Revised General Revenue Collections for March 2023 (Sales Tax Data Reported is Unaudited)

General Revenue collections for March 2023 showed a gain of \$167.7 million (4.8 percent) over the newly adopted forecast assumptions made by the General Revenue Estimating Conference (GR REC) on March 13, 2023, with the gain arising from a wide array of the sources.

After adjusting total Sales Tax collections for local taxes and distributions, audits, bad checks and transfers to Sales Tax from the Communications Services Tax, Sales Tax GR was \$49.0 million (1.7 percent) over the estimate for the month. March collections reflect activity that largely occurred in February. The Revenue Estimating Conference's adopted estimates indicate recovery and rebuilding efforts associated with Hurricane Ian added \$29.9 million to final liability for the month. Translated to Sales Tax GR, this equates to \$26.3 million, bringing the cumulative recovery and rebuilding total to \$538.3 million; however, the Office of Economic and Demographic Research believes there is some evidence that the rebuilding effort is coming in stronger than originally projected.

For the month, five of the six sales tax components were over estimate and one was under estimate.

- Consumer Nondurables...gaining \$38.2 million (4.2 percent) to the estimate for the month.
