## FLORIDA MONTHLY ECONOMIC REPORT

## AUGUST 1997 - VOLUME 18, NO. 2

Office of Economic and Demographic Research

## GENERAL REVENUE COLLECTIONS FOR JULY

Preliminary General Revenue (GR) collections for July were \$55.3 M over estimate for the new fiscal year. PRELIMINARY Sales Tax Collections were \$18.8 M over estimate for the month and year-to-date. (Sales Tax Collections are net of \$1.0 M in transfers to qualified sports facilities.) The Corporate Income Tax was right on target at \$1.1 M over estimate for the month, continuing its strong showing from the prior fiscal year.

General Revenue Collections	Lottery Transfers to DOE
Month: \$55.3 M over the March 1997 estimate adjusted for law changes	Month: \$62.0M or \$.6 M under the Feb. 1997 estimate
Year: \$55.3 M over the March 1997 estimate adjusted for law changes	Year: \$792.3 M or \$9.9 M over the Feb. 1997 estimate
	\$21.8 M under the February 1996 estimate

Documentary Stamp Tax total collections were over estimate by \$3.9 M for the year. No distributions are made to GR in July, as distributions to the various trust fund accounts (including Preservation 2000) are front-loaded. Estate Taxes produced \$24.4 M over estimate this month; this source has no real monthly pattern, and overages of this magnitude should be considered one-time events. Intangibles Taxes also produced more GR than expected, due to the timing of receipts to this source. Recall that Intangibles Taxes collections were UNDER ESTIMATE at the end of the fiscal year in June by \$41.7 M; July collections were OVER ESTIMATE by \$48.6 M. Clearly, some money expected in last fiscal year lapped the year and appeared this month. Consequently, the GR distribution from Intangibles, which is based on the total collections, was over estimate for the month by \$15.0 M.

The only source significantly under estimate was Service Charges, which are transfers to GR from a variety of trust funds. Timing of these transfers is probably to blame for the \$10.4 M shortfall. Most other sources, including Refunds, were close to estimates for the month.

Overall, preliminary net GR collections for July are \$55.3 M over estimate for the month. Estimates in the table below are based on the March 14, 1997 General Revenue Estimating Conference adjusted for law changes made during the 1997 regular legislative session.

<u>Florida Demographic Data</u>- A new demographic forecast for the state and counties is now available. Demographic estimates are published annually by the division in book form. The data are also available on our Internet website at the address printed on our masthead. Data includes population estimates by age, race, and sex by county for 1998, total population by county from 1981 through 2010, and state population by age, race, and sex for 1980 through 2010.

Florida's age distribution on April 1, 2010 will reflect the continuation of an aging trend of the population. In 1980, there were 1,687,573 Floridians aged 65 and older (17.3 percent of the total population). The 1990 census enumerated 2,355,926 elderly (18.2 percent of total) and by April 1, 2010, this age group will number 3,366,377 and constitute 18.9 percent of the total population. These changes represent increases of 39.6 percent between 1980 and 1990, 20.4 percent between 1990 and 2000, and 18.7 percent between 2000 and 2010. The population aged 85 and older was one of the fastest growing age segments during the 1980's, increasing by 75.1 percent. This group is expected to increase by more than half again during the last decade of this century and number 326,527 by April 1, 2000. High rates of growth will continue for this age group through the first decade of the next century with the age 85 and older population projected at 466,835 by 2010. This demographic change is dramatically highlighted in the population pyramid charts.

TOTAL	1,837,883	2,956,881	3,191,602	2,490,947	2,407,504

In contrast, the youth population (ages 0-19) will continue to increase in size, but not as rapidly as the elderly population. It will grow about as fast as overall population, thereby becoming a more stable segment than in recent history. In 1980, persons aged 0 to 19 numbered 2,688,114, making up 27.6 percent of the total population. In 1990, there were 3,232,455 persons in this age group (25.0 percent of the population). In 2000 there will be 3,861,093 persons age 19 and younger, representing 25.2 percent of the total and in 2010, this age group will number 4,156,393 and represent 23.3 percent of the total state population. A major concern will be the slow growth among those in the prime labor force age group (ages 25-59). This group increased by 1.8 million persons during the 1980's (51.3 percent) to reach a level of 5.8 million on April 1, 1990. In the future, the proportion of the total population this group represents is expected to begin falling, declining modestly from 46.1 percent of the population in 2000 to 44.9 percent by 2010 with more rapid declines after 2010.
