

EXECUTIVE SUMMARY

Criminal Justice Estimating Conference

March 17, 2021

The Criminal Justice Estimating Conference convened March 17, 2021, to revise the forecast of prison admissions and population. During the four months monitored since the November 2020 Conference, admissions totaled 5,821 which was 2,217 below the estimate. The prison population at the end of February 2021 was 79,425 which was 2,740 below the November estimate. These large errors in the forecast directly result from the continuing impact of the Coronavirus outbreak on the criminal justice system and the state's response, which began in March of 2020.

As a result of the continuing pandemic, the courts have developed a backlog of pending felony cases (27,364) that is expected to take several years to work its way through to the prison population. At this time, they do not expect to return to full operating capacity until FY 2021-22, with their backlog expected to take until the end of FY 2023-24 to resolve itself. In addition, the Department of Corrections has a current backlog of 2,066 sentenced offenders waiting in the jails that should begin to clear once they return to full intake in June. Nevertheless, the Sheriffs are tightly managing jail capacity as the backlog continues to build. For all of these reasons and other pandemic-related issues, an unknown number of future inmates will earn atypically low jail credits prior to sentencing and transfer to the state system. As conditions return to normal, the clearance of the backlog coupled with the reduced amount of accrued jail credits is expected to exert upward pressure on prison admissions and the resulting population, but not relative to the prior Conference expectations regarding these issues in November.

Considering the current reopening plans for the court system, the conferees adopted a population forecast which assumes a -14.5 percent decrease in total admissions in FY 2020-21 relative to the -9.8 percent decline assumed in November. After reopening, admissions are expected to increase 64.5 percent in FY 2021-22. Total admissions then decline for 3 years (by -3.6 percent in FY 2022-23, by -1.4 percent in FY 2023-24, and by -1.3 percent in FY 2024-25) before increasing in FY 2025-26 by 0.3 percent.

The June 30 projected prison population is now expected to decrease by -7.9 percent in FY 2020-21 rather than the -6.4 percent assumed in November. Population is then expected to increase each year through the remainder of the forecast period: by 7.8 percent in FY 2021-22; by 3.0 percent in FY 2022-23; by 1.6 percent in FY 2023-24; by 1.1 percent in FY 2024-25; and by 0.8 percent in FY 2025-26.

Year	Admissions	Releases	End of year pop	End of year over (under) July 2020 CJEC	End of year percent change
FY 20-21	18,511	25,480	80,767	-1,349	-7.9%

CRIMINAL JUSTICE TRENDS

➤ Accuracy of November 2020 forecast

- **Admissions** since the November conference totaled 5,821—2,217 less than projected for an error of -27.6 percent. (Page 1)
- The **end-of-month population** on February 28th was 79,425. This was 2,740 under the projected 82,165 (-3.3% error). (Page 1)
- Over 94.4 percent of July through February admissions were new commitments, and the percentage error was higher for this group than for all admissions. There were 5,498 new commitments, 2,145 fewer than projected (-28.1% error). The number of conditional and control release violators returned to prison with technical violations was 72 less than projected in February (-18.2% error). (Page 2)

➤ Crime

- The number of index offenses decreased in 2019 by 26,128 (-4.6%) from the 2018 level of 567,176. The 541,048 index crimes reported in 2019 was lower than reported in any year since 1973. This is the eleventh year in a row in which index offenses declined. (Page 3)
- The number of **reported violent offenses** decreased by -1.0 percent in 2019. Violent offenses, which include murder, forcible sexual offenses, robbery, and aggravated assault, were 15.0 percent of all index offenses in 2019, up from 14.4 percent in 2018. Non-violent index offenses include burglary, larceny, and motor vehicle theft. These decreased by -5.2 percent in 2019. Note that drug related offenses are not included in index offenses. (Page 4)
- Data for the first six months of 2020 indicate that the number of reported crimes has continued to decline. The number of total index crimes decreased by -11.7 percent in the first six months of 2020 compared to 2019. The number of violent crimes increased by 0.8 percent rising to 40,421. Nonviolent crimes decreased by -13.9 percent. (Page 5)
- The crime rate fell from 2,721.4 in 2018 to 2,551.1 in 2019 (-6.3%). This decline is lower than observed in 2018 when the crime rate fell by -9.0 percent. (Page 6)
- 2019 **arrests** decreased by -5.2 percent, from 716,665 in 2018 to 679,221 in 2019. Arrests for index offenses declined by -4.0 percent in 2019 while arrests for non-index crimes decreased by -5.5 percent. The largest percentage decrease in index offense arrests was in forcible sex offenses (down -8.9%). The largest percentage increase in index offense arrests was in murder (up 10.8%). (Pages 5, 7-8)
- Arrests for the first six months of 2020 were down -26.2 percent from 2019. (Page 5)

➤ Filings and Guilty Dispositions

- The number of **felony filings** declined in 2020, decreasing by -14.5 percent. (Pages 9 and 15)
- **Violent** offense filings increased by 0.9 percent in 2020 and **nonviolent** offense filings declined by -18.2 percent. During the same period, **drug** filings decreased by -19.2 percent. (Pages 10 and 11)

- The share of **violent** filings increased to 24.8% in 2020 when compared to 2019, where it was 21.0%. The share of filings that are **nonviolent** decreased from 46.9 percent in 2019 to 44.8 percent in 2020, while the share of **drug** filings decreased from 32.2 percent to 30.4 percent. (Pages 10 and 11)
- The number of **guilty dispositions** decreased by -34.9 percent in 2020. (Pages 12 and 15)
- **Violent** offense guilty dispositions decreased by -31.6 percent and **nonviolent** offense guilty dispositions declined by -35.4 percent in 2020 over 2019. During the same period, drug guilty dispositions decreased by -35.8 percent. (Pages 13 and 14)
- The share of guilty dispositions for **violent** offenses increased from 17.7 to 18.6 percent between 2019 and 2020. The share for **nonviolent** offenses decreased and the share for **drug** offenses decreased. (Pages 13 and 14)
- The percent of **guilty dispositions which are imprisoned** as new commitments has trended upward from less than 16 percent in the late nineties to 23.3 percent in 2009. The percentage fell for three years but then increased through 2014. Following four years of declines, the percentage increased slightly in 2019, then decreased to 14.9 percent in 2020. (Page 16)

➤ **Prison Admissions**

- There were 13,543 **admissions to prison** in 2020, down -52.4 percent from 2019. This is the second straight calendar year decrease. (Page 22)
- **New commitments**, which are over 95.0 percent of all admissions, totaled 20,664 in FY 19-20. This represented a -26.4 percent decrease from the prior fiscal year. New commitments increased in FY 18-19 after decreasing in the prior five fiscal years. (Page 23)
- In looking at new commitments by calendar year, new commitments in 2020 decreased by -52.9 percent from the previous calendar year. (Page 24)
- **Conditional and control release violators without new sentences** comprise the remaining 5.0 percent of total admissions. These admissions decreased in 2020 by -41.5 percent, decreasing for a sixth consecutive calendar year. (Page 25)
- **New commitments** moved to a new level in March 2003 at the beginning of **zero tolerance**. They trended down after late 2008 into 2014, before beginning to stabilize. New commitments have been between 615 and 2,032 for the last six months, with no month exceeding the number of commitments for the same time period in FY 19-20. (Page 26)
- Offenders sentenced to prison for **technical violations** in FY 19-20 decreased by -32.4 percent from the prior fiscal year. The first eight months of FY 20-21 indicated a -40.9% decrease compared to those same months in FY 19-20. (Page 27)
- After a three-year period during which **technical violators as a percentage of total admissions** averaged 29.1 percent (and exceeded 30 percent in 12 months), this percentage fell to 24.0 percent in FY 07-08. Since then, the percentage has averaged between 18.5 percent and 21.5 percent. In FY 19-20, technical violators as a percentage of total admissions was 20.0 percent, down from 20.6 percent in FY 18-19. The post-zero tolerance percentages have remained well below pre-zero tolerance levels. (Page 28)
- The percentage of supervision revocations due to technical violations who are sentenced to prison decreased in FY 19-20. In FY 11-12, 30.5 percent of technical violators were sentenced to prison, but by FY 14-15 it had reached 33.7 percent. As of FY 19-20, it dropped to 28.3 percent sentenced to

prison. The first eight months of FY 20-21 are showing a continued downward trend, with 27.4 percent sentenced to prison. (Page 28)

- The average **sentence length** of new commitments decreased for a fourth consecutive year to 55.7 months in CY 2020, down from 59.9 months in CY 2019. (Pages 29 and 30)
- In February 2021 the average **sentence length** of new commitments was 48.8 months (4.1 years). In February 2020 the average sentence length was 62.3 months (5.2 years). (Pages 30 and 31)
- While large numbers of new commitments are sentenced to prison with short sentences, there are often shifts in the **sentence length distribution**. Total new commitments decreased by 8,467 (-48.5%) in the first eight months of FY 20-21 from the same time period in FY 19-20, with the largest decreases being in sentences from 16 to 21 months in length and sentences greater than 102 months. (Page 32)
- The **number of year-and-a-day new commitments** decreased by -59.1 percent in CY 2020. This was a reverse from the prior calendar year, which saw an increase in these commitments. (Page 33)
- The **percentage of year-and-a-day sentences** also decreased in CY 2020 after an increase in CY 2019. In CY 2020, 7.1 percent of new commitments had year-and-a-day sentences, down from 8.2 percent in CY 2019. (Page 34)
- The first eight months of FY 20-21 showed a decrease in **year-and-a-day sentences**, with -58.3 percent less compared to the same time period in FY 19-20. The largest level decrease was in Hillsborough County where these sentences decreased by -79.8 percent. Polk (-83.4 percent) also experienced a large decrease. (Page 35)
- There was a detectable increase in **year-and-a-month** sentences in **Hillsborough County** beginning November 2007. These increases were in conjunction with a large decline in **year-and-a-day sentences**. Hillsborough's percentage of total new commitments that are either year-and-a-day or year-and-a-month in length declined after October 2006, remained stable for a couple of years and trended upward before stabilizing once again. Data for FY 19-20 and FY 20-21 suggest that year-and-a-day sentences represent the largest share of these short sentences and are trending downward. Data also suggest that Pinellas County started using the year-and-a-month sentence as an alternative to year-and-a-day sentences beginning in 2010. More recent data for Pinellas County indicate a stabilization in year-and-a-month sentences, with year-and-a-day sentences trending downward. (Page 36)
- **Growth in new commitments** is not uniform across the state. Comparing July through February of FY 19-20 and FY 20-21, 59 counties experienced negative growth in the number of new commitments and 5 counties showed positive growth. (Pages 37 and 38)
- Volusia County had the largest **number of new commitments** in the first eight months of FY 20-21 (450, 5.0% of total). New commitments from Duval accounted for 5.0 percent of the state total in this same time period, down from 5.2% in the first eight months of FY 19-20. Pinellas's new commitments accounted for 4.5 percent of the total (down from 5.4%). Bay County's new commitments accounted for 4.4 percent of the total (up from 4.1%). (Page 37)
- In the first eight months of FY 20-21, Hillsborough County led the state in the number of **decreases in new commitments**, declining by 818 (-71.9%) when compared with the same time period in FY 19-20. Polk decreased by 561 new commitments (-60.6%), while Miami-Dade declined by 550 (-62.4%). Two other counties had decreases of 500 or more new commitments. (Page 38)
- Florida's three **largest counties**, Miami-Dade, Broward, and Palm Beach, accounted for 28.9 percent of the state population in 2020, but only 13.0 percent of the state's new commitments to prison in FY 19-20 and 20.7 percent of the year-and-a-day sentences. On the other hand, Bay County accounts for 0.8 percent of the state's total population, but accounts for 4.2 percent of new commitments. (Pages 39 and 40)

- Similarly, Hillsborough County accounts for 6.8 percent of the state's total population, but accounts for 14.8 percent of the year-and-a-day sentences, and though Volusia only represents 2.6 percent of the state population, it accounts for 10.8 percent of year-and-a-day sentences. Perhaps even more remarkable, of the 18 counties that have double-digit shares of their new commitments with year-and-a-day sentences, more than half of them have population shares of less than three-quarters of one percent. (Pages 39 and 40)
- The -48.5 percent decrease in new commitments in the first eight months of FY 20-21 was distributed across all **offense groups**, with percent change ranging from -41.7% ("**Weapons**") to -61.7% ("**Murder/Manslaughter**"). Even with these variations in commitment decreases, each crime's share of new commitments was generally similar, though "**Violent, Other**" increased its share while "**Murder/Manslaughter**" and "**Sexual/Lewd Behavior**" decreased their shares. Nearly all offense groups saw declines in average sentence length, with "**Murder/Manslaughter**" offenses declining by over 6 years in sentence length, and both "**Sexual/Lewd Behavior**" and "**Robbery**" offenses declining by over 1 year. The other offenses showing declines varied between 3 and 9 months. Overall, these declines resulted in all new commitments having a decline of nearly a year in average sentence length. (Page 41)
- Similar to new commitments as a whole, significant decreases occurred across **year-and-a-day sentences** between the first eight months of FY 19-20 and FY 20-21. (Page 42)
- New commitments with **year-and-a-day sentences** have a wide variety of offenses. In the first eight months of FY 20-21, "**Possess methamphetamine**" and "**Grand theft, \$300 - \$4,999**" were the most common primary offenses. These two offenses accounted for 10.8 percent of the total year-and-a-day new commitments (down from 14.2% in the first eight months of FY 19-20). (Page 43)
- The **percentage of new commitments sentenced for third degree felonies** increased from 46.8 percent in CY 2019 to 47.1 percent in CY 2020. (Page 44)
- The percentage of diversion eligible offenders sentenced to prison who committed a felony following the passage of CS/SB 1722 declined from 2.6 percent in FY 09-10 to 1.9 percent in FY 14-15. In FY 15-16, this percentage rose slightly to 2.1 percent. In FY 16-17, this percentage fell to 1.5 percent, and fell again to 1.3 percent in FY 17-18. In FY 18-19, this percentage rose slightly to 1.8 percent and in FY 19-20, this percentage fell to 1.7 percent. In the first eight months of FY 20-21, this percentage fell to 1.6 percent. (Page 45)
- The number of offenders sentenced to prison under **10-20-Life** decreased in FY 19-20 with 906 offenders sentenced under these provisions receiving mandatory prison terms. Of these offenders, 14.3 percent received a sentence of at least 25 years in length, up from 11.4 percent in FY 18-19. (Pages 46 and 47)
- The total affected prison population under 10-20-Life had its first year decrease in FY 19-20. On June 30, 2020, there were 11,968 offenders who had received a mandatory prison term under this statute in Florida's prisons. This represented 13.6 percent of Florida's prison population on that date. (Pages 46 and 47)

➤ COUNTY JAILS

- **Average daily population** in county jails declined with the end of zero tolerance policies. The adjusted June 2020 average daily population (ADP) of 48,012 was -13.3 percent lower than the adjusted June 30, 2019 ADP of 55,381. However, at the peak of zero tolerance, the ADP exceeded 66,000 (July 2007). (Page 48)
- The **adjusted average daily population** has been below 60,000 since December 2009. (Page 49)

- In FY 17-18, an average of 19.0 percent of the **offenders in county jail had been sentenced for a felony**. In FY 18-19 the percentage decreased with an average of 17.6 percent of the **offenders in county jail sentenced for a felony**. In FY 19-20, the percentage continued to decrease with an average of 15.7 percent of the **offenders in county jail sentenced for a felony**. In the first seven months of FY 20-21, the percentage decreased to an average of 12.8 percent of the **offenders in county jail sentenced for a felony**. (Page 50)

➤ OTHER TRENDS

- After increasing from 112,547 in December 2005 to 121,594 in December 2008, the number of offenders on active supervision fell over the next three years to 114,492 in December 2011. The number on active supervision grew in 2012, but then declined for another eight years and was 85,451 on December 31, 2020 (down -15.0% from the prior year). (Page 51)
- The number of offenders with either a life or a death sentence has grown over the last twenty-five years increasing from 4,549 in 1990 to 13,951 in 2020. In 1990, 10.6 percent of inmates were serving a life or death sentence on June 30. In 2020, this percentage increased to 15.9 percent. (Page 52)
- The percent of offenders with sentences for life, death, or within the purview of 10-20-Life, has risen steadily over the years. As of June 30, 2020, 27.1 percent of the prison population was made up of offenders with one of these sentences. (Page 53)
- The prison population on June 30, 2020 was 87,736, a decrease of -8.3 percent from June 30, 2019. (Pages 54 and 56)
- The number of **prison inmates per 100,000 Florida population** fell in FY 19-20 to 406.3. This is the tenth year in a row in which the incarceration rate declined. In the prior 30 years, the incarceration rate had grown from 202.3 (in FY 79-80) to 543.7 (in FY 09-10). This rate had remained relatively flat between FY 94-95 and FY 01-02, but had risen each year between FY 02-03 and FY 09-10. (Pages 54 and 55)
- The **age distribution of prison admissions** has changed significantly since FY 99-00. While the percentage of 18 to 24 year olds has declined, the percentage of those older than 50 has grown steadily. (Page 57)
- The **top five offenses by age group** varied considerably across admissions in FY 19-20, with several top crimes for older age groups connected to prior criminal history. (Page 58)
- The **age distribution of the prison population** has also changed significantly since June 30, 2000. While the percentage of 18 to 24 year olds has declined, the percentage of those older than 50 has grown steadily, with inmates aged 50 to 59 and inmates aged 60+ now making up a greater share of the prison population than 18 to 24 year olds. (Page 59)

Source: Monthly status file of prison population prepared by Bureau of Research and Data Analysis, Department of Corrections. This file contained 89 percent of new commitments, however county of commitment is sometimes missing. According to DOC, offenders entering prison near the end of the month may not have this information available by the time the status file is run at the end of the month. It was assumed that these missing data would not bias the county of commitment distribution. Therefore, these numbers were inflated to match new commitment totals.
