Revenue Estimating Conference Lottery Sales April 9, 2008 Executive Summary

The Revenue Estimating Conference met concerning Lottery revenues on April 9, 2008. The conference reduced expected distributions to the Educational Enhancement Trust Fund (EETF) from current projections by \$46.9 million in 2007-08, \$79.0 million in 2008-09, and \$79.5 million in 2009-10. These figures translate into growth rates of 1.2% in 2007-08, 3.2% in 2008-09, and 2.0% in 2009-10. Distributions are then expected to increase by 2.0% in 2010-11, and 1.8% in 2011-12. The modifications to the forecast were made due to the fact that ticket sales have been running behind forecast since the last conference was held. In general pressure is being placed on the discretionary spending dollar of consumers in the current economic environment with weak disposable income growth and high and increasing gasoline prices. Additionally, the impact of game enhancements is being reduced due to the fact that multiple changes were introduced at approximately the same time, in the current unfavorable economic environment.

At the last conference it was anticipated that scratch-off ticket sales would be significantly impacted in a positive manner by the introduction of a \$30 game. At this time, it appears that total sales were not significantly impacted by this game, with sales of \$20 tickets falling by about the same amount as the \$30 game has sold. Additionally it appears that the underlying trend in scratch-off sales is lower than anticipated. As a result, the conference cut the estimate for scratch-off game sales by \$109.0 million in 2007-08, \$196.0 million in 2008-09, and \$195.6 million in 2009-10.

The Lotto forecast was also increased significantly in February due to the introduction of a new play option for Lotto. The new play option has not generated the expected level of sales, and the conference as a result cut the Lotto estimate by \$65.9 million in 2007-08, \$79.3 million in 2008-09, and \$81.7 million in 2009-10.

In February the conference expected that the introduction of mid-day play options for Cash 3 and Play 4 would impact sales by \$8.7 million in 2007-08, \$52.8 million in 2008-09, and \$54.0 million in 2009-10. As a result of the current economic situation and the experience with the enhancements to other games, the conference cut the estimated impact of these enhancements by 25%, resulting in a reduction in sales of \$2.2 million in 2007-08, \$13.2 million in 2008-09, and \$13.5 million in 2009-10.

No changes were made to the forecasts for Fantasy 5, Mega Money, or Millionaire Raffle.
