Narrative**

**a. Current Law**: No credit exists against Insurance Premium Tax or Corporate Income Tax for Health Insurers or Health Maintenance Organizations.

- b. Proposed Change: Creates a new paragraph (9)(a) of section 624.509, Florida Statutes, to provide that for tax years beginning on or after January 1, 2018, a health insurer or health maintenance organization that covers services provided by telehealth shall be allowed a credit against the insurance premium tax equal to one tenth of one percent of total insurance premiums received on accident and health polices or plans delivered in this state in the previous calendar year that provide medical, major medical, or similar comprehensive coverage. Further provides for a carryforward of the credit for a period not to exceed 5 years. Also provides for the transfer of the credit, in whole or in part, to any insurer.
- c. Creates section 220.197, Florida Statutes, to provide that taxpayers eligible to receive the credit provided in s, 624.509(9)(a) but with insufficient tax liability under s. 624.509 to use the credit, there shall be allowed a credit against corporate Income tax equal to the credit amount pursuant to s, 624.509(9)(a). Further provides for a carryforward of the credit for a period not to exceed 5 years. Also provides for the transfer of the credit, in whole or in part, to any taxpayer.

#### **Section 2: Description of Data and Sources**

Office of Insurance Regulation – 2015 Premium Summary Report for the Legislature
Underlying Health Insurance related growth rates for Insurance Premium Tax – December 2016 General Revenue Estimating
Conference

### Section 3: Methodology (Include Assumptions and Attach Details)

For the low and middle methodology, used certain types of health insurance to estimate the amount of premiums that could be used in the calculation of the credit. For the low estimate, used growth rates of 3% annually that underlie the IPT forecast from December 2016 General Revenue Estimating Conference. For the middle, used growth rates of 6% per year. For the high, a broader group of types of health insurance were included and a 9% growth rate was used for future years.

Additional assumption – assumed that the amount of credit taken or earned under Chapter 624 and Chapter 220 together cannot exceed the amount that can be earned under chapter 624.

Assumed that the credit could not be taken until the 2019-20 state fiscal year.

Tax: Local Business Tax

**Issues**: Prohibits county and municipal governments from levying a local business tax that was not adopted before a specified date and deletes certain provisions that limit the tax rate and authorize tax increases. Provides an exemption from the business tax, subject to certain conditions, to specified veterans, spouses of veterans and active service members, and low-income individuals.

Bill Number(s): Proposed Strike All Amendment to HB 487

X	Entire Bill
	Partial Bill:

Sponsor(s): Representative Renner Month/Year Impact Begins: July 1, 2017 Date of Analysis: February 24, 2017

#### **Section 1: Narrative**

a. **Current Law**: The local business tax represents the taxes charged and the method by which a local government grants the privilege of engaging in or managing any business, profession, and occupation within its jurisdiction. This tax does not refer to any fees or licenses paid to any board, commission, or officer for permits, registration, examination, or inspection.

### **Eligibility**

County and municipal governments may levy, by appropriate resolution or ordinance, a business tax for the privilege of engaging in or managing any business, profession, or occupation within its jurisdiction, pursuant to ss. 205.032 and 205.042, F.S. Additionally, pursuant to s. 205.033(6), F.S., a county, as defined in s. 125.011(1), F.S., (i.e., Miami-Dade County) or any adjacent county (i.e., Broward, Collier, and Monroe counties) is authorized to levy and collect an additional business tax up to 50 percent of the appropriate business tax imposed under s. 205.033(1), F.S., if adopted by ordinance prior to January 1, 1995.

#### **Administrative Procedures**

In order to levy a business tax, the governing body must first give at least 14 days of public notice between the first and last reading of the resolution or ordinance by publishing a notice in a newspaper of general circulation within its jurisdiction. Pursuant to ss. 205.032 and 205.042, F.S., the public notice must contain the proposed classifications and rates applicable to the business tax.

A number of other conditions for levy are imposed on counties and municipalities, pursuant to ss. 205.033 and 205.043, F.S., including the transfer of a business tax receipt to a new owner or new business location within the same jurisdiction upon payment of a transfer fee of up to 10 percent of the annual business tax, but not less than \$3 nor more than \$25.

Beginning October 1, 1995, a county or municipality that has not adopted a business tax ordinance or resolution may adopt a business tax ordinance, pursuant to s. 205.0315, F.S. The tax rate structure and classifications in the adopted ordinance must be reasonable and based upon the rate structure and classifications prescribed in ordinances adopted by adjacent local governments that have implemented s. 205.0535, F.S. If no adjacent local government has implemented s. 205.0535, F.S., or if the governing body of the county or municipality finds that the rate structures or classifications of adjacent local governments are unreasonable, then an alternative method is authorized. In such a case, the rate structure or classifications prescribed in the ordinance of the local government seeking to impose the tax may be based upon those prescribed in ordinances adopted by local governments that have implemented s. 205.0535, F.S., in counties or municipalities that have a comparable population.

Pursuant to s. 205.0535, F.S., by October 1, 2008, any municipality that adopted by ordinance a local business tax after October 1, 1995, could, by ordinance, reclassify businesses, professions, and occupations and establish new rate structures provided certain conditions were met. If such conditions were met, counties and municipalities could, every other year thereafter, increase or decrease by ordinance the rates of business taxes by up to 5 percent. Any subsequent increase must be enacted by at least a majority plus one vote of the governing body. A county or municipality is not prohibited from decreasing or repealing any authorized local business tax, and the governing body may adopt an ordinance by majority vote that repeals a local business tax or establishes new rates that decrease local business tax and do not result in an increase in local business taxes for a taxpayer without having to establish an equity study commission.

A municipality's governing body that levies the tax may request that the county in which the municipality is located issue the municipal receipt and collect the tax. A county's governing body that levies the tax may request that municipalities within the county issue the county receipt and collect the tax. However, before any local government issues any business receipts on behalf of another local government, appropriate agreements must be entered into by the affected local governments, pursuant

Tax: Local Business Tax

**Issues**: Prohibits county and municipal governments from levying a local business tax that was not adopted before a specified date and deletes certain provisions that limit the tax rate and authorize tax increases. Provides an exemption from the business tax, subject to certain conditions, to specified veterans, spouses of veterans and active service members, and low-income individuals. **Bill Number(s)**: Proposed Strike All Amendment to HB 487

to s. 205.045, F.S. All business tax receipts are sold by the appropriate tax collector beginning July 1st of each year. The taxes are due and payable on or before September 30th of each year, and the receipts expire on September 30th of the succeeding year. In several situations, administrative penalties are also imposed, pursuant to s. 205.053, F.S.

Several sections of Chapter 205, F.S., exempt, or allow local governments to exempt, certain individuals from all or some portion of local business taxes as well as regulate the issuance of tax receipts to certain individuals or businesses.

# Distribution of Tax Proceeds

Pursuant to s. 205.033, F.S., the revenues derived from the business tax imposed by county governments, exclusive of the costs of collection and credit given for municipal business taxes, are apportioned between the county's unincorporated area and the incorporated municipalities located within the county by a ratio derived by dividing their respective populations by the county's total population. Furthermore, within 15 days following the month of receipt, the apportioned revenues are sent to each governing authority, pursuant to s. 205.033(5), F.S.

#### **Authorized Uses**

Local business tax proceeds are considered general revenue for the local government. The proceeds of a county-imposed local business tax may be used for overseeing and implementing a comprehensive economic development strategy through advertising, promotional activities, and other sales and marketing techniques, pursuant to s. 205.033(7), F.S. The proceeds of the additional county business tax imposed pursuant to s. 205.033(6), F.S., are distributed by the county's governing body to a designated organization or agency for the purpose of implementing a comprehensive economic development strategy through advertising, promotional activities, and other sales and marketing techniques.

**b. Proposed Changes**: Section 1 amends s. 205.032, F.S., to provide that a county may continue to levy a local business tax if an appropriate resolution or ordinance was adopted before January 1, 2017. Furthermore, the amendment specifies that the local business tax imposed on a taxpayer may not exceed \$75 and eliminates the county's public noticing requirement.

Section 2 amends s. 205.033, F.S., to delete provisions that, for counties, limit the tax rate and authorize tax increases and reduce the maximum limit of transfer fees from \$25 to \$10 in cases of the receipt's transfer to a new owner following a bona fide sale of the business or the receipt's transfer from one location to another location within the same county.

Section 3 amends s. 205.042, F.S., to provide that a municipality may continue to levy a local business tax if an appropriate resolution or ordinance was adopted before January 1, 2017. Furthermore, the amendment specifies that the local business tax imposed on a taxpayer may not exceed \$75 and eliminates the municipality's public noticing requirement.

Section 4 amends s. 205.033, F.S., to delete provisions that, for municipalities, limit the tax rate and authorize tax increases and reduce the maximum limit of certain transfer fees from \$25 to \$10.

Section 5 amends s. 205.0535, F.S., to conform provisions to changes made by this act.

Section 6 amends s. 205.162, F.S., to exempt low-income persons, as defined, from paying the local business tax and specifies the procedures required to receive such exemption.

Section 7 amends s. 205.171, F.S., to revise the exemption to include veterans, veterans' spouses, and active duty military service members' spouses, as defined, and specifies the procedures required to receive such exemption.

Section 8 provides an effective date of July 1, 2017.

Tax: Local Business Tax

**Issues**: Prohibits county and municipal governments from levying a local business tax that was not adopted before a specified date and deletes certain provisions that limit the tax rate and authorize tax increases. Provides an exemption from the business tax, subject to certain conditions, to specified veterans, spouses of veterans and active service members, and low-income individuals. **Bill Number(s)**: Proposed Strike All Amendment to HB 487

# Section 2: Description of Data and Sources

Historical Local Business Tax revenues (i.e., LFY 1992-93 through 2014-15) reported by local governments via their respective Annual Financial Reports (AFRs) via Revenue Account #316.000 – Local Business Tax, which are posted on the EDR's website via the link below.

http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

County and municipal government responses to a survey conducted by EDR and facilitated by the Florida Association of Counties, Florida League of Cities, and Florida Association of Business Tax Officials.

### Section 3: Methodology (Include Assumptions and Attach Details)

See accompanying Excel spreadsheet. EDR was asked by the House Ways and Means Committee staff to evaluate two different scenarios. The first is based on the proposed amendment, which includes the provision that the business tax imposed on a taxpayer may not exceed \$75. The second is based on the proposed amendment with the assumption that the business tax imposed on a taxpayer be a statewide average, which is calculated as \$88 (i.e., estimated statewide FY 2015-16 local business tax revenue of \$191,100,500 divided by the statewide # of business establishments of 2,181,599).

#### **Additional Notes:**

In its survey response, the City of Tampa indicated that approximately 93% of the City's local business tax revenues are pledged to Florida Aquarium bonds. The City reported FY 2015-16 tax collections of \$9.85 million.

Additionally, a number of survey respondents expressed concern regarding the possible interpretation(s) of the phrase "on a taxpayer" on lines 13, 103, and 168 with respect to a single business entity that operates multiple locations within a single local jurisdiction.

# Section 4: Proposed Fiscal Impact (Millions)

Scenario 1: The business tax imposed on a taxpayer may not exceed \$75.

**Tax**: Sales and Use Tax **Issue**: Admissions Resales

Bill Number(s): Proposed Language

☑ Entire Bill☐ Partial BillSponsor(s):

Month/Year Impact Begins: July 1, 2017

Date of Analysis: 2/21/2017

**Section 1: Narrative** 

a. Current Law: 212.04, F.S. (1)(c) The provisions of this chapter that authorize a tax-exempt sale for resale do not apply to sales of admissions.

b. Proposed Change: 212.04 (c) 2. If a purchaser subsequently resells an admission to an entity that has a valid sales tax exemption certificate from the department, excluding an annual resale certificate, the purchaser may seek a refund or credit from the vendor. Upon an adequate showing of the ultimate exempt nature of the transaction, the vendor shall refund or credit the tax paid by the purchaser and may then seek a refund or credit of the tax from the department based on the ultimate exempt nature of the transaction. The refund or credit is allowable only if the vendor can show that the tax on the exempt transaction has been remitted to the department. If the tax has not yet been remitted to the department, the vendor may retrain the exemption documentation in lieu of remitting tax to the department.

# **Section 2: Description of Data and Sources**

**DOR Monthly Sales File** 

REC General Revenue Tourism & Rec. growth rates – December 2016

# Section 3: Methodology (Include Assumptions and Attach Details)

The original model used the DOR Monthly sales file data for kind code 59 (Admissions, amusement & recreation services) as the starting point. The Sales Tax Collections for 14-15 were used for kind code 59 is then grown by Tourism and Recreation non-durables from August 2015 GR. The amount of collections attributed from resellers is then assumed at 10, 5 and 2.5 percent level for the high, middle and low estimates. The four-year average for non-taxable (exempt) activity is applied to the assumed collections calculated in the previous step.

The previously adopted model replaced the 4-year average non-taxable (exempt) percentage with a 2% assumed non-taxable percentage to indicate what portion of the return population's calculated exemptions was related to sale of admissions to exempt entities. Using these adjustments, the Sales Tax Collections for 15-16 for kind code 59 was added to the model and then the Tourism and Recreation non-durables growth percentage from December GR were updated. This model adjustment used as the middle for this analysis. The high assumes a 3% non-taxable percentage, while the low assumes a 1%.

There is a one month lag to collections, and the first-year cash is equal to eleven months of the recurring.

Tax: Sales and Use Tax

Issue: Agricultural Exemptions - Trailers

Bill Number(s): HB765

Entire Bill

☑ Partial Bill: Section 1: Vehicle Trailers

Sponsor(s): N/A

Month/Year Impact Begins: July 1, 2017 with one month lag to collections

Date of Analysis: February 24, 2017

#### **Section 1: Narrative**

a. Current Law: Section 212.08(3) (b) F.S., "The tax may not be imposed on that portion of the sales price below \$20,000 of a trailer weighing 12,000 pounds or less and purchased by a farmer for exclusive use in agricultural production or to transport farm products from his or her farm to the place where the farmer transfers ownership of the farm product to another. This exemption is not forfeited by using a trailer to transport the farmer's farm equipment. The exemption provided under this paragraph does not apply to the lease or rental of trailers."

b. Proposed Change: Section 212.08(3) (b) F.S., "The tax may not be imposed on that portion of the sales price below \$25,000 \$20,000 of a trailer weighing 12,000 pounds or less and purchased by a farmer for exclusive use in agricultural production or to transport farm products from his or her farm to the place where the farmer transfers ownership of the farm product to another. This exemption is not forfeited by using a trailer to transport the farmer's farm equipment. The exemption provided under this paragraph does not apply to the lease or rental of trailers."

# **Section 2: Description of Data and Sources**

Number of Farms in Florida from: Agriculture by the Number 2015

Florida Department of Agriculture and Consumer Services Registered Vehicle Trailers from Florida Highway Safety and Motor Vehicles monthly report on vehicle demographics

CPI from 2/2017 REC

#### Section 3: Methodology (Include Assumptions and Attach Details)

The 2015 analysis of SB 398/ HB 249 assumed that each farm in Florida has a trailer that would qualify for this exemption. It also assumed that the trailers are replaced every 15 years. The prior estimate was based on 7.5% of the farms replacing their trailer at a price equal to \$7,500.

The current estimate is based on 10 % of the 3153 annual replacement trailers having an average amount of \$4,000 above the current \$20,000 cut-off.

The effective date of this proposed language is July 1, 2017 and the 2017-18 cash values are equal to eleven months of the recurring.

Tax: Sales and Use Tax

Issue: Agricultural Exemptions - Fencing

Bill Number(s): HB765

Entire Bill

☑ Partial Bill: Section 1. Certain Fences and Netting

Sponsor(s): N/A

Month/Year Impact Begins: July 1, 2017 Date of Analysis: February 24, 2017

#### **Section 1: Narrative**

a. Current Law: 212.08 (5) (a) F.S., exempts certain items in agricultural use from sales tax.

#### Section 2: Description of Data and Sources

Agriculture by the Number 2010-2014, Florida Department of Agriculture and Consumer Services CPI from 2/2017 REC Market based Price research

#### Section 3: Methodology (Include Assumptions and Attach Details)

It is assumed that there is no growth in the amount of farm land in use. It is assumed that all farmland that requires fencing has it at this time, and expenses for repair and replacement will be exempt under the proposed changes. It is assumed that all cattle pastures would be eligible for barbed wire, and that all remaining agricultural acreage would be eligible for hog wire. It is assumed that the crops that would benefit or need nylon mesh netting for protection from birds would be berries. All prices are grown by the consumer price index.

The barbed wire analysis starts with an assumption about average cattle pasture size in acres. This starting point is used to find the number of pastures and the perimeter for each pasture. This number is also adjusted by percent of pastures fenced with barbed wire, and for shared fence lines. For both methods the total price for all fencing is multiplied by the repair and replacement percentages. This amount is multiplied by the sales tax rate for the impact.

The hog wire analysis assumes that the farm land not used for cattle would all be able to use hog wire. The hog wire analysis uses a method similar to the second method for barbed wire fencing. The average crop size is assumed and used to find the perimeter of the average crop. This number is adjusted by the percent of cropland fenced in hog wire, and for shared fence lines. The total price for all fencing is multiplied by the repair and replacement percentages. This amount is multiplied by the sales tax rate for the impact.

The nylon netting analysis uses the berry farm acreage as the starting point for the analysis and applies the market prices per square foot to find the total possible price of installed netting. This number is adjusted by the percent of berry acreage using netting. This price is multiplied by the repair and replacement percentages, and the tax rate. This amount is multiplied by the sales tax rate for the impact.

Model updated to reflect most current acreage data available for Total Farm Land, Cattle, Strawberries, and Blueberries.

There is a one month lag to collections, and the first-year cash is equal to eleven months of the recurring.

Tax: Sales and Use Tax

Issue: Agricultural Exemptions – Liquefied or Compressed Oxygen

Bill Number(s): HB765

☐ Entire Bill

Sponsor(s): N/A

Month/Year Impact Begins: July 1, 2017 with one month lag to collections

Date of Analysis: February 24, 2017

**Section 1: Narrative** 

a. Current Law: 212.08 (5) (a) F.S., exempts certain items in agricultural use from sales tax.

b. Proposed Change: HB765 adds: compressed or liquefied oxygen used in aquaculture production;

## **Section 2: Description of Data and Sources**

2014 & 2015 Annual sales data for NAICS code 325120 – Industrial Gas Manufacturing

## Section 3: Methodology (Include Assumptions and Attach Details)

The primary use of oxygen in aquaculture is to provide adequate dissolved oxygen to crowded breeding and growing tanks for edible fish. The primary suppliers of oxygen are classified as industrial gas manufacturers in the annual sales files. These manufacturers supply a wide variety of other gases to many different industries. Flat growth was assumed due to the relatively small size and volatile nature of the number aquaculture operations. Overall the number of operations appears to be declining, but the total number of operations varies from year to year.

For the low it is assumed that 1% of the sales tax collected in NAICS code 325120 comes from sales of oxygen to aquaculture operations. The high assumes 10% of sales and the middle is an average of the high and the low.

There is a one month lag to collections, and the first-year cash is equal to eleven months of the recurring.

Chlorodifluoromethane manufacturing

Chlorofluorocarbon gases manufacturing

Compressed and liquefied industrial gas manufacturing

Dichlorodifluoromethane manufacturing

Dry ice (i.e., solid carbon dioxide) manufacturing

Fluorinated hydrocarbon gases manufacturing

Fluorocarbon gases manufacturing

Gases, industrial (i.e., compressed, liquefied, solid), manufacturing

Helium manufacturing

Helium recovery from natural gas

Hydrogen manufacturing

Ice, dry, manufacturing

Industrial gases manufacturing

Liquid air manufacturing

Monochlorodifluoromethane manufacturing

Neon manufacturing

Nitrogen manufacturing

Nitrous oxide manufacturing

Oxygen manufacturing

Tax: Sales & Use Tax

Issue: Hernando County Hometown Heroes Pilot Program

Bill Number(s): Proposed Amendment/HB 459

☑ Entire Bill☑ Partial Bill

Sponsor(s): Rep. Ingoglia

Month/Year Impact Begins: July 1, 2017

Date of Analysis: 2/22/2017

#### **Section 1: Narrative**

**a. Current Law**: Currently there is no program authorizing the transfer of previously paid sales and use taxes by certain dealers to certain nonprofit agencies.

b. Proposed Change: Creates a pilot program in Hernando County authorizing the transfer of sales and use tax previously paid by certain dealers to certain qualified nonprofit agencies, where dealer is defined as any person who is registered with the department under s. 212.18 to collect or remit state sales and use taxes, and a qualified nonprofit agency is defined as a corporation of which no part of the income or profit is distributable to its members, directors, or officers, except as otherwise provided under chapter 617, that is physically located in Hernando County, that has provided services in Hernando County for three consecutive years or more, that has filed as a corporation not for profit under chapter 617 for three consecutive years or more, and that has audited financial records for three years or more.

A single dealer may not request the transfer of less than \$2,500 or more than \$30,000 of state sales and use taxes previously remitted in a given fiscal year, and the total amount of states sales and use tax transferred to qualified nonprofit agencies may not exceed \$300,000 during any fiscal year.

## **Section 2: Description of Data and Sources**

Florida Department of Revenue, Florida 2015 Calendar Year Sales Tax File

## Section 3: Methodology (Include Assumptions and Attach Details)

In the 2015 Calendar Year, Hernando County had 560 locations with sales tax remittances of \$30,000 or more and an additional 1,147 locations with sales tax remittances between \$2,500 and \$30,000. For the low estimate, it was assumed that participation will start at \$100,000 and increase by \$100,000 each year until it reaches the cap of \$300,000 in 2019-20. For the high it was assumed that there would be enough participation to reach the cap in the first year and in every subsequent year in the forecast period.

□ Partial Bill: Section 1
 Sponsor(s): Grant, J./Young

Month/Year Impact Begins: July 1, 2017 Date of Analysis: February 23, 2017

#### **Section 1: Narrative**

- a. Current Law: Beginning July 1, 2014, and continuing through June 30, 2033, the distribution to the H. Lee Moffitt Cancer Center is 4.04% of net cigarette tax collections each fiscal year, or 4.04% of net cigarette tax collections in Fiscal Year 2001-02, whichever is greater For this purpose, net cigarette tax collections are defined as the cigarette tax imposed by s. 210.02, less the service charges provided for in s. 215.20 and less 0.9 percent of the amount derived from the cigarette tax imposed by s.210.02, which shall be deposited into the Alcohol Beverage and Tobacco Trust Fund. Because cigarette tax collections today are substantially lower than they were in Fiscal Year 2001-02, the Moffitt distribution is currently forecasted to be a flat \$15.6 million each fiscal year, which is equal to the amount it would have been in Fiscal Year 2001-02. After all distributions from the cigarette tax are made, the remainder goes to General Revenue.
- b. Proposed Change: Beginning July 1, 2017, and continuing through June 30, 2053, the bill increases the portion of net cigarette taxes distributed to the Moffitt Cancer Center from 4.04% to 6.13%. The provisions relating to the lookback to Fiscal Year 2001-02 remain the same. The result is an \$8.1 million increase in the forecasted Moffitt distribution from \$15.6 million to \$23.7 million each fiscal year. This will also result in an \$8.1 million decrease to General Revenue each fiscal year.

#### **Section 2: Description of Data and Sources**

February 2017 Tobacco Tax and Surcharge Revenue Estimating Conference

# Section 3: Methodology (Include Assumptions and Attach Details)

The cigarette tax forecast and the impact estimate assume that cigarette tax collections remain below Fiscal Year 2001-02 levels, resulting in a flat distribution to the Moffitt Center of \$23.7 million.
