Revenue Estimating Conference Ad Valorem Assessments Conference Held: March 7, 2014

Executive Summary

Estimates of the statewide property tax roll are primarily used in the appropriations process to approximate the Required Local Effort (RLE) millage rate. This is the rate local school districts must levy in order to participate in the Florida Education Finance Program. The 2014 certified school taxable value is now estimated to be \$1,496.79 billion. This represents an increase of \$8.76 billion or a 0.60% percent increase from the December 2013 forecast (\$1,488.03 billion). At 96 percent, the value of one mil is projected to be \$1,436.91 million.

Florida's housing market continues to drive the overall forecast. Recent residential data from the Federal Housing Finance Agency price index shows signs of progress in all parts of the state. The new forecast is premised on the belief this widespread growth will continue—albeit at a reduced pace---throughout the forecast horizon. In this regard, the Conference remains concerned that the foreclosure rate and inventory of unsold residential properties in Florida are still sizeable. Completed foreclosures add units to the active housing market, dampening sales prices as a result of the increased supply. In addition, the low average sales prices for foreclosed homes tend to suppress value growth for neighboring property. The conference also noted the recent decline in refinancing activity—the heightened activity experienced over the last year had prevented some homes from facing distressed sales or foreclosure, and a slowdown may bring an end to improvement from this front.

County (non-school) taxable value is lower than school taxable value due to the greater number of exemptions available to property owners. In recent years, the Revenue Estimating Conference has been forecasting county taxable value separately from school taxable value. County taxable value on January 1, 2014 is projected to be \$1381.40 billion. On an annual basis, this represents an increase of \$7.41 billion or a 0.54% increase from the December 2013 forecast (\$1,373.99 billion).
