# Review of Federal Funding to Florida in Fiscal Year 2005 

## December 2007

Florida
Legislative Committee on Intergovernmental Relations

## Florida Legislative Committee on Intergovernmental Relations

(As of November 2007)

## Legislative Members

Senator Anthony Hill, Sr., Chair
District 1
Representative Faye Culp, Vice Chair
District 57
Senator Alex Diaz de la Portilla
District 36
Representative Ed Hooper
District 50
Senator Steve Oelrich
District 14
Representative Juan-Carlos Planas
District 115
Senator Gary Siplin
District 19
Representative James Waldman
District 95

## Gubernatorial Appointees

Joanna Cunningham
Northern Palm Beach County Improvement District
Sue Hershey
Martin County School Board
Kelly Layman
Department of Environmental Protection
Councilman Herbert Polson
City of St. Petersburg
Lisa Saliba
Governor's Office of Policy and Budget
Commissioner Cynthia Stevenson
Saint Johns County Commission
Commissioner Robert Stewart
Pinellas County Commission

Alton L. "Rip" Colvin, Jr. - Executive Director

## What is the LCIR?

The Florida Legislative Committee on Intergovernmental Relations (LCIR) is a legislative entity that facilitates the development of intergovernmental policies and practices. The Florida LCIR strives to improve coordination and cooperation among state agencies, local governments, and the federal government.

## What Issues Have Been Addressed by the LCIR?

The LCIR completes several publications annually, including the Local Government Financial Information Handbook, Finalized Salaries of County Constitutional Officers and Elected School District Officials, and Intergovernmental Impact Report (Mandates and Measures Affecting Local Government Fiscal Capacity). In addition, the LCIR has addressed the following issues:

| o | Municipal Incorporations and Annexation | o | State, Regional, and Local Planning |
| :--- | :--- | :--- | :--- |
| o | Impact Fees | o | Voting by Mail |
| o | Natural Disaster Preparedness, Response and Recovery | o | Economic Development |
| o | Local Government Financial Emergencies | o | Affordable Housing |
| o | Urban Infill \& Infrastructure Capacity | o | Federal Funds to Florida |
| o | Marina and Dock Permitting | o | Federal/State Relations |

If you would like additional copies of this report or if you have comments or questions pertaining to the information contained herein, please contact the LCIR at (850) 488-9627 or Suncom 278-9627. We welcome your input or suggestions. Our mailing address is:

Florida LCIR

## Executive Summary

The purpose of this report is to provide the Florida Legislature and other interested parties with a review and analysis of federal funding to Florida in fiscal year 2005 using data produced by the U.S. Bureau of the Census. In particular, this report focuses on federal grant expenditures to Florida's state and local governments. Florida's historically low per capita ranking among the states in the receipt of federal grants has been an area of particular concern to policymakers.

This report should be useful for making statistical comparisons among states of various federal agencies’ funding programs. Additionally, the report should be instructive to decision makers working to develop consensus on priorities and strategies for increasing the state's receipt of federal grants.

This report begins with a review of the two major classifications of federal financial assistance provided to states. These two classifications are: 1) federal direct expenditures and 2) other financial assistance.

## Federal Direct Expenditures to Florida

Federal direct expenditures constitute actual funding outlays or obligations of the federal government. These expenditures are reported by the U.S. Bureau of the Census in five categories: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries \& wages.

In 2005, federal direct expenditures to Florida totaled $\$ 135$ billion or $\$ 7,572$ per capita, based on the state's 2005 population estimate of 17.8 million. Florida had the $4^{\text {th }}$ largest expenditure of all states. However, on a per capita basis, Florida ranked $23^{\text {rd }}$ among the states.

Direct payments for individuals for retirement and disability constituted the largest category of federal direct expenditure. This category includes Social Security payments, federal retirement and disability payments, and veterans' benefits. Florida’s direct payments for retirement and disability totaled $\$ 50.5$ billion, or $\$ 2,841$ per capita, and accounted for 38 percent of the state's total federal direct expenditures. Florida had the $2^{\text {nd }}$ largest expenditure total of the fifty states and ranked $5^{\text {th }}$ on a per capita basis.

Considering Florida's large elderly and retiree populations, these rankings should come as no surprise. Based on Census 2000 counts, Florida's elderly population, defined as age 65 years and over, totaled 2.8 million and accounted for 8 percent of the nation's total elderly population of 35 million. In Florida, the elderly constituted nearly 18 percent of the state's total population. The elderly, as a percentage of the total state population, was higher in Florida than in any other state.

The next largest category of federal direct expenditure was direct payments for individuals other than for retirement and disability. This category includes such items as Medicare benefits, Excess Earned Income Tax Credits, Unemployment Compensation,
and Food Stamp payments. Florida’s other direct payments totaled $\$ 36.6$ billion, or $\$ 2,057$ per capita, and accounted for 27 percent of the state's total federal direct expenditures. Florida had the $3^{\text {rd }}$ largest expenditure total of the fifty states and ranked $6^{\text {th }}$ on a per capita basis.

Federal grant obligations to Florida totaled $\$ 22.6$ billion, or $\$ 1,269$ per capita, and represented 17 percent of total federal direct expenditures to the state. Florida had the $4^{\text {th }}$ largest obligations total of the fifty states; however, the state ranked $44^{\text {th }}$ on a per capita basis.

The value of procurement contract obligations totaled $\$ 14.3$ billion, or $\$ 805$ per capita, and accounted for 11 percent of the state's total federal direct expenditures. Florida had the $5^{\text {th }}$ largest obligations total of the fifty states and ranked $31^{\text {st }}$ on a per capita basis.

The smallest category of federal direct expenditures to Florida was salaries and wages. Such payments totaled $\$ 10.7$ billion, or $\$ 600$ per capita, and accounted for 8 percent of total federal direct expenditures to the state. Florida had the $5^{\text {th }}$ largest expenditure total of the fifty states, and the state ranked $33^{\text {rd }}$ on a per capita basis.

## Other Financial Assistance to Florida

Other financial assistance consists of the face value of federal insurance coverage as well as the dollar volume of federal guaranteed and direct loans. Other financial assistance to Florida totaled $\$ 362$ billion or $\$ 20,399$ per capita. The state ranked first among the fifty states in both total and per capita assistance due to the significant face value of flood
insurance coverage provided to Florida, which constituted 97 percent of total other financial assistance provided to the state by the federal government.

The total amounts of other federal assistance to Florida are summarized below.

## Face Value of Insurance Coverage

Total: \$351 billion; Rank: $1^{\text {st }}$
Per Capita: \$19,766; Rank: $1^{\text {st }}$

## Dollar Volume of Guaranteed Loans

Total: $\$ 8.7$ billion; Rank: $3^{\text {rd }}$
Per Capita: \$492; Rank: $37^{\text {th }}$
Dollar Volume of Direct Loans
Total: $\$ 2.5$ billion; Rank: $2^{\text {nd }}$
Per Capita: \$142; Rank: $10^{\text {th }}$

## How Florida Compares to Other Populous States

The U.S. Census Bureau reported that the federal direct expenditures (i.e., direct payments for individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, and salaries and wages) to the fifty states totaled $\$ 2.21$ trillion in 2005. The combined federal direct expenditures to the seven most populous states of California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio, totaled $\$ 928$ billion or 42 percent of the fifty states' total. Interestingly, the population of these seven states represented 45 percent of the total population of the fifty states.

The total federal direct expenditures of the seven most populous states are as follows.

1. California: $\$ 242$ billion
2. Texas: $\$ 149$ billion
3. New York: $\$ 145$ billion
4. Florida: $\mathbf{\$ 1 3 5}$ billion
5. Pennsylvania: $\$ 100$ billion
6. Illinois: $\$ 81$ billion
7. Ohio: $\$ 78$ billion

However, as illustrated below, the states' respective rankings change when controlling for population differences. The per capita federal direct expenditures of these same seven states are as follows.

1. Pennsylvania: $\$ 8,021$
2. Florida: $\$ 7,572$
3. New York: $\$ 7,500$
4. Ohio: $\$ 6,790$
5. California: $\$ 6,694$
6. Texas: $\$ 6,485$
7. Illinois: $\$ 6,328$

## Florida's Receipt of Federal Grants

Federal grants continue to be important sources of revenue utilized by our nation's state and local governments to provide necessary infrastructure and services to their residents. Federal grant expenditures (i.e., actual outlays) to the fifty states totaled \$393 billion in fiscal year 2005.

As opposed to the $\$ 22.6$ billion of federal grant obligations to Florida previously discussed, federal grant expenditures to our state and local governments totaled $\$ 19$ billion, or $\$ 1,072$ per capita. Florida had the $4^{\text {th }}$ largest federal grants expenditure of the fifty states; however, the state ranked $43^{\text {rd }}$ on a per capita basis.

The grant funding received from six federal departments (i.e., Health and Human Services, Transportation, Education, Homeland Security, Agriculture, and Housing and Urban Development) totaled $\$ 18.3$ billion and accounted for 96 percent of all grants expenditures to Florida. A summary of those departments' grant expenditures to Florida is listed below. Some of the more well-known program categories within these departments are listed.

## Health and Human Services Grants

Total: $\$ 10.4$ billion; Rank: $5^{\text {th }}$
Per Capita: \$585; Rank: 46 ${ }^{\text {th }}$

- Centers for Medicare and Medicaid Services
- Administration for Children and Families

## Transportation Grants

Total: $\$ 2.2$ billion; Rank: $4^{\text {th }}$
Per Capita: \$122; Rank: 39 ${ }^{\text {th }}$

- Federal Highway Administration
- Federal Aviation Administration
- Federal Transit Administration

## Education Grants

Total: $\$ 2.0$ billion; Rank: $4^{\text {th }}$
Per Capita: \$112; Rank: 31 ${ }^{\text {st }}$

- Office of Elementary and Secondary Education
- Office of Special Education and Rehabilitative Services
- Office of Vocational and Adult Education

## Homeland Security Grants

Total: $\$ 1.6$ billion; Rank: $1^{\text {st }}$
Per Capita: \$91; Rank: $2^{\text {nd }}$

- Federal Emergency Management Agency
- Domestic Preparedness and Antiterrorism Programs

## Agriculture Grants

Total: $\$ 1.1$ billion; Rank: $4^{\text {th }}$
Per Capita: \$59; Rank: 39 ${ }^{\text {th }}$

- Food and Nutrition Services
- Cooperative State Research, Education and Extension Services
- Rural Development Activities

## Housing \& Urban Development Grants

Total: \$1.0 billion; Rank: $9^{\text {th }}$
Per Capita: \$58; Rank: 42 ${ }^{\text {nd }}$

- Housing Programs
- Community Planning and Development

## Federal Grants to Florida in Recent Years

This is the tenth consecutive year that the LCIR has reviewed federal funding to Florida using the U.S. Census Bureau's data. Coincidentally, federal grant expenditures to Florida have increased significantly during this period.

Between 1996 and 2005, federal grant expenditures increased 126 percent from $\$ 8.4$ billion to $\$ 19$ billion. Florida's ranking among all states in total grant expenditures improved from $7^{\text {th }}$ in 1996 to $4^{\text {th }}$ in 2005 . Additionally, Florida's relative share of grant expenditures to the fifty states increased from 3.9 percent in

1996 to 4.8 percent in 2005. Interestingly, Florida's relative share of the total population of the fifty states increased from 5.4 percent in 1996 to 6.0 percent in 2005.

Florida’s per capita federal grant expenditure increased from \$586 in 1996 to \$1,072 in 2005. Although Florida's per capita ranking has improved in recent years, it remains low. The state's per capita ranking improved from $48^{\text {th }}$ in 1996 to $43^{\text {rd }}$ in 2005.

## Conclusion

Although this report discusses the various types of federal direct expenditure and other financial assistance to Florida, the focus is on federal grant expenditures. Despite Florida's low per capita federal grants expenditure, $43^{\text {rd }}$ in 2005, federal assistance to our state, primarily in the form of grant funding, accounted for 29.6 percent of state government's total direct revenue that year, according to the Florida Consensus Estimating Conference.

Numerous reasons exist for Florida’s low per capita federal grants funding; however, three likely explanations are of particular significance. First, many funding formulas are based on outdated population figures or other factors that do not reflect the state's rapid growth in recent decades. Congressional support to revise funding formula inequities is difficult to obtain if other states stand to lose federal funds under revised formulas that benefit Florida. Second, small state minimums in formula allocations disadvantage more populous states like Florida. Third, Florida may not be aggressively pursuing all federal grant opportunities.

The LCIR is currently conducting an interim project entitled, Federal Grants - How Florida's Local Government Can Improve, to identify federal grants that the state's local governments receive and research if similarly situated local governments are eligible to participate in those grant programs.

Several years ago, the LCIR surveyed Florida’s state agencies regarding the receipt of federal grants. In response to the question of why the state ranked low in the per capita receipt of many federal grants, state agencies offered a number of explanations. Such explanations included the state's failure to allocate sufficient state matching funds, federal "strings" or policy requirements serving as conditions for receipt of federal grants funding, and cutbacks in federal funding.

In this report, the LCIR utilized the per capita measure to control for population differences among states. However, such a measure does not take into consideration levels of need or utilization. State agency representatives have previously noted that per capita measurements of certain federal grants receipts, while low compared to other states, might not have reflected the fact that such funding was adequately serving the target populations.

In spite of these caveats, the data presented in this report show that Florida still lags behind other states in the receipt of federal grants. In 2005, Florida's per capita federal grants expenditure was $\$ 257$ less than the national per capita expenditure. In fact, Florida's per capita expenditure was only 81 percent of the national per capita expenditure. Had Florida's per capita grants expenditure of $\$ 1,072$ equaled just the national average of $\$ 1,329$,
then this state would have received nearly $\$ 4.6$ billion in additional grant funding.

## Recommendations

A number of recommendations, many of which were included in previous annual reports, are offered as ways to potentially increase Florida's receipt of federal grants.

- Coordinate with appropriate state agency personnel to generate more in-depth analyses of the state's federal grants receipts by agency and by specific grant programs.
- Develop a comprehensive strategy to evaluate the cost-benefit issues associated with the continued participation or pursuit of federal grants funding.
- Identify federal and state policy changes needed to enhance Florida's access to federal funding streams.
- Form coalitions with similarly-situated states to pursue changes in outdated or inequitable federal funding formulas.
- Work with Congress to implement changes to federal funding formulas determined to be outdated or inequitable.
- Promote the consolidation of federal funding streams to simplify access to federal funding.
- Make the processes of amending the state budget and obtaining spending authority easier.
- Increase the availability of state matching funds.
- Increase training provided at the state and local levels for accessing federal grant funding.
- Increase communication and coordination on federal issues among state agencies, the Governor's office, the Florida Washington Office, the Legislature, and the Congressional Delegation.

## Introduction

The Florida Legislative Committee on Intergovernmental Relations (LCIR) annually reviews the state's receipt of federal funds. The purpose of this report is to provide the Legislature and other interested parties with a review and analysis of federal financial assistance to Florida. In particular, the report focuses on federal grants to Florida's state and local governments. This review is intended to be part of an ongoing strategy to improve federal-state relations generally and facilitate the development of strategies to increase the return of federal tax dollars to the state.

The LCIR reviewed and analyzed federal expenditure data for federal fiscal year 2005 (i.e., October 1, 2004 to September 30, 2005) using data obtained from two U.S. Bureau of the Census publications: Consolidated Federal Funds Report for Fiscal Year 2005 and Federal Aid to States for Fiscal Year 2005, both issued in September 2007. Two types of federal financial assistance to states are documented in this report. These types are federal direct expenditures and other financial assistance.

Federal direct expenditures constitute actual outlays or obligations of the federal government. These expenditures are reported by the U.S. Census Bureau in five categories: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries and wages. Federal direct expenditures to the state totaled $\$ 135$ billion or $\$ 7,572$ per capita.

Other financial assistance does not constitute actual outlays but, in large measure, reflects the contingent liability of the federal government via the face value of insurance coverages and the dollar volume of loans made. Other financial assistance to Florida totaled \$362 billion or \$20,399 per capita.

This report is divided into four parts and includes one appendix.
Part One discusses the types of federal financial assistance to states by summarizing the five categories of federal direct expenditure and the three categories of other financial assistance. Dollar amounts of federal financial assistance to the fifty states collectively, and Florida specifically, are presented. In addition, Florida's rankings among the fifty states, the seven most populous states, and the other southern states on the basis of total and per capita funding are included.

Part Two summarizes federal direct expenditures to Florida’s sixty-seven counties.
Part Three focuses on only one category of federal funding, grant expenditures to state and local governments. Detailed summaries of federal grants expenditures to Florida, by federal agency, are provided. Additionally, Florida's rankings among the fifty states, the seven most populous states, and the other southern states on the basis of total and per capita expenditures are listed.

Part Four examines the states' per capita federal grant expenditures by agency as a percentage of the national per capita expenditures.

The Appendix lists the websites of federal agencies.

## Part One: <br> Federal Financial Assistance to Florida

## A. Introduction

This part summarizes the five categories of federal direct expenditures (i.e., direct payments for individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, and salaries and wages) provided to Florida. Three categories of other financial assistance (i.e., insurance coverage, guaranteed loans, and direct loans) are summarized as well. Reported dollar amounts for these other assistance programs represent the face value of insurance coverage or the dollar volume of loans made rather than actual expenditures.

## B. Data Source

The source of the data summarized in this part is the U.S. Bureau of the Census publication entitled Consolidated Federal Funds Report for Fiscal Year 2005 issued in September 2007. This publication presents federal government expenditures or obligations in state, county, and subcounty areas of the United States. Although the Census Bureau's report includes the relevant data for the District of Columbia and U.S. outlying areas, the focus here is on the assistance provided to the fifty states collectively and Florida specifically.

The financial activity of all federal government agencies is covered except for those agencies that do not submit data to any of the federal reporting systems that serve as information sources for the Census Bureau's report. As a general guide, the grants and procurement data represent obligated funds, while the direct payments and salaries and wages data represent actual expenditures.

## C. Federal Financial Assistance to Florida

The distribution of federal financial assistance to states in fiscal year 2005 is summarized in Table 1-1 on page 9. Federal direct expenditures to the fifty states totaled $\$ 2.21$ trillion or $\$ 7,455$ per capita while other financial assistance totaled $\$ 1.05$ trillion or $\$ 3,532$ per capita. Federal direct expenditures to Florida totaled $\$ 135$ billion or $\$ 7,572$ per capita, and other financial assistance totaled $\$ 362$ billion or $\$ 20,399$ per capita.

Federal direct expenditures to Florida constituted approximately 6.1 percent of such expenditures to all fifty states. Florida had the $4^{\text {th }}$ largest expenditure of all states, the $4^{\text {th }}$ largest expenditure of the seven most populous states, and the $2^{\text {nd }}$ largest expenditure of the southern states, after Texas. ${ }^{1}$ On a

[^0]per capita basis, the state ranked $23^{\text {rd }}$ among all states, $2^{\text {nd }}$ among the most populous states, and $10^{\text {th }}$ among the southern states.

Other financial assistance to Florida constituted 35 percent of such assistance to all fifty states. Due to the significant face value of flood insurance coverage in Florida, the state ranked $1^{\text {st }}$ among all states in both total and per capita assistance.

## D. Federal Direct Expenditures

As previously mentioned, there are five categories of federal direct expenditures: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries and wages. Each of these categories is discussed in more detail in the following sections.

## 1. Direct Payments for Individuals for Retirement and Disability

Retirement and disability payments represented the largest category of federal direct expenditure to states. Such payments totaled $\$ 694$ billion, or $\$ 2,346$ per capita, and represented approximately 32 percent of total direct expenditures to states. These payments to Florida totaled $\$ 50.5$ billion, or $\$ 2,841$ per capita, and accounted for 38 percent of total direct expenditures to the state.

Florida had the $2^{\text {nd }}$ largest expenditure of all states, after California; the $2^{\text {nd }}$ largest expenditure of the most populous states, after California; and the largest expenditure of the southern states. On a per capita basis, Florida ranked $5^{\text {th }}$ among all states; $1^{\text {st }}$ among the most populous states, and $4^{\text {th }}$ among the southern states.

As illustrated in Table 1-2 on page 10, this category includes four types of payments: 1) Social Security payments, 2) federal retirement and disability payments, 3 ) veterans benefits, and 4) other payments. In Florida, Social Security payments accounted for 78 percent of the state's total value of federal retirement and disability payments to individuals.

Florida's large elderly population is a primary reason for the state's high per capita expenditure relative to other states. Based on the results of Census 2000, Florida's elderly population (i.e., age 65 years and over) totaled 2.8 million and accounted for 8 percent of the nation's total elderly population of 35 million. In Florida, the elderly constituted nearly 18 percent of the state's total population. Relative to other age groupings, the proportion of the total population defined as elderly was greater in Florida than any other state.

## 2. Direct Payments for Individuals Other Than for Retirement and Disability

These payments represented the second largest category of federal direct expenditure to states. Such payments totaled $\$ 495$ billion, or $\$ 1,671$ per capita, and represented approximately 22 percent of
total direct expenditures to states. These payments to Florida totaled $\$ 36.6$ billion, or $\$ 2,057$ per capita, and accounted for 27 percent of total direct expenditures to the state. As illustrated in Table 1-3 on page 11, this category includes eight types of payments. Medicare benefits accounted for 77 percent of other direct payments to the state.

Florida had the $3^{\text {rd }}$ largest expenditure of all states; the $3^{\text {rd }}$ largest expenditure of the most populous states; and the largest expenditure of the southern states. On a per capita basis, Florida ranked $6^{\text {th }}$ among all states, $2^{\text {nd }}$ among the most populous states, and $2^{\text {nd }}$ among the southern states.

## 3. Grants

Grant obligations represented the third largest category of federal direct expenditure to states. These obligations to states totaled $\$ 458$ billion, or $\$ 1,548$ per capita, and represented 21 percent of total direct expenditures. These grant obligations to Florida totaled $\$ 22.6$ billion, or $\$ 1,269$ per capita, and represented 17 percent of total direct expenditures to the state.

As illustrated in Table 1-4 on pages 12-13, Florida had the $4^{\text {th }}$ largest expenditure of all states; the $4^{\text {th }}$ largest expenditure of the most populous states; and the $2^{\text {nd }}$ largest expenditure of the southern states, after Texas. On a per capita basis, Florida ranked $44^{\text {th }}$ among all states; $6^{\text {th }}$ among the most populous states, and $13^{\text {th }}$ among the southern states.

A more in-depth discussion of federal grants to state and local governments is addressed in Part Three of this report. The amount of total grant obligations to Florida discussed here is approximately $\$ 3.6$ billion greater than the total listed in Part Three. While the funding amount presented here reflects total obligations, the funding amount presented in this latter part reflects total expenditures (i.e., actual outlays). Additionally, the funding amount presented here includes obligations to nongovernmental entities while the funding amount presented in Part Three reflects expenditures to state and local governments only.

## 4. Procurement Contracts

Procurement contracts represented the fourth largest category of federal direct expenditure to states. Such payments to states totaled $\$ 349$ billion, or $\$ 1,179$ per capita, and represented 16 percent of total direct expenditures. These payments to Florida totaled $\$ 14.3$ billion, or $\$ 805$ per capita, and represented 11 percent of total direct expenditures to the state.

As illustrated in Table 1-5 on pages 14-15, Florida had the $5^{\text {th }}$ largest expenditure of all states, the $3^{\text {rd }}$ largest expenditure of the most populous states, and the $4^{\text {th }}$ largest expenditure of the southern states. On a per capita basis, Florida ranked $31^{\text {st }}$ among all states, $4^{\text {th }}$ among the most populous states, and $11^{\text {th }}$ among the southern states.

This category includes contract awards to the Department of Defense and non-defense agencies. In Florida, contracts awarded by the Department of Defense accounted for 73 percent of total procurement contracts awarded.

## 5. Salaries and Wages

Federal salary and wage payments represented the smallest category of direct expenditure to states. Such payments to states totaled $\$ 210$ billion, or $\$ 710$ per capita, and represented 10 percent of total direct expenditures. These payments to Florida totaled $\$ 10.7$ billion, or $\$ 600$ per capita, and represented 8 percent of direct expenditures to the state.

As illustrated in Table 1-6 on pages 16-17, Florida had the $5^{\text {th }}$ largest expenditure of all states, the $3^{\text {rd }}$ largest expenditure of the most populous states, and the $4^{\text {th }}$ largest expenditure of the southern states. On a per capita basis, Florida ranked $33^{\text {rd }}$ among all states, $3^{\text {rd }}$ among the most populous states, and $14^{\text {th }}$ among the southern states.

This category includes salary and wage payments made by the Department of Defense and nondefense agencies. In Florida, the payments made by non-defense agencies accounted for 60 percent of total salary and wage payments.

## E. Other Financial Assistance

The three categories of other financial assistance are: 1) face value of insurance coverages, 2) dollar volume of guaranteed loans, and 3) dollar volume of direct loans. Other financial assistance to Florida totaled $\$ 362$ billion, or $\$ 20,399$ per capita. This financial assistance to Florida constituted 35 percent of such assistance to all states. The state ranked first among the fifty states in both total and per capita assistance due to the significant face value of flood insurance coverage provided to Florida.

## 1. Face Value of Insurance Coverage

The face value of insurance coverage represented the largest category of other financial assistance to states. Such assistance to states totaled $\$ 854$ billion, or $\$ 2,887$ per capita, and represented 82 percent of other financial assistance provided to all states. Such coverage in Florida totaled $\$ 351$ billion, or \$19,766 per capita, and represented 97 percent of other financial assistance provided to the state by the federal government.

As illustrated in Table 1-7 on page 18, this category includes five types of insurance coverage. Flood insurance accounted for 99 percent of the total face value of all federal insurance coverage provided to the state. Florida had the largest face value of insurance coverage of the fifty states and ranked first among the states in both total and per capita insurance coverage.

## 2. Dollar Volume of Guaranteed Loans

The second largest category of other financial assistance to states was guaranteed loans. Such assistance to the fifty states totaled $\$ 162$ billion, or $\$ 549$ per capita, and represented 16 percent of other financial assistance provided to states by the federal government. These loans to Florida totaled $\$ 8.7$ billion, or $\$ 492$ per capita, and represented only 2 percent of other financial assistance to the state.

As illustrated in Table 1-8 on page 19, this category includes seven types of guaranteed loans with Federal Family Education Loans accounting for 33 percent of the total dollar volume of federal guaranteed loans made to the state. Florida had the $3^{\text {rd }}$ largest dollar volume of all states, the $3^{\text {rd }}$ largest volume of the most populous states, and the $2^{\text {nd }}$ largest volume of the southern states. On a per capita basis, Florida ranked $37^{\text {th }}$ among all states, $5^{\text {th }}$ among the most populous states, and $13^{\text {th }}$ among the southern states.

## 3. Dollar Volume of Direct Loans

Direct loans represented the smallest category of other financial assistance provided to states. Such assistance to the fifty states totaled $\$ 28$ billion, or $\$ 96$ per capita, and represented 3 percent of other financial assistance to states. These loans to Florida totaled $\$ 2.5$ billion, or $\$ 142$ per capita, and represented only 0.7 percent of other financial assistance to the state.

As illustrated in Table 1-9 on page 20, Florida had the $2^{\text {nd }}$ largest dollar volume of all states, the $2^{\text {nd }}$ largest volume of the most populous states, and the largest volume of the southern states. On a per capita basis, Florida ranked $10^{\text {th }}$ among all states, $1^{\text {st }}$ among the most populous states, and $5^{\text {th }}$ among the southern states.

## F. Conclusion

Federal direct expenditures represent either actual expenditures or obligations of the federal government to this state. By contrast, the reported amounts of other financial assistance reflect the face value of insurance coverage and the dollar volume of loans made.

Florida had high per capita expenditures for federal direct payments for individuals when compared to the national average. This was due primarily to the state's large retiree and elderly populations. However, in the remaining categories of federal direct expenditure (i.e., grants, procurement contracts, and salaries and wages), Florida had per capita expenditures that were less than the national average.

The allocation of federal financial assistance has significant impacts on the finances of state and local governments. Since numerous federal policies govern the distribution of federal funding to states, future policy changes will likely affect individual states quite differently. Knowing the
magnitude of such financial assistance to Florida should be useful to policy makers as they assess strategies for increasing the state's share of federal funding.

## Part Two: <br> Federal Direct Expenditures to Florida Counties

## A. Introduction

Federal spending can significantly impact the finances of local governments. The purpose of this part is to illustrate how the $\$ 135$ billion in federal direct expenditures to Florida in fiscal year 2005 was distributed among the state's 67 counties.

## B. Data Source

The source of the data summarized in this part is the U.S. Bureau of the Census publication entitled Consolidated Federal Funds Report for Fiscal Year 2005. This publication summarizes federal government expenditures or obligations to states, counties, and subcounty areas. However, the focus here is on the distribution of federal direct expenditures among Florida’s counties, as geographic areas rather than units of local government.

## C. Geographic Coding of Federal Direct Expenditures

The basis for the geographic coding of federal direct expenditures to counties varies depending on the data sources; however, the following general guidelines apply. For salaries and wages, the distribution is based on the place of employment. The distribution of procurement contract awards is based on the place of performance. For retirement and disability payments as well as other direct payments, the distribution is based on the recipient's location.

The distribution of grants is based on the location of the initial recipient. For grants that are ultimately distributed throughout the state, the reader should note that significant dollar amounts are included in Leon County's total, which reflects the data coding of such grants to state government as the initial recipient. Many federal grants involve a direct payment to state government that is then responsible for program administration. Such examples include those grants that are 'passedthrough' to local governments. Another example includes those grants, such as for highway construction, in which the financial impact is spread over all areas of the state. A third example includes those grant programs that the state government administers but for which the ultimate beneficiaries are found throughout the state.

## D. Federal Direct Expenditures by County

As previously mentioned, federal direct expenditures are categorized as direct payments to individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, or salaries and wages. The distribution of such expenditures within Florida is discussed in more detail in the following sections.

## 1. Federal Direct Expenditures by Category

The distribution of the $\$ 135$ billion in federal direct expenditures by county geographic area is summarized in Table 2-1 on pages 24-25. In total, the magnitude of federal direct expenditures varied significantly by county from a low of $\$ 29.1$ million within Lafayette County to a high of $\$ 16.5$ billion within Miami-Dade County.

Direct payments to individuals for retirement and disability totaled $\$ 50.5$ billion statewide. The value of such payments varied from a low of $\$ 13.4$ million within Lafayette County to a high of $\$ 4.3$ billion within Miami-Dade County. Federal retirement and disability payments to individuals totaled one billion dollars or more in 16 counties: Brevard, Broward, Duval, Escambia, Hillsborough, Lake, Lee, Marion, Miami-Dade, Orange, Palm Beach, Pasco, Pinellas, Polk, Sarasota, and Volusia.

Direct payments to individuals other than for retirement and disability totaled $\$ 36.6$ billion statewide. Such payments ranged from a low of $\$ 8$ million within Liberty County to a high of $\$ 5.1$ billion within Miami-Dade County. Other direct payments to individuals totaled one billion dollars or more in 7 counties: Broward, Duval, Hillsborough, Miami-Dade, Orange, Palm Beach, and Pinellas.

Federal grant obligations totaled $\$ 22.6$ billion statewide. Miami-Dade County had the largest grant obligation at $\$ 5.1$ billion; Lafayette County had the smallest at $\$ 5.8$ million. Although several billion dollars worth of grants are reported within Leon County's total due to the coding issue previously discussed, reported grant obligations exceeded $\$ 200$ million in 16 other counties: Alachua, Brevard, Broward, Duval, Escambia, Hillsborough, Lee, Marion, Miami-Dade, Orange, Palm Beach, Pinellas, Polk, Saint Lucie, Santa Rosa, and Volusia.

Federal procurement contracts totaled $\$ 14.3$ billion statewide. The value of such contracts ranged from a low of $\$ 309,000$ within Lafayette County to a high of $\$ 3.1$ billion within Brevard County. In addition to Brevard County, Duval, Escambia, Hillsborough, Miami-Dade, Okaloosa, Orange, and Pinellas counties each had procurement contracts totaling greater than $\$ 500$ million.

Federal salary and wage payments totaled $\$ 10.7$ billion statewide. The value of such payments varied from a low of $\$ 590,000$ within Glades County to a high of $\$ 1.6$ billion within Duval County. Federal salary and wage payments totaled $\$ 200$ million or more in 13 counties: Alachua, Bay, Brevard, Broward, Duval, Escambia, Hillsborough, Miami-Dade, Okaloosa, Orange, Palm Beach, Pinellas, and Walton.

## 2. Per Capita Federal Direct Expenditures by Category

Table 2-2 on pages 26-27 lists the per capita federal direct expenditures by category within each county geographic area. Excluding Leon County from consideration due to the data coding of significant federal grant obligations to the seat of state government, per capita total direct
expenditures varied significantly from a low of $\$ 3,459$ within Union County to a high of $\$ 16,105$ within Okaloosa County.

Per capita direct payments to individuals for retirement and disability varied from a low of \$1,604 within Union County to a high of $\$ 4,883$ within Lake County. Per capita direct payments to individuals other than for retirement and disability ranged from a low of $\$ 724$ within Clay County to a high of $\$ 3,626$ within Santa Rosa County.

Again excluding Leon County from consideration, per capita grants varied from a low of \$274 within Flagler County to a high of $\$ 3,428$ within Hardee County. Many of Florida’s less populated, rural counties had high per capita dollar figures, which demonstrate the relative importance of federal grants as a potential source of revenue in these areas.

Per capita procurement contracts varied from a low of $\$ 22$ within Gulf County to a high of $\$ 5,807$ within Brevard County. Per capita salary and wage payments ranged from a low of $\$ 55$ within Glades County to a high of $\$ 6,805$ within Walton County. Certainly, federal procurement associated with the space program and military salary and wage spending associated with Eglin Air Force Base in northwest Florida are factors in Brevard and Walton counties’ high per capita dollar figures, respectively.

## 3. Federal Direct Expenditures by Category as a Percentage of Total

Table 2-3 on pages 28-29 provides a county-by-county list of federal direct expenditures by category as a percentage of total expenditures. A number of factors explain differences in counties' proportional shares attributable to each expenditure category. For example, the relative share attributable to federal direct payments to individuals was generally highest in counties such as Clay, Flagler, and Lake with large elderly or retiree populations, while the relative share attributable to federal grants was highest in less populated, rural counties such as Hamilton, Hardee, and Jefferson. The relative share attributable to federal procurement was highest in counties such as Brevard, Okaloosa, and Orange, which are engaged in significant military and space-related contracting. The relative share attributable to federal salary and wage payments was generally highest in those counties such as Duval, Monroe, and Walton where military installations are located.

## E. Conclusion

The economic impact of federal direct expenditures varies significantly from county to county. Past changes in federal spending have had unequal impacts on local economies. Likewise, future changes in the receipt of federal funding are likely to affect areas of the state quite differently. This information should be useful to policy makers as they assess the impact of future changes in federal direct expenditures on Florida’s local economies.

## Part Three: <br> Federal Grants to Florida's State and Local Governments

## A. Introduction

Federal grant expenditures to Florida’s state and local governments totaled $\$ 19$ billion, or $\$ 1,072$ per capita, in fiscal year 2005. In terms of total federal grants, Florida had the $4^{\text {th }}$ largest expenditure of all states, the $4^{\text {th }}$ largest expenditure of the seven most populous states, and the $2^{\text {nd }}$ largest expenditure of the southern states, after Texas. ${ }^{1}$ On a per capita basis, the state ranked $43^{\text {rd }}$ among all states, last among the most populous states, and $14^{\text {th }}$ among the southern states.

A summary of Florida's federal grant expenditures by department or agency can be found in Table 3-1 on page 35. In addition to total reported expenditures, calculations of per capita expenditures have been included. Florida's rankings among the fifty states, the seven most populous states, and the other southern states on the basis of total and per capita expenditures are listed as well.

Of the $\$ 19$ billion in total grant expenditures to Florida in 2005, the grant funding received from six federal departments: Health and Human Services, Transportation, Education, Homeland Security, Agriculture, and Housing and Urban Development totaled $\$ 18.3$ billion and accounted for 96 percent of all grant expenditures to Florida.

## B. Data Sources

The data reported in this part was obtained from the U.S. Bureau of the Census publication entitled Federal Aid to States for Fiscal Year 2005 issued September 2007. The Census Bureau's publication presents federal expenditures to state and local governments by state and U.S. outlying areas. However, the focus of this part is on the total expenditures made to the fifty states collectively and the expenditures by program category made to Florida.

The total grant expenditures to Florida of $\$ 19$ billion are less than the state's federal grant obligations of $\$ 22.6$ billion previously discussed. This difference results from the use of the Federal Aid to States (FAS) report as the data source here as opposed to the use of the Consolidated Federal Funds Report (CFFR). The FAS report presents state-by-state distributions of federal expenditures for grants to state and local governments only. By contrast, federal grants reported in the CFFR generally represent obligations. Obligations are federal funds designated state-by-state and available to be "drawn down" through a variety of program requirements. Additionally, the CFFR includes payments to state and local governments as well as grants to nongovernmental recipients.

[^1]
## C. Federal Grants by Department or Agency

The tables in this part provide more detailed summaries of federal grant expenditures to Florida by department or agency. In the FAS report, these federal grant expenditures are reported by program categories. It is important to note that the majority of these program categories reflect the sum total of numerous individual grant programs.

In the Catalog of Federal Domestic Assistance (CFDA), federal grants are classified into one of two types: formula grants and project grants. ${ }^{2}$ Formula grants are allocations of money to states or their subdivisions in accordance with distribution formulas prescribed by law or administrative regulation for activities of a continuing nature not confined to a specific project. Currently, the CFDA lists 189 formula grant programs.

Project grants are funding for specific projects for fixed or known periods of time and can include fellowships, scholarships, research grants, training grants, traineeships, experimental and demonstration grants, evaluation grants, planning grants, technical assistance grants, survey grants, and construction grants. The CFDA currently lists 1,053 project grant programs.

In total, 1,242 separate federal grant programs are currently listed in the CFDA. Data on states' participation in each of these programs is not part of the FAS report; however, such information is available from the U.S. Bureau of the Census. Due to the large number of such programs, a separate research project would be necessary to document Florida's participation in these formula and project grant programs relative to the other states. At the direction of the Committee, the LCIR staff last documented the Florida's participation in individual grant programs in 2002.

Utilizing the data published in the FAS report, the following tables summarize federal grant expenditures to Florida by department or agency.

Table 3-2: U.S. Department of Agriculture (page 36)
Table 3-3: U.S. Department of Commerce (page 37)

Table 3-9: U.S. Department of Homeland Security (page 43)

[^2]Table 3-10: U.S. Department of Housing and Urban Development (page 44)
Table 3-11: U.S. Department of Interior (page 45)
Table 3-12: U.S. Department of Justice (page 46)
Table 3-13: U.S. Department of Labor (page 47)
Table 3-14: U.S. Department of Transportation (page 48)
Table 3-15: U.S. Department of the Treasury (page 49)
Two additional tables summarize changes in federal grant expenditures to Florida by department or agency in descending order of fiscal magnitude for the period of 1996 through 2005. Table 3-16 on pages 50-51 lists the total expenditures, the percentage change in total expenditures from one year to the next, and Florida’s rankings among the fifty states. Table 3-17 on pages 52-54 lists the per capita expenditures and Florida's rankings among the fifty states.

Supplemental information describing each federal department or agency and many of the grant programs can be obtained from their respective websites. A list of those websites can be found in the Appendix.

## D. Conclusion

Federal grant expenditures to Florida’s state and local governments totaled $\$ 19$ billion, or $\$ 1,072$ per capita, in fiscal year 2005. In terms of total federal grants, Florida had the $4^{\text {th }}$ largest expenditure of all states, the $4^{\text {th }}$ largest expenditure of the seven most populous states, and the $2^{\text {nd }}$ largest expenditure of the southern states. On a per capita basis, the state ranked $43^{\text {rd }}$ among all states, last among the most populous states, and $14^{\text {th }}$ among the southern states.

For reporting purposes, the federal government aggregates expenditures of hundreds of separate grant programs into broad program categories. Consequently, it is difficult to determine why the state ranks so low, on a per capita basis, relative to other states in many program categories. Certainly, this aggregation of expenditure data masks differences from one grant program to another. Within the same program category, a high per capita ranking in an individual grant program may be offset to some degree by a low per capita ranking in another program.

This report utilizes a per capita measure to control for population differences among states. However, this measure does not take into consideration levels of need or utilization. For example, a state may have a need for certain grant funding but be unable to receive monies due to the program's eligibility requirements. Conversely, a state may be fully qualified to participate in a particular grant program but may choose not to participate, or participate fully, due to the requirements or conditions associated with the receipt of funds.

According to past statements made by representatives of several state agencies, per capita measurements of certain federal grants receipts, while low compared to other states, may not reflect the fact that the amounts are adequately serving their target populations. Additionally, some grant
funding formulas incorporate variables other than the population at large; therefore, the use of a per capita measure for comparisons among states may not be appropriate.

Florida's per capita expenditures for select grants may be lower than for most other states because of the state’s unique demographic composition, which features large elderly and retiree populations. However, when funding is compared in terms of actual dollars, or per target populations, the state may actually rank much higher nationally.

It is important to note that a number of factors determine how successful or not an individual state can be in maximizing federal grant funding. How a state fares in the receipt of grant funding is largely determined by formula. Although there are over 1,000 project grant programs currently available, their cumulative dollar value is small relative to the cumulative dollar value of the large formula grant programs that exist in education, health care, and transportation, for example.

Another factor affecting states' receipt of grant funding are the natural resources existing within their boundaries. States that typically do well in the receipt of grant funding are those that receive payments for the value of natural resources extracted from their public lands. The existence of such extractable natural resources favors states like Alaska, Louisiana, and Wyoming, relative to a state like Florida with fewer extractable natural resources.

Medicaid is another factor that affects how a state fares in the receipt of grant funding, given the size of the program itself. While Medicaid spending has been increasing, an individual state could experience a smaller than average increase if its Medicaid matching rate declines. Conversely, a state experiencing an increase in its matching rate could see a substantial increase in grant funding. Additionally, the type of Medicaid program run by the state, whether relatively modest and less expensive or more expansive and more expensive, will affect the level of federal reimbursements.

In spite of the caveats mentioned above, the data presented in this part suggest that it is possible for Florida to realize improvement in the acquisition of federal grants. Therefore, elected federal, state, and local officials should consider the development of a comprehensive strategy in the evaluation and acquisition of federal grants and identify federal and state policy changes to enhance the state's access and receipt of such funding.

Notes:

1) The calculation of per capita expenditures was made using population estimates that represent the state's resident population as of July $1,2005$.
2) Based on July 1, 2005 population estimates, the seven most populous states, in descending population order, were: California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio.
3) As designated by the U.S. Census Bureau, Florida is one of 16 states in the South region. The other states in the South region are: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

# Part Four: <br> Florida's Per Capita Federal Grant Expenditures by Agency as a Percentage of the National Per Capita Expenditures 

## A. Introduction

The purpose of this part is to illustrate how Florida's per capita federal grant expenditures by agency compare to the national per capita expenditures as well as those of the other states. This part analyzes changes in states' per capita expenditures, relative to national per capita expenditures, during fiscal years 1996 through 2005.

## B. Data Sources

The figures reported in this part were calculated by the LCIR staff from data published in the U.S. Bureau of the Census publications: Federal Expenditures to States (FES) for fiscal years 1996 through 1997 and its successor Federal Aid to States (FAS) for fiscal years 1998 through 2005.

## C. States' Per Capita Federal Grant Expenditures by Agency

In analyzing the federal grants data, the LCIR staff calculated per capita expenditures for each state, as well as the per capita expenditures of the fifty states collectively, by federal agency for each of the fiscal years 1996 through 2005. The per capita expenditures of the fifty states is hereafter referred to as the national per capita expenditures.

Each state's per capita expenditures, as a percentage of the national per capita expenditures, are calculated. The per capita expenditures of individual states are either less than, equal to, or greater than the national per capita expenditures. If a state's percentage value in a given year is less than 100 percent, then that state had a per capita expenditure less than the national one. If a state's percentage value is greater than 100 percent, then that state's per capita expenditure exceeded the national per capita expenditure.

Utilizing the data published in the relevant FES and FAS reports, the following tables summarize states' per capita federal grant expenditures as a percentage of national per capita expenditures.

## D. Conclusion

Part Three of this report discussed several shortcomings in using a per capita measure to evaluate federal grant expenditures to states, and those shortcomings apply here as well. The inherent assumption when comparing states’ per capita expenditures is that federal grants are distributed solely on the basis of total population, which is not the case for all individual grant programs.

Formula or project grants can have various target populations. Therefore, Florida's per capita measurements of certain federal grants receipts, while low compared to other states may not reflect the fact that the amounts are adequately serving their target populations. Since grant funding formulas may incorporate variables other than states' total populations, the use of a per capita measure for comparative purposes may not always be appropriate.

However, in spite of these caveats, these analyses may provide some rough measure of how well Florida fares, relative to all other states, in the receipt of grant funding by agency after controlling for population differences among the states. The analyses demonstrate that Florida's per capita expenditures have been below the national per capita expenditures for the majority of federal agencies, in particular those agencies that provide the majority of grant funding to states. Given the large number of federal grant programs (i.e., 1,242 currently), additional research into these programs would need to be conducted in order to access the extent to which Florida's receipt of funding from individual grant programs could be increased in the future.

Table 4-1
Florida's Per Capita Federal Grant Expenditures as a Percentage of the National Per Capita Expenditures by Agency
Federal Fiscal Years 1996 to 2005

| Federal Agency | FY 1996 | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 | FY 2002 | FY 2003 | FY 2004 | FY 2005 |

[^2]:    2. The purpose of the CFDA is to provide a database of all federal programs available to state and local governments, including the District of Columbia; federally-recognized Indian tribal governments; territories and possessions of the United States; domestic public, quasi-public, and private profit and nonprofit organizations and institutions; specialized groups; and individuals. The Catalog is available online at www.cfda.gov. Currently, programs in the Catalog are classified into 15 types of assistance, seven of which are financial types of assistance and eight are non-financial types of assistance.
