Labor Market Estimating Conference Executive Summary

October 6, 2021

The Labor Market Estimating Conference (LMEC) met on October 6, 2021, and adopted official information pursuant to Chapter 2021-164, Laws of Florida. Florida law tasks the LMEC with the development of detailed supply and demand projections for Florida's statewide, regional and local labor markets. This Conference was the first meeting of the LMEC and focused on a narrow set of targeted products. The test materials provide a flexible starting point for longer-term work by the LMEC.

For this analysis, occupations were limited to the educational attainment levels of High School Completers through Associate's Degree (HS to AD), collectively referred to as the target group. This product represents a partial deliverable in the LMEC series as outlined by Florida law. Upcoming Conferences will include the full array of educational attainment levels, spanning from 'no formal educational credential' to 'Doctoral or professional degree,' to fulfill statutory requirements.

The adopted package analyzes individual occupations and occupational groups within the HS to AD target group for the state and Florida's 24 Workforce Regions. It develops five statistical wage brackets; real-time job openings; and 2024 (3-year), 2026 (5-year), and 2031 (10-year) statewide projections of filled jobs. County-level analysis is not included in this package as data is currently limited at this geography.

The wage brackets classify average annual wages for occupations into five groups for the state and the workforce regions. The first group represents the bracket for 'High' wages (A), followed by 'Medium High' wages (B), 'Medium' wages (C), 'Medium Low' wages (D), and 'Low' wages (E). Wage brackets were developed from statistically relevant natural breaks in the data. The wage bracket calculation was repeated in four scenarios:

- I. Across all occupations for all education levels combined (including those beyond the target group)
- II. By major occupational group for all education levels combined (including those beyond the target group)
- III. Across all occupations for the combined HS-AD education level
- IV. By major occupational group for the combined HS-AD education level

The wage brackets in the four scenarios were calculated for the state and each of Florida's workforce regions to reflect regional differences in average annual wages.

Statewide projections of jobs filled for 2024 (3-year), 2026 (5-year), and 2031 (10-year) were developed using national industry staffing patterns by occupation. The projections are

consistent with the official forecast developed by the Florida Economic Estimating Conference. Projections were not made for the workforce regions for the first conference due to federal suppression and confidentiality rules for regional Florida labor market data.

Real-time job openings were presented from online job data collected by the Burning Glass Technologies Labor Insight tool licensed by the Florida Department of Economic Opportunity (DEO). Real-time openings were displayed at both the statewide and regional level.

The partial product adopted by this Conference is intended to allow users and stakeholders the opportunity to begin reacting to detailed Florida labor market data and the requirements of the new law. The table below outlines a tentative schedule for future products, leading to the completion of the deliverables needed to fulfill Florida law. It is anticipated that the Conference will meet as key milestones are reached or when future products become available, perhaps earlier than indicated below. This will not necessarily align with the regular conference schedule.

Overview of First Meeting Relative to Longer Term Schedule

Conference Deliverables	Status as of October 2021	Future Expectation
Occupations	Limited to Target Group defined as High School Completers to Associate's Degree	Full ArrayJanuary 2022
Supply, Demand and Gap Analysis	Not included in current analysis; only "filled" jobs displayed as projection; the "filled" jobs are consistent with the official forecast developed by the Florida Economic Estimating Conference which is consistent with the population estimates from the Demographic Estimating Conference; in addition: • Typical education level for entry shown; high skill is not • Individual occupations and occupational groups shown • Statistical wage brackets shown • Projections shown at key intervals of time	DemandJanuary 2022 SupplySummer 2022 Gap AnalysisSummer 2022
Labor Markets	Shown at various stages of development: Statewide data fully included Regional data partially included using Florida's Workforce Regions as the geographic metric Local (county) not included	Substate data is largely pending resolution of suppressed (confidential) data issue; strategies include: • Direct federal authorization for EDR • Use of IMPLAN data
Nature of "Official Information"	For this conference, maximum flexibility is incorporated by introducing potential permutations of four comparison groups and five wage brackets for the Target Group	Likely to change over time as needs are further developed and consensus is built among users and other stakeholders

Legend

Wage Brackets (see accompanying Wage Brackets handout for detail):

A = High B = Medium High

C = Medium

D = Medium Low

E = Low

Educational Requirements:

HS = High school diploma or equivalent

PS = Postsecondary nondegree award

SC = Some college, no degree

Baker, Clay, Duval, Nassau, Putnam, St. Johns

Legend:

Wage Brackets (see accompanying Wage Brackets handout for detail):

A = High

B = Medium High C = Medium

D = Medium Low E = Low Educational Requirements:

HS = High school diploma or equivalent

PS = Postsecondary nondegree award

SC = Some college, no degree

Legend

Wage Brackets (see accompanying Wage Brackets handout for detail):

A = High

B = Medium High C = Medium

D = Medium Low

E = Low

Educational Requirements:

HS = High school diploma or equivalent

PS = Postsecondary nondegree award

SC = Some college, no degree

Legend:

Wage Brackets (see accompanying Wage Brackets handout for detail):

A = High

B = Medium High

C = Medium D = Medium Low

E = Low

Educational Requirements:

HS = High school diploma or equivalent

PS = Postsecondary nondegree award

SC = Some college, no degree

Legend:

Wage Brackets (see accompanying Wage Brackets handout for detail):

A = High

B = Medium High

C = Medium D = Medium Low

E = Low

Educational Requirements:

HS = High school diploma or equivalent

PS = Postsecondary nondegree award

SC = Some college, no degree

Legend

Wage Brackets (see accompanying Wage Brackets handout for detail):

A = High B = Medium High

C = Medium

D = Medium Low

E = Low

Educational Requirements:

HS = High school diploma or equivalent

PS = Postsecondary nondegree award

SC = Some college, no degree

Legend:

Wage Brackets (see accompanying Wage Brackets handout for detail):

A = High

B = Medium High

C = Medium D = Medium Low

E = Low

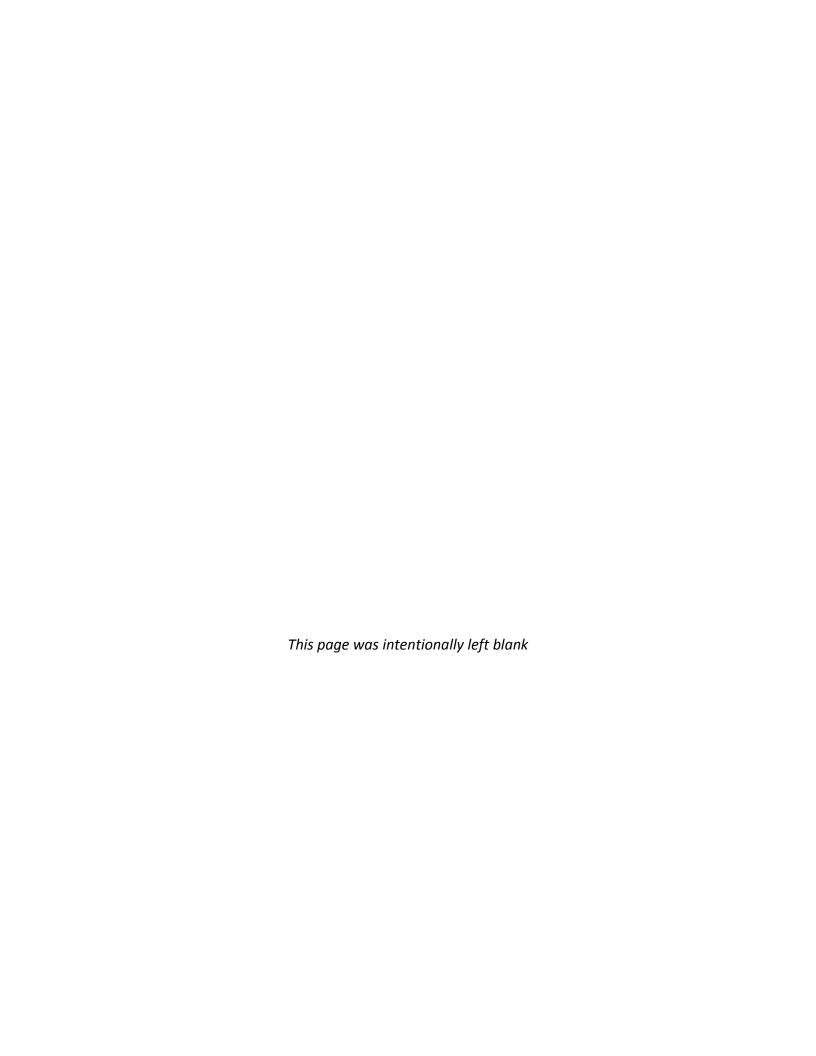

Educational Requirements:

HS = High school diploma or equivalent

PS = Postsecondary nondegree award

SC = Some college, no degree AD = Associate's degree

Recently Occupational Employment Statistics (OES) data have been collected under two different structures to create a "hybrid" structure for the May 2019 and 2020 estimates.

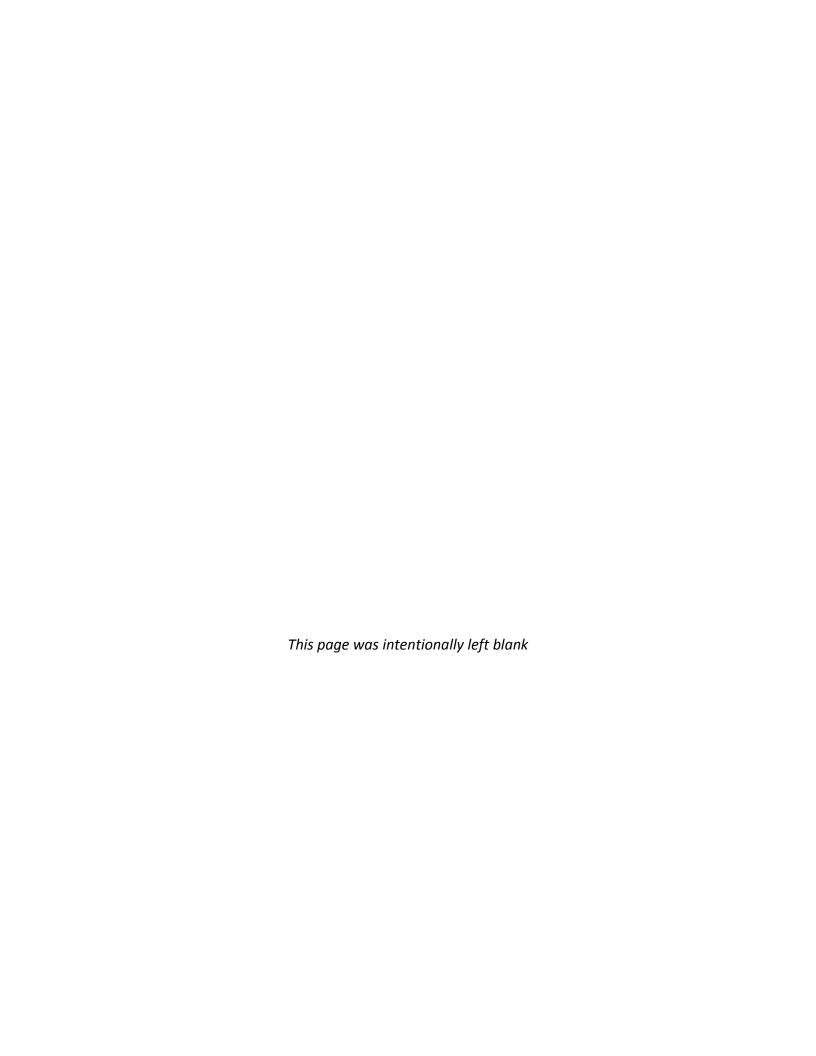

The OES columns show the code and title for occupations that have estimates. (There may be some duplicates for easy presentation.) Please refer to the field descriptions tab for additional information. When the OES font is blue, the code and/or title is the same as a 2018 SOC broad or detailed occupation code or title.

which the obs folk is blue, the code analysis the same as 2015 300 blood of detailed occupation code of thic.

When the OES font is green, the code and title are specific to OES and will be used for the May 2019 and May 2020 OES estimates.

When the OES code and title are shaded, it is presented in the Statewide Labor Market Estimating Conference tables.

Tab 6 Appendix D - Statutory Guidance, Methodology and Sources

Appendix D

Statutory Guidance

CS/CS/CS for HB 1507, F.S. (Chapter 2021-164, Laws of Florida) amended s. 216.136, F.S. and transformed the Workforce Estimating Conference into the Labor Market Estimating Conference (LMEC). Section 216.136(7), F.S. reads as follows:

LABOR MARKET ESTIMATING CONFERENCE.—

- (a) The Labor Market Estimating Conference shall develop such official information with respect to real-time supply and demand in Florida's statewide, regional, and local labor markets as the conference determines is needed by the state planning and budgeting system. Such information shall include labor supply by education level, analyses of labor demand by occupational groups and occupations compared to labor supply, a ranking of critical areas of concern, and identification of indemand, high-skill, middle-level to high-level wage occupations prioritized by level of statewide or regional shortages. The Office of Economic and Demographic Research is designated as the official lead for the United States Census Bureau's State Data Center Program or its successor. All state agencies must provide the Office of Economic and Demographic Research with the necessary data to accomplish the goals of the conference. In accordance with s. 216.135, state agencies must ensure that any related work product regarding labor demand and supply is consistent with the official information developed by the Labor Market Estimating Conference created in s. 216.136.
- (b) The Labor Market Estimating Conference, for the purposes described in paragraph (a), shall meet at least twice a year and as necessary to address emerging opportunities for the state's economy.

In addition, Chapter 2021-164, Laws of Florida envisions consistency with Labor Market Estimating Conference (LMEC) outputs and use by the following programs and/or offices:

- Office of Reimagining Education and Career Help
- The Credentials Review Committee
- One-stop delivery system
- Florida Career and Professional Education Act
 - Strategies in a 3-year plan to develop and implement career academies or career themed courses based on LMEC identified occupations
- Florida Talent Development Council
- Workforce education; management information system
- State Board of Education
- Board of Governors of the State University System
- Florida College System
- Money-back Guarantee Program

Methodology

This LMEC analysis provides information for a targeted educational group, High School Completers to Associate's Degrees, as it lays the foundation for future implementation of the full scope of the law.

Florida's Legislative Office of Economic and Demographic Research (EDR) worked with the Department of Economic Opportunity (DEO), Bureau of Workforce Statistics and Economic Research (WSER) to identify the most complete sources of data to utilize for the analysis of current occupational employment, wages, real-time openings, and projected employment for the Labor Market Estimating Conference.

Concepts

Occupational Classification

Jobs are classified into occupations and occupational groups using the Standard Occupational Classification (SOC) system. Each occupation has a SOC code and a SOC title.

Occupational Wages

The unit of analysis is the average annual wage for each SOC from the Occupational Employment and Wages Survey. While other measures of wages, such as hourly and median, exist in the data, the average annual wage was used in this analysis.

Occupational Employment

Employment by occupation shows the number of jobs in each SOC. Employment is rounded to the nearest 10. Employment of less than 10 is rounded down to zero. Employment (or jobs) is different from persons as one person may have many jobs.

Percent of "area" Employment

The percent of employment is represented by each occupation relative to the total employment for an area. Total employment is the total employment across all occupations statewide or in the Workforce Region (WFR), including any suppressed employment counts.

Education Requirement for Entry into the Occupation

The Bureau of Labor Statistics education requirement levels represent the typical formal education level most workers need to enter an occupation. The eight categories are:

- Doctoral or professional degree
- Master's degree
- Bachelor's degree
- Associate's degree
- Postsecondary nondegree award
- Some college, no degree
- High school diploma or equivalent
- No formal educational credential

The US Department of Labor, Bureau of Labor Statistics (BLS) framework also details work experience in a related occupation and typical on-the-job training needed to attain competency in the occupation. These additional training parameters are not currently used.

The BLS educational assignment differs from the Florida Department of Education educational assignment, which is currently used by the workforce system. Occupations may require a lower

educational requirement in the BLS system than in the Florida system or vice versa. For example, a Bachelor's degree is required to become a registered nurse according to the national assignment, while an Associate's degree is sufficient to enter the occupation according to the FLDOE assignment.

SOCs with educational requirements of high school diploma or equivalent, postsecondary nondegree award, some college, no degree, or associate's degree are considered the target group for this conference. They are listed in the tables for the October 2021 conference.

Wage Brackets

Annual Average Wage Brackets:

The approach was to classify occupational wages into five groups. There are several classification methods that are commonly used to group data: natural break, equal interval, quantile (equal count), and statistical (using standard deviations) methods. The objective was to group wages into five clusters based on natural breaks in the data. This process creates noncontinuous (discontinuous) groupings, as the minimum and maximum of the ranges reflect the available data values.

The wage clusters were created utilizing a statistical procedure in SAS, a statistical analysis software package. The endpoints of each cluster form a wage bracket. The FASTCLUS procedure performs a disjoint cluster analysis on the basis of distances computed from one or more quantitative variables. The observations are divided into clusters such that every observation belongs to one and only one cluster; the clusters do not form a tree structure. By default, the FASTCLUS procedure uses Euclidean distances, so the cluster centers are based on least squares estimation. This kind of clustering method is often called a k-means model, since the cluster centers are the means of the observations assigned to each cluster when the algorithm is run to complete convergence. Each iteration reduces the least squares criterion until convergence is achieved.

Wages were grouped into five clusters. All wage ranges were labelled as follows:

A = High

B = Medium High

C = Medium

D = Medium Low

E = Low

The state and regions wage brackets were developed in the same manner. Four scenarios of the wage brackets were generated based on the distribution of occupational wage data for the state and each region. The values of the wage brackets for each of the four scenarios per region may differ. A "high" wage cluster and wage brackets relative to all occupations has a different range from a high wage compared to high school completers to Associate's degree. All scenarios may not have enough occupational wages to create five clusters. If fewer than five observations are grouped, the naming of the groups start with A (high), but there may not be a B, C, D or E cluster. The uniqueness of occupational wages for each region and each occupational group necessitated the development of lookup wage bracket tables for each geography.

The four scenarios of the clustering and wage brackets for each geography were:

I - Relative to All "area" Occupations:

Wage brackets were developed based on all occupational wages by geography.

II - Relative to "area" Occupations by Occupational Group:

Wage brackets were developed based on all occupational wages within each of the 22 occupational groups by geography.

III - Relative to Selected Education Target Occupations by "area" (High School Completers to Associate's degree):

Wage brackets were developed based on the wages for all occupations that require a high school degree to Associate's degree by geography.

IV - Relative to Selected Education Target Occupations by Occupational Group by "area" (High School Completers to Associate's degree):

Wage brackets were developed based on the wages for occupations that require a high school degree to Associate's degree within each of the 22 occupational groups by geography.

Wage Brackets Look-up Tables Example

Data presented in the Wage Bracket tables are for occupations that require a high school diploma or equivalent; postsecondary nondegree award; some college, no degree; or Associate's degree. In addition, two occupations, Commercial Pilots and Air Traffic Controllers, were omitted from the development of the statewide and regional wage brackets for the HS Completers to AA because they were identified as outliers at the statewide level. If occupational data are available, these occupations are displayed at the beginning of each summary table, shaded in blue. These two occupations were included in the clustering procedure for wage brackets I and II.

The data shown in the wage bracket tables are for the target occupations only (high school completers to Associate's degree). The wage brackets shown in tables I and II were created using all occupations, while the wage brackets displayed in tables III and IV were created using the target occupations.

For example, there are three occupations in major group *Legal Occupations* with the target education requirements. They fall in range D (\$47,560 to \$73,220) in Appendix A - Statewide Table I, created across all occupations regardless of educational requirement. These same three legal occupations fall in range E (\$51,350 to \$57,960) in Table II, created by major occupational group regardless of educational requirement. The minimum wage for the bracket is from an occupation that was used in the creation of the wage bracket, but is not displayed in Tables I-IV. The three occupations are in range D (\$39,200 to \$52,250) in Statewide Table III, created for all occupations with the target educational level. When these same three occupations are displayed in Statewide Table IV (target occupational level by major occupational group), the ranges are based only on these three occupations because they are the only three occupations in major occupational group *Legal Occupations* that meet the target educational level. The total range in Table IV is from \$52,100 to \$57,960.

From Table II

23-0000	Legal Occupations	Α

Real-time Openings (recent)

The summary data in the tables represent an average of the past 12 months of online job announcements for job postings in Florida. The online job ad data was retrieved using the Burning Glass Technologies Labor Insight tool. Burning Glass collects these data daily using their proprietary technology to scan the Internet for job postings on online job boards, corporate websites, and other places where job ads are posted. From each advertisement, Burning Glass extracts information about the job such as title, occupation, employer, and location. These data are limited to advertisements posted on the Internet and do not include job openings advertised through other means.

Job announcement data were retrieved for the state and each of Florida's 24 workforce regions. The retrieval criteria limited the results to represent the top 500 occupations by area. For some workforce regions, job ads were not available for 500 occupations. In addition, the following rules were used for presentation of the data by SOC:

- If an occupation had postings for 10 or more months during this time period, then an average was calculated based on the number of months of available data;
- If an occupation had postings for 1 to 9 months during the past 12 months, then the resultant was "minimal";
- If an occupation had no postings over the past 12 months, but there was posting activity since January 2020, then the resultant was 0;
- If an occupation may have had job postings over the past 12 months, but they were outside of the top 500, then the resultant was "n/a"; and
- If there were no job postings for an occupation since January 2020, then the resultant was "n/a".

Projection of Filled Jobs Statewide:

Occupational Employment by Industry

Occupational employment by industry constitutes a staffing pattern for an industry. It shows how many jobs from each relevant occupation exist in a given industry. The total employment for an occupation is a sum of the jobs in that occupation across all industries. The national staffing pattern, or occupational employment by industry matrix, was used in this analysis. While a Florida staffing pattern is published as a research file by the BLS, it is currently not used due to data suppression.

Nonfarm employment by 2-digit industry sector code is projected by the Florida Economic Estimating Conference (FEEC) for a period of 10 years. This analysis used the FEEC employment projections for calendar years 2024 (3-year), 2026 (5- year) and 2031 (10-year). The national staffing pattern by 2-digit industry from the BLS was applied to each 2-digit industry employment projection to populate the various occupations present in the industry. The sum of the number of jobs in the occupation across all industries produced the occupational projection.

The occupational projections attempt to measure the number of filled jobs (stock measure). They assume that the number of jobs in an occupation or the types of occupations needed in an industry will

not change over time. The projections do not currently attempt to measure the flow of employment in and out of an occupation or retirement from an occupation. The projections assume that the staffing pattern remains constant over the forecast period. While occupational changes may be slow to occur, they do happen and it is important to capture such changes. The BLS industry-to-occupational matrix may not initially identify emerging occupations.

The FEEC does not produce data below the statewide level. Industry projections of employment at the WFR level were not available for this analysis.

Estimation for Missing Observations

Estimation for missing observations at the state level

Some wage and employment data are not released due to confidentiality rules developed by the US Bureau of Labor Statistics. Some SOC codes have available wage data but employment is confidential, and some SOC codes have available employment but wage data are confidential. In addition, some SOC codes are entirely omitted from the tables published by BLS due to confidential employment and wages.

There are 789 civilian SOCs in the May 2020 national OEWS data. At the state level, there are 772 publishable SOCs. In addition, there are 17 entirely suppressed unpublishable SOCs, as neither employment nor wages are available for publication, accounting for 2% of SOC counts and 0.02% of statewide employment. These 17 SOCs were not included in the analysis. EDR developed a methodology to fill in missing wages or employment when only one is available and the other is not.

Missing Wages

Missing annual average wages for 11 occupations at the state level were substituted with annual wages of the closest related occupation based on O*NET scores ranging from 1 (best match) to 10. O*NET data identifies closely related occupations based on similar skills, experience, and educational requirements. O*NET was used to identify occupations for replacement wages, under the assumption that a skills-based index provides a closer approximation of annual average wage for the missing occupation in Florida. In this way, Florida wages were substituted instead of national occupational wages or wages for a given occupation from a neighboring state. In addition, wages for three occupations were suppressed by BLS since the reported wage was equal to or greater than \$208,000 per year. The wages for these occupations were replaced with \$208,000.

Missing Employment

Missing employment for 29 occupations at the state level was filled in with employment estimates available from IMPLAN. IMPLAN also sources its occupational employment data from the US Bureau of Labor Statistics. However, IMPLAN has developed a methodology to generate non-disclosed (suppressed) values [by BLS] for employment by occupation at the statewide and county level using a national set of ratios, by IMPLAN industry, that detail what share of employment and wages each occupational code receives.

Estimation for missing observations at the Workforce Region level

Workforce regions generally had more suppressed SOCs and more missing data (employment or wages). CareerSource Central Florida (WFR 12) had the lowest suppression rate with 14% of SOC codes (accounting for 0.5% of employment) suppressed. CareerSource Florida Crown (WFR 7) had the highest suppression rate with 55% of SOCs suppressed (accounting for 15% of employment).

Missing Wages

Missing annual average wages at the workforce region were filled in with the statewide average annual wage, regionalized by applying the respective workforce region Regional Price Parity index to the statewide wage. RPP index values for the state and MSAs are expressed relative to the national average. The RPPs for MSAs and nonmetro areas in Florida were reindexed to the statewide value as the base (=100). Each Workforce Region was crosswalked to an MSA that best approximates the WFR's county composition. Each WFR was assigned the rebased RPP index value of the respective MSA. The RPPs were then used to adjust the statewide wage to the respective WFR price level to fill in the missing regional occupational wages.

Missing Employment

Missing employment at the WFR level was filled in from IMPLAN data, following the process used for the statewide missing data and controlling for total regional employment.

The following table shows the number of missing occupations that were filled in by Region due to missing wages and/or employment.

	soc o	Counts
Workforce	With Missing	With Missing
Region	Employment	Annual Wage

Industry Taxonomy – Codes and Titles

US Census Bureau, The North American Industry Classification System (NAICS) (https://www.census.gov/naics/).

The North American Industry Classification System (NAICS) is the standard used by federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. The 2017 edition is the most recent edition of the NAICS.

NAICS is a 2- through 6-digit hierarchical classification system, offering five levels of detail. Each digit in the code is part of a series of progressively narrower categories, and the more digits in the code signify greater classification detail. The first two digits designate the economic sector, the third digit designates the subsector, the fourth digit designates the industry group, the fifth digit designates the NAICS industry, and the sixth digit designates the national industry. This analysis focuses on 19 industry sectors.

Occupational Taxonomy - Codes and Titles

Occupational codes and titles are from the US Department of Labor, Bureau of Labor Statistics, 2018 Standard Occupational Classification system and the National Employment Matrix Occupational Coverage, BLS Office of Occupational Statistics and Employment Projections (https://www.bls.gov/soc/home.htm).

The 2018 Standard Occupational Classification (SOC) system is a federal statistical standard used by federal agencies to classify workers into occupational categories for the purpose of collecting, calculating, or disseminating data. All workers are classified into one of 867 detailed occupations according to their occupational definition. To facilitate classification, detailed occupations are combined to form 459 broad occupations, 98 minor groups, and 23 major groups. Detailed occupations in the SOC with similar job duties, and in some cases skills, education, and/or training, are grouped together. This analysis focuses on the 22 civilian occupational groups and excludes military occupations (major group 55).

The Occupational Employment and Wages Statistics (OEWS) program is currently using a hybrid classification system as it transitions from the 2010 to the 2018 Standard Occupational Classification (SOC) system. To reflect changes in the economy and the nature of work, the SOC is revised on a 10-year cycle, following a NAICS revision. A listing of the 2018 SOC and the hybrid codes can be found in Appendix C.

Annual Average Wages and Employment by Occupation

Statewide: State Occupational Employment and Wage Estimates, US Bureau of Labor Statistics,

https://www.bls.gov/oes/current/oes fl.htm

Current data release: May 2020 data, released March 2021.

Workforce Regions: Workforce Region Occupational Employment and Wage Estimates, special tabulation produced by the Department of Economic Opportunity, Occupational Employment and Wage Estimates Program, in cooperation with the US Bureau of Labor Statistics.

Current data release: May 2020 data, released March 2021.

The Occupational Employment and Wage Statistics (OEWS) survey is a national semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. It is the most detailed public source of occupational data available in terms of both occupational and geographic nomenclature. OEWS estimates are constructed from a sample of about 1.1 million national establishments. Each year, two semiannual panels of approximately 180,000 to 185,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2020 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2020, November 2019, May 2019, November 2018, May 2018, and November 2017. The unweighted sampled employment of 83 million across all six semiannual panels represents approximately 56 percent of total national employment. In Florida, the OEWS survey draws its sample from state Reemployment Assistance (unemployment insurance) files. This analysis excludes the selfemployed since they are not subject to the Reemployment Assistance tax and the OEWS does not collect data on them. The Florida sample for OEWS is slightly less than 11,000 units (establishments) per survey panel and approximately 66,000 total units over the six panels comprising the data used to publish the annual release.

Wages for the OEWS survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements.

In order to combine the panels, wage data collected over the span of the three years is updated to the current panel's reference period using the BLS Employment Cost Index (ECI). Wages for the current panel need no adjustment. The wage updating procedure adjusts each detailed occupation's wage rate, as measured in the earlier panel, according to the average movement of its broader occupational division. For more information on the methodology, please visit https://www.bls.gov/oes/current/oes_tec.htm.

Wages presented in the tables and used for analysis were rounded to the nearest 10.

Employment by Occupation by Industry Sector (Staffing Pattern)

Employment Estimates from IMPLAN

IMPLAN (www.implan.com) is a proprietary economic modeling platform that combines a set of extensive databases, economic factors, multipliers, and demographic statistics with a highly refined modeling system. IMPLAN is based on the input-output economic model. Input-output analysis is a form of economic analysis based on the interdependencies between economic sectors. Input-output is commonly used to estimate the impacts of "shocks" to an economy and to analyze their resulting ripple effects. IMPLAN data contains 546 sectors representing all private industries in the United States as defined by the North American Industry Classification System (NAICS) codes. Employment, employee compensation, industry expenditures, commodity demands, relationships between industries, and more are collected to form IMPLAN's ever-growing database.

Regional Price Levels from Regional Price Parities

Regional Price Parities are available from the US Department of Commerce, Bureau of Economic Analysis for the State, Metropolitan Statistical Area (MSAs) and nonmetropolitan Areas (https://www.bea.gov/data/prices-inflation/regional-price-parities-state-and-metro-area)

Regional Price Parities measure the differences in price levels across states and metropolitan areas for a

Regional Price Parities measure the differences in price levels across states and metropolitan areas for a given year. RPPs allow comparisons of buying power across the 50 states and the District of Columbia, or from one metro area to another, for a given year

Education Requirement for entry into the occupation

Variable	Description	Data Source
AREA	U.S. (99), state FIPS code, Metropolitan Statistical Area (MSA) or New England City and Town Area (NECTA) code, or OEWS-specific nonmetropolitan area code	BLS
AREA TITLE	Area name	BLS
major	Major occupational group code (first 2 digits of 6-digit SOC code).	EDR
OCC CODE	The 6-digit Standard Occupational Classification (SOC) code or OEWS-specific code for the occupation	BLS
OCC TITLE	SOC title or OEWS-specific title for the occupation	BLS
O_GROUP	SOC occupation level. For most occupations, this field indicates the standard SOC major, minor, broad, and detailed levels, in addition to all-occupations totals. For occupations that OEWS no longer publishes at the SOC detailed level, the "detailed" designation indicates the most detailed data available: either a standard SOC broad occupation or an OEWS-specific combination of detailed occupations. Occupations that OEWS has aggregated to the SOC broad occupation level will appear in the file twice, once with the "broad" and once with the "detailed" designation.	BLS
TOT_EMP	Estimated total employment rounded to the nearest 10 (excludes self-employed).	BLS
A_MEAN	Mean annual wage	BLS
Edu_Ttl_BLS	2020 National Employment Matrix title, Typical education needed for entry, Table 5.4 Education and training assignments by detailed occupation, 2020, 2020-2030 Employment Projections, US Bureau of Labor Statistics, Employment Projections program.	BLS
Edu_code_BLS	2020 National Employment Matrix code, Typical education needed for entry, Table 5.4 Education and training assignments by detailed occupation, 2020, 2020-2030 Employment Projections, US Bureau of Labor Statistics, Employment Projections program.	BLS
max_alledu	Wage bracket I maximum annual average wage, All Occupations, All Educational Levels.	EDR
min_alledu	Wage bracket I minimum annual average wage, All Occupations, All Educational Levels.	EDR
Rank_alledu_lt	Letter code for Wage Bracket I - Relative to All Occupations, All Educational Levels.	EDR
max_g_alledu	Global maximum annual average wage, All Occupations, All Educational Levels.	EDR
min_g_alledu	Global minimum annual average wage, All Occupations, All Educational Levels.	EDR
max_mj_alledu	Wage bracket II maximum annual average wage, All Occupations, All Educational Levels, by major occupational group.	EDR
min_mj_alledu	Wage bracket II minimum annual average wage, All Occupations, All Educational Levels, by major occupational group	EDR
Rank_mj_alledu_lt	Letter code for Wage Bracket II - Relative to All Occupations by Major Occupational Group, All Educational Levels.	EDR
max_g_mj_alledu	Global maximum annual average wage, All Occupations, All Educational Levels, by major occupational group.	EDR
min_g_mj_alledu	Global minimum annual average wage, All Occupations, All Educational Levels, by major occupational group.	EDR
max_hsad	Wage bracket III maximum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
min_hsad	Wage bracket III minimum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
Rank_hsad_lt	Letter code for Wage Bracket III - Relative to All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
max_g_hsad	Global maximum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
min_g_hsad	Global minimum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
max_mj_hsad	Wage bracket IV maximum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD), by major occupational group.	EDR
min_mj_hsad	Wage bracket IV minimum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD), by major occupational group.	EDR
Rank_mj_hsad_lt	Letter code for Wage Bracket IV - Relative to All Occupations, High School to Associate's Degree Educational Levels, by Major Occupational Group.	EDR
max_g_mj_hsad	Global maximum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD), by major occupational group.	EDR
min_g_mj_hsad	Global minimum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD), by major occupational group.	EDR
Real_Time_Openings	Real-time job openings from Labor Insight Labor Tool, queried by Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research under license from Burning Glass Technologies.	DEO
2024CY	Occupational projections for the calendar year consistent with the FEEC.	EDR
2026CY	Occupational projections for the calendar year consistent with the FEEC.	EDR
2031CY	Occupational projections for the calendar year consistent with the FEEC.	EDR
Notes	Notes on outliers excluded in wage brackets III and IV.	EDR

Variable	Description	Data Source
AREA	Workforce region number	BLS
AREA_TITLE	Workforce region name	BLS
major	Major occupational group code (first 2 digits of 6-digit SOC code).	EDR
OCC_CODE	The 6-digit Standard Occupational Classification (SOC) code or OEWS-specific code for the occupation	BLS
OCC_TITLE	SOC title or OEWS-specific title for the occupation	BLS
O_GROUP	SOC occupation level. For most occupations, this field indicates the standard SOC major, minor, broad, and detailed levels, in addition to all-occupations totals. For occupations that OEWS no longer publishes at the SOC detailed level, the "detailed" designation indicates the most detailed data available: either a standard SOC broad occupation or an OEWS-specific combination of detailed occupations. Occupations that OEWS has aggregated to the SOC broad occupation level will appear in the file twice, once with the "broad" and once with the "detailed" designation.	BLS
TOT_EMP	Estimated total employment rounded to the nearest 10 (excludes self-employed).	BLS
A_MEAN	Mean annual wage	BLS
Edu_Ttl_BLS	2020 National Employment Matrix title, Typical education needed for entry, Table 5.4 Education and training assignments by detailed occupation, 2020, 2020-2030 Employment Projections, US Bureau of Labor Statistics, Employment Projections program.	BLS
Edu_code_BLS	2020 National Employment Matrix code, Typical education needed for entry, Table 5.4 Education and training assignments by detailed occupation, 2020, 2020-2030 Employment Projections, US Bureau of Labor Statistics, Employment Projections program.	BLS
max_alledu	Wage bracket I maximum annual average wage, All Occupations, All Educational Levels.	EDR
min_alledu	Wage bracket I minimum annual average wage, All Occupations, All Educational Levels.	EDR
Rank_alledu_lt	Letter code for Wage Bracket I - Relative to All Occupations, All Educational Levels.	EDR
max_mj_alledu	Wage bracket II maximum annual average wage, All Occupations, All Educational Levels, by major occupational group.	EDR
min_mj_alledu	Wage bracket II minimum annual average wage, All Occupations, All Educational Levels, by major occupational group	EDR
Rank_mj_alledu_lt	Letter code for Wage Bracket II - Relative to All Occupations by Major Occupational Group, All Educational Levels.	EDR
max_hsad	Wage bracket III maximum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
minhsad	Wage bracket III minimum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
Rank_hsad_lt	Letter code for Wage Bracket III - Relative to All Occupations, High School to Associate's Degree Educational Levels (HS-AD).	EDR
max_mj_hsad	Wage bracket IV maximum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD), by major occupational group.	EDR
min_mj_hsad	Wage bracket IV minimum annual average wage, All Occupations, High School to Associate's Degree Educational Levels (HS-AD), by major occupational group.	EDR
Rank_mj_hsad_lt	Letter code for Wage Bracket IV - Relative to All Occupations, High School to Associate's Degree Educational Levels, by Major Occupational Group.	EDR
Real_Time_Openings	Real-time job openings from Labor Insight Labor Tool, queried by Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research under license from Burning Glass Technologies.	DEO
Notes	Notes on outliers excluded in wage brackets III and IV at the statewide level and in each WFR.	EDR
