# Review of Federal Funding to Florida in Fiscal Year 2008 

November 2009

Florida
Legislative Committee on Intergovernmental Relations

## Florida Legislative Committee on Intergovernmental Relations

(As of November 2009)

## Legislative Members

Senator Anthony Hill, Sr., Vice Chair District 1
Senator Nancy Detert District 23
Senator Mike Haridopolos
District 26
Senator Frederica Wilson
District 33
Representative Juan C. Zapata, Chair
District 119
Representative Bill Heller
District 52
Representative Jimmy Patronis
District 6

Representative Lake Ray
District 17

## Gubernatorial Appointees

Commissioner Cyndi Stevenson
Saint Johns County
Commissioner Michael McLean
Seminole County
Mayor Fred Costello
City of Ormond Beach
Councilman Herbert Polson
City of Saint Petersburg
Mr. Tom Pelham
Secretary, Florida Department of Community Affairs
Mr. Bill Montford
CEO, Florida Assoc. of District School Superintendents
Ms. Lisa Saliba
Policy Coordinator, Governor's Office of Policy \& Budget

Alton L. "Rip" Colvin, Jr. - Executive Director

## What is the LCIR?

The Florida Legislative Committee on Intergovernmental Relations (LCIR) is a legislative entity that facilitates the development of intergovernmental policies and practices. The Florida LCIR strives to improve coordination and cooperation among state agencies, local governments, and the federal government.

## What Issues Have Been Addressed by the LCIR?

The LCIR completes several publications annually, including the Local Government Financial Information Handbook, Finalized Salaries of County Constitutional Officers and Elected School District Officials, and Intergovernmental Impact Report (Mandates and Measures Affecting Local Government Fiscal Capacity). In addition, the LCIR has addressed the following issues:

| o | Municipal Incorporations and Annexation | o | State, Regional, and Local Planning |
| :--- | :--- | :--- | :--- |
| o | Impact Fees | o | Voting by Mail |
| o | Natural Disaster Preparedness, Response and Recovery | o | Economic Development |
| o | Local Government Financial Emergencies | o | Federal Grants to Florida’s Local Governments |
| o | Urban Infill \& Infrastructure Capacity | o | Federal Funding to Florida |
| o | Marina and Dock Permitting | o | Federal/State Relations |

If you would like additional copies of this report or have comments or questions pertaining to the information contained herein, please contact the LCIR at (850) 488-9627. We welcome your input or suggestions. Our mailing address is:

Florida LCIR

## Executive Summary

The purpose of this report is to provide the Florida Legislature and other interested parties with a review and analysis of federal funding to Florida in fiscal year 2008 using data released by the U.S. Census Bureau in July 2009. In particular, this report focuses on federal grant expenditures to Florida's state and local governments. Florida's historically low per capita ranking among the states in the receipt of federal grants has been an area of particular concern to policymakers.

This report should be useful for making statistical comparisons among states of various federal agencies’ funding programs. Additionally, the report should be instructive to decision makers working to develop consensus on priorities and strategies for increasing the state's receipt of federal grants.

This report begins with a review of the two major classifications of federal financial assistance provided to states. These two classifications are: 1) federal direct expenditures and 2) other financial assistance.

## Federal Direct Expenditures to Florida

Federal direct expenditures constitute actual funding outlays or obligations of the federal government. These expenditures are reported by the U.S. Census Bureau in five categories: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries \& wages.

In 2008, federal direct expenditures to Florida totaled $\$ 150$ billion or $\$ 8,177$ per capita, based on the state's 2008 population estimate of 18.3 million. Florida had the $4^{\text {th }}$ largest expenditure of all states, unchanged from 2007. On a per capita basis, Florida ranked $35^{\text {th }}$ among the states, down from $29^{\text {th }}$.

Direct payments for individuals for retirement and disability constituted the largest category of federal direct expenditure. This category includes Social Security payments, federal retirement and disability payments, and veterans’ benefits. Florida’s direct payments for retirement and disability totaled \$57.7 billion, or $\$ 3,146$ per capita, and accounted for 39 percent of the state's total federal direct expenditures. Florida had the $2^{\text {nd }}$ largest expenditure total of the fifty states and ranked $7^{\text {th }}$ on a per capita basis, both rankings unchanged from 2007.

Considering Florida’s large elderly and retiree populations, these rankings should come as no surprise. According to state population projections produced by the U.S. Census Bureau, Florida's elderly population, defined as age 65 years and over, will total 3.4 million by 2010 and account for 8.5 percent of the nation's total elderly population of 40.2 million. By 2010, the elderly will constitute nearly 18 percent of the state's total population. Relative to other age groupings, the proportion of the states' total population defined as elderly is projected to be greater in Florida than in any other state.

The next largest category of federal direct expenditure was direct payments for
individuals other than for retirement and disability. This category includes such items as Medicare benefits, Excess Earned Income Tax Credits, Unemployment Compensation, and Food Stamp payments. These payments to Florida totaled $\$ 43.9$ billion, or $\$ 2,394$ per capita, and accounted for 29 percent of the state's total federal direct expenditures. Florida had the $3^{\text {rd }}$ largest expenditure total of the fifty states, down from $2^{\text {nd }}$ in 2007, and ranked $9^{\text {th }}$ on a per capita basis, down from $7^{\text {th }}$ in 2007.

Federal grant obligations to Florida totaled $\$ 20.2$ billion, or $\$ 1,104$ per capita, and represented 14 percent of total federal direct expenditures to the state. Florida had the $7^{\text {th }}$ largest obligations total of the fifty states, down from $4^{\text {th }}$ in 2007; and the state ranked $50^{\text {th }}$ on a per capita basis, down from $49^{\text {th }}$ in 2007.

The value of procurement contract obligations totaled $\$ 16.6$ billion, or $\$ 907$ per capita, and accounted for 11 percent of the state's total federal direct expenditures. Florida had the $6{ }^{\text {th }}$ largest obligations total of the fifty states, down from $5^{\text {th }}$ in 2007, and ranked $32^{\text {nd }}$ on a per capita basis, which was unchanged from the prior fiscal year.

The smallest category of federal direct expenditures to Florida was salaries and wages. Such payments totaled $\$ 11.5$ billion, or $\$ 627$ per capita, and accounted for 8 percent of total federal direct expenditures to the state. Florida had the $5^{\text {th }}$ largest expenditure total of the fifty states, down from $4^{\text {th }}$ in 2007; and the state ranked $35^{\text {th }}$ on a per capita basis, down from $33^{\text {rd }}$ in 2007.

## Other Financial Assistance to Florida

Other financial assistance consists of the face value of federal insurance coverage as well as the dollar volume of federal guaranteed and direct loans. Other financial assistance to Florida totaled $\$ 487$ billion or $\$ 26,555$ per capita. The state ranked first among the fifty states in both total and per capita assistance due to the significant face value of flood insurance coverage provided to Florida, which constituted 96 percent of total other financial assistance provided to the state by the federal government.

The total amounts of other federal assistance to Florida are summarized below:

## Face Value of Insurance Coverage

Total: $\$ 472$ billion; Rank: $1^{\text {st }}$ (1t in 2007)
Per Capita: \$25,740; Rank: $1^{\text {st }}$ ( $1^{\text {st }}$ in 2007)

## Dollar Volume of Guaranteed Loans

Total: $\$ 13.8$ billion; Rank: $3^{\text {rd }}$ ( $3^{\text {rd }}$ in 2007)
Per Capita: \$755; Rank: 41 ${ }^{\text {st }}$ (32 ${ }^{\text {nd }}$ in 2007)

## Dollar Volume of Direct Loans

Total: $\$ 1.1$ billion; Rank: $16^{\text {th }}$ (15 ${ }^{\text {th }}$ in 2007)
Per Capita: \$60; Rank: $42^{\text {nd }}$ (46 ${ }^{\text {th }}$ in 2007)

## How Florida Compares to Other Populous States

The U.S. Census Bureau reported that the federal direct expenditures (i.e., direct payments for individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, and salaries and wages) to the fifty states totaled $\$ 2.70$ trillion in 2008, up from $\$ 2.47$ trillion in 2007. The combined federal direct expenditures to the
seven most populous states of California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio, totaled $\$ 1.17$ trillion or 42 percent of the fifty states' total.

The total federal direct expenditures of the seven most populous states are as follows:

1. California: $\$ 300$ billion
2. Texas: $\$ 210$ billion
3. New York: $\$ 174$ billion
4. Florida: $\mathbf{\$ 1 5 0}$ billion
5. Pennsylvania: $\$ 122$ billion
6. Illinois: $\$ 101$ billion
7. Ohio: $\$ 91$ billion

However, as illustrated below, the states' respective rankings change when controlling for population differences. The per capita federal direct expenditures of these same seven states are as follows:

1. Pennsylvania: $\$ 9,764\left(1^{\text {st }}\right.$ in 2007)
2. New York: $\$ 8,931$ ( ${ }^{\text {rd }}$ in 2007)
3. Texas: $\$ 8,633$ ( $5^{\text {th }}$ in 2007)
4. Florida: $\mathbf{\$ 8 , 1 7 7}\left(4^{\text {th }}\right.$ in 2007)
5. California: $\$ 8,160$ ( $6^{\text {th }}$ in 2007)
6. Ohio: $\$ 7,887$ ( $2^{\text {nd }}$ in 2007)
7. Illinois: $\$ 7,803$ ( $7^{\text {th }}$ in 2007 )

## Florida's Receipt of Federal Grants

Federal grants continue to be important sources of revenue utilized by our nation's state and local governments to provide necessary infrastructure and services to their residents. Federal grant expenditures (i.e., actual outlays) to the fifty states totaled $\$ 449$ billion in fiscal year 2008.

As opposed to the $\$ 20.2$ billion of federal grant obligations to Florida previously
discussed, federal grant expenditures to our state and local governments totaled $\$ 20.7$ billion, or $\$ 1,127$ per capita. Florida had the $4^{\text {th }}$ largest federal grants expenditure of the fifty states, unchanged from 2007, and the state ranked $46^{\text {th }}$ on a per capita basis, down from $45^{\text {th }}$ in 2007.

The grant funding received from six federal departments (i.e., Health and Human Services, Transportation, Education, Housing and Urban Development, Agriculture, and Homeland Security) totaled $\$ 20$ billion and accounted for 97 percent of all grants expenditures to Florida. A summary of these grant expenditures to Florida as well as some of the more well-known program categories within these departments are listed below:

## Health and Human Services Grants

Total: $\$ 11.4$ billion; Rank: $5^{\text {th }}$ (5 $5^{\text {th }}$ in 2007)
Per Capita: \$623; Rank: $46^{\text {th }}$ ( $46^{\text {th }}$ in 2007)

- Centers for Medicare and Medicaid Services
- Administration for Children and Families

## Transportation Grants

Total: $\$ 2.8$ billion; Rank: $4^{\text {th }}$ ( $3^{\text {rd }}$ in 2007)
Per Capita: \$151; Rank: $37^{\text {th }}$ ( $35^{\text {th }}$ in 2007)

- Federal Highway Administration
- Federal Transit Administration
- Federal Aviation Administration

## Education Grants

Total: $\$ 2.0$ billion; Rank: $4^{\text {th }}$ (4 $4^{\text {th }}$ in 2007)
Per Capita: \$109; Rank: $37^{\text {th }}$ ( $31^{\text {st }}$ in 2007)

- Office of Elementary and Secondary Education
- Office of Special Education and Rehabilitative Services
- Office of Vocational and Adult Education

## Housing \& Urban Development Grants

Total: $\$ 1.6$ billion; Rank: $8^{\text {th }}\left(10^{\text {th }}\right.$ in 2007)
Per Capita: \$89; Rank: $30^{\text {th }}$ ( $36^{\text {th }}$ in 2007)

- Housing Programs
- Community Planning and Development

## Agriculture Grants

Total: $\$ 1.3$ billion; Rank: $4^{\text {th }}$ ( $4^{\text {th }}$ in 2007)
Per Capita: \$69; Rank: $40^{\text {th }}$ ( $42^{\text {nd }}$ in 2007)

- Food and Nutrition Services
- Cooperative State Research, Education and Extension Services
- Rural Development Activities

## Homeland Security Grants

Total: $\$ 872$ million; Rank: $3^{\text {rd }}$ (2 ${ }^{\text {nd }}$ in 2007)
Per Capita: \$48; Rank: $18^{\text {th }}$ ( $7^{\text {th }}$ in 2007)

- Federal Emergency Management Agency
- Domestic Preparedness and Antiterrorism Programs

## Federal Grants to Florida in Recent Years

Since 1996 the LCIR has conducted an annual review of federal funding to Florida using the U.S. Census Bureau's data. Federal grant expenditures to Florida have increased significantly during this period.

Between 1996 and 2008, federal grant expenditures increased 145 percent from $\$ 8.4$ billion to $\$ 20.7$ billion, which equates to an
average annual growth rate of 12.1 percent. Florida's ranking among all states in total grant expenditures improved from $7^{\text {th }}$ in 1996 to $4^{\text {th }}$ in 2008. However, much of this substantial growth in federal grant expenditures to Florida occurred between 1997 and 2003. In fact, between 2004 and 2008, the average annual growth rate was only 3.4 percent.

Florida's relative share of grant expenditures to the fifty states increased from 3.9 percent in 1996 to 4.6 percent in 2008, down from 4.7 percent in 2007. Interestingly, Florida's relative share of the total population of the fifty states increased from 5.4 percent in 1996 to 6.0 percent in 2008.

Florida's per capita federal grant expenditure increased from \$586 in 1996 to \$1,127 in 2008. Although Florida's per capita ranking has shown some upward movement in recent years, it still remains low. The state's per capita ranking improved from $48^{\text {th }}$ in 1996 to its highest level of $43^{\text {rd }}$ in 2005, but dropped back to $46^{\text {th }}$ in 2008.

## Conclusion

Although this report provides an overview of the various types of federal funding to Florida, the focus is on federal grant expenditures. Despite Florida’s low per capita federal grants expenditure, $46^{\text {th }}$ in 2008, federal assistance to our state, primarily in the form of grant funding, accounted for 29.3 percent of state government's total direct revenue during the 2007-08 fiscal year, according to the Florida Consensus Estimating Conference's most recent Long Term Revenue Analysis (Fall 2008).

Numerous reasons exist for Florida’s low per capita federal grants funding; however, three likely explanations are of particular significance. First, many funding formulas are based on outdated population figures or other factors that do not reflect the state's rapid growth in recent decades. Congressional support to revise funding formula inequities is difficult to obtain if other states stand to lose federal funds under revised formulas that benefit Florida. Second, small state minimums in formula allocations disadvantage more populous states like Florida. Third, Florida may not be aggressively pursuing all federal grant opportunities.

Several years ago, the LCIR surveyed Florida's state agencies regarding the receipt of federal grants. In response to the question of why the state ranked low in the per capita receipt of many federal grants, state agencies offered a number of explanations. Such explanations included a lack of sufficient state matching funds, federal "strings" or policy requirements serving as conditions for receipt of federal grants funding, and cutbacks in federal funding.

In this report, the LCIR utilized the per capita measure to control for population differences among states. However, such a measure does not take into consideration levels of need or utilization. State agency representatives have previously noted that per capita measurements of certain federal grants receipts, while low compared to other states, might not have reflected the fact that such funding was adequately serving the target populations.

On a per capita basis, only four states received less in federal grants than Florida during fiscal year 2008. The state's per capita federal
grants expenditure in 2008 was $\$ 353$ less than the national per capita expenditure. Furthermore, this difference or "gap" between the state and national per capita federal grants expenditure figures continues to increase. In 2006 and 2007, the gap was $\$ 295$ and $\$ 331$, respectively. Clearly, Florida’s overall receipt of federal grants has not been keeping pace with statewide population growth in recent years.

By taking Florida's expenditure gap in a given year and multiplying it by the respective statewide population, it is possible to calculate the amount of federal grants revenue that separated Florida from the national average. Had Florida's per capita grants expenditure of $\$ 1,127$ in 2008 equaled just the national average of $\$ 1,480$, then this state would have received $\$ 6.5$ billion in additional grant funding. If the state's per capita grants expenditure equaled just the national average in each year during the 1996 to 2008 time period, then Florida would have received $\$ 62$ billion more in federal grant funding.

## Recommendations

During the 2007-08 legislative interim, the LCIR staff undertook a research project entitled, Federal Grants - How Florida's Local Governments Can Improve, to identify federal grants that the state's local governments receive and determine if similarly situated local governments are eligible to participate in those grant programs. The results of that research project were published in the Committee's June 2008 report entitled Federal Grants to Florida's Local Governments.

A number of recommendations, many of which have been included in prior editions of this annual report, as well as several new recommendations included in the June 2008 report, Federal Grants to Florida Local Governments, are offered as ways to potentially increase Florida's receipt of federal grants.

Local governments should take the following steps to increase their receipt of grant funds:

- Register with www.Grants.gov and take full advantage of all this interactive website has to offer.
- As www.Grants.gov website continues to evolve, local governments should provide feedback on future improvements, such as timeframes and uniformity of application processes and forms.
- Collaborate with other local governments and regional entities to explore meeting eligibility requirements of certain grants.
- Using data posted on the LCIR's website, www.floridalcir.gov, local governments can compare themselves with neighboring or similarly situated local governments to ascertain whether they are taking full advantage of available grant opportunities.
- Once suitable grants have been identified, local government staff should develop a direct rapport with personnel from the granting agency through phone and e-mail contact whenever possible.
- Conduct cost-benefit analyses to assess the fiscal value of hiring grant writers.
- Identify federal and state policy changes needed to enhance Florida's access to federal funding streams.
- Support state efforts to form coalitions with similarly-situated states to pursue changes in outdated or inequitable federal funding formulas.
- Work with the state and Congress to implement changes to federal funding formulas determined to be outdated or inequitable.
- Vigorously pursue increased availability of state matching funds or other locally available funds.
- Invest in training provided at the state and local levels for accessing federal and state grant funding.
- Increase communication and coordination on federal funding issues among state agencies, the Governor's Office, the Florida Washington Office, the Legislature, and the congressional delegation.
- When competing with local governments from other states for non-formula grants, enlist assistance from congressional offices, which are typically able to provide letters of support.

The Department of Environmental Protection may wish to consider:

- Advocating for amendment to Governor's Executive Order 95-359 to clarify and streamline the role and function of the Single Point of Contact (SPOC) housed
within the department, and any appropriate statutory changes to s. 403.061(40), F.S.
- Alternatively, evaluating the benefit to the state and local governments of the SPOC and determining whether the SPOC should be dispensed with or maintained.

## Introduction

The Florida Legislative Committee on Intergovernmental Relations (LCIR) annually reviews the state's receipt of federal funds. The purpose of this report is to provide the Legislature and other interested parties with an overview and analysis of federal financial assistance to Florida. In particular, the report focuses on federal grants to Florida's state and local governments. This review is intended to be part of an ongoing strategy to improve federal-state relations generally and facilitate the development of strategies to increase the return of federal tax dollars to the state.

The LCIR reviewed and analyzed federal expenditure data for federal fiscal year 2008 (i.e., October 1, 2007 to September 30, 2008) using data obtained from two U.S. Census Bureau publications: Consolidated Federal Funds Report for Fiscal Year 2008 and Federal Aid to States for Fiscal Year 2008, both issued in July 2009. Two types of federal financial assistance to states are documented in this report. These types are federal direct expenditures and other financial assistance.

Federal direct expenditures constitute actual outlays or obligations of the federal government. These expenditures are reported by the U.S. Census Bureau in five categories: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries and wages. Federal direct expenditures to the state totaled $\$ 150$ billion or $\$ 8,177$ per capita.

Other financial assistance does not constitute actual outlays but, in large measure, reflects the contingent liability of the federal government via the face value of insurance coverages and the dollar volume of loans made. Other financial assistance to Florida totaled \$487 billion or \$26,555 per capita.

This report is divided into four parts and includes one appendix.
Part One discusses the types of federal financial assistance to states by addressing the five categories of federal direct expenditure and the three categories of other financial assistance. A series of tables summarize dollar amounts of federal financial assistance to the fifty states collectively, and Florida specifically. In addition, Florida’s rankings among the fifty states, the seven most populous states, and the sixteen southern states on the basis of total and per capita funding are included.

Part Two summarizes federal direct expenditures to each of Florida's sixty-seven counties by addressing total expenditures by category, per capita expenditures by category, and category expenditures as a percentage of total expenditures.

Part Three focuses on federal grant expenditures to state and local governments. A series of tables provide detailed summaries of grant expenditures to Florida by federal agency. Additionally, Florida's rankings among the fifty states, the seven most populous states, and the sixteen southern states on the basis of total and per capita expenditures are listed.

Part Four examines the states' per capita federal grant expenditures by agency as a percentage of the national per capita expenditures. The intent is to show how the states fare, relative to the national average, after controlling for population differences.

The Appendix lists the websites of federal agencies.

## Additional LCIR Resources

In addition to this report summarizing federal funding to Florida in fiscal year 2008 and prior reports summarizing federal funding to the state in previous fiscal years, ${ }^{1}$ the LCIR has published the following reports relating to Florida’s receipt of federal grants.

March 2009: Local Government Grant Expenditures Associated with the High Intensity Drug Trafficking Area (HIDTA) Designation. ${ }^{2}$

February 2009: Federal Grants to Florida's Local Governments (Updated to Include Expenditures in FY 2007). ${ }^{3}$

October 2008: Federal Grant Expenditures by School District. ${ }^{4}$
June 2008: Federal Grants to Florida's Local Governments. ${ }^{5}$
Furthermore, the Committee has compiled federal grant expenditures to Florida's county and municipal governments in fiscal years 2005-07 as well as to the states' school districts in fiscal years 2006-07. These data files can be downloaded from the Committee's website. ${ }^{6}$

[^0]
## Part One: <br> Federal Financial Assistance to Florida

## A. Introduction

This part summarizes the five categories of federal direct expenditures (i.e., direct payments for individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, and salaries and wages) provided to Florida. Three categories of other financial assistance (i.e., insurance coverage, guaranteed loans, and direct loans) are summarized as well. Reported dollar amounts for these other assistance programs represent the face value of insurance coverage or the dollar volume of loans made rather than actual expenditures.

## B. Data Source

The source of the data summarized in this part is the U.S. Census Bureau publication entitled Consolidated Federal Funds Report for Fiscal Year 2008 issued in July 2009. This publication presents federal government expenditures or obligations in state, county, and subcounty areas of the United States. Although the Census Bureau's report includes the relevant data for the District of Columbia and U.S. outlying areas, the focus here is on the assistance provided to the fifty states collectively and Florida specifically.

The financial activity of all federal government agencies is covered except for those agencies that do not submit data to any of the federal reporting systems that serve as information sources for the Census Bureau's report. As a general guide, the grants and procurement data represent obligated funds, while the direct payments and salaries and wages data represent actual expenditures.

## C. Federal Financial Assistance to Florida

The distribution of federal financial assistance to states in fiscal year 2008 is summarized in Table 1-1 on page 9. Federal direct expenditures to the fifty states totaled $\$ 2.70$ trillion or $\$ 8,904$ per capita while other financial assistance totaled $\$ 1.60$ trillion or $\$ 5,267$ per capita. Federal direct expenditures to Florida totaled $\$ 150$ billion or $\$ 8,177$ per capita, and other financial assistance totaled $\$ 487$ billion or $\$ 26,555$ per capita.

Federal direct expenditures to Florida constituted approximately 5.5 percent of such expenditures to all fifty states. Florida had the $4^{\text {th }}$ largest expenditure of all states and the seven most populous states, and the $2{ }^{\text {nd }}$ largest expenditure of the southern states, after Texas. ${ }^{1}$ On a per capita basis, the

[^1]state ranked $35^{\text {th }}$ among all states, $4^{\text {th }}$ among the most populous states, and $13^{\text {th }}$ among the southern states.

Other financial assistance to Florida constituted 30 percent of such assistance to all fifty states. The state ranked first among all states in both total and per capita assistance due to the significant face value of flood insurance coverage.

## D. Federal Direct Expenditures

As previously mentioned, there are five categories of federal direct expenditures: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries and wages. Each of these categories is discussed in more detail in the following sections.

## 1. Direct Payments for Individuals for Retirement and Disability

Retirement and disability payments represented the largest category of federal direct expenditure to states. Such payments totaled $\$ 809$ billion, or $\$ 2,665$ per capita, and represented approximately 30 percent of total direct expenditures to states. These payments to Florida totaled $\$ 57.7$ billion, or \$3,146 per capita, and accounted for 39 percent of total direct expenditures to the state. Florida had the $2^{\text {nd }}$ largest expenditure of all states and the most populous states, after California; and the largest expenditure of the southern states. On a per capita basis, Florida ranked $7^{\text {th }}$ among all states; $2^{\text {nd }}$ among the most populous states, and $5^{\text {th }}$ among the southern states.

As illustrated in Table 1-2 on page 10, this category includes four types of payments: 1) Social Security payments, 2) federal retirement and disability payments, 3) veterans benefits, and 4) other payments. In Florida, Social Security payments accounted for 79 percent of the state's total value of federal retirement and disability payments to individuals.

Florida’s large elderly population is a primary reason for the state’s high per capita expenditure relative to other states. According to state population projections issued by the U.S. Census Bureau, Florida's elderly population (i.e., age 65 years and over) will total 3.4 million by 2010 and account for 8.5 percent of the nation's total elderly population of 40.2 million. In Florida, the elderly will constitute nearly 18 percent of the state's total population. Relative to other age groupings, the proportion of the states' total population defined as elderly is projected to be greater in Florida than any other state.

## 2. Direct Payments for Individuals Other Than for Retirement and Disability

These payments represented the second largest category of federal direct expenditure to states. Such payments totaled $\$ 624$ billion, or $\$ 2,056$ per capita, and represented approximately 23 percent of total direct expenditures to states. These payments to Florida totaled $\$ 43.9$ billion, or $\$ 2,394$ per
capita, and accounted for 29 percent of total direct expenditures to the state. As illustrated in Table $\mathbf{1 - 3}$ on page 11, this category includes eight types of payments. Medicare benefits accounted for 76 percent of other direct payments to the state. Florida had the $3^{\text {rd }}$ largest expenditure of all states and the most populous states, after California and New York; and the largest expenditure of the southern states. On a per capita basis, Florida ranked $9^{\text {th }}$ among all states, $2^{\text {nd }}$ among the most populous states, and $3^{\text {rd }}$ among the southern states.

## 3. Grants

Grant obligations represented the third largest category of federal direct expenditure to states. These obligations to states totaled $\$ 562$ billion, or $\$ 1,852$ per capita, and represented 21 percent of total direct expenditures. These grant obligations to Florida totaled $\$ 20.2$ billion, or $\$ 1,104$ per capita, and represented 14 percent of total direct expenditures to the state. As illustrated in Table 1-4 on pages $12-13$, Florida had the $7^{\text {th }}$ largest expenditure of all states; the $6^{\text {th }}$ largest expenditure of the most populous states; and the $2^{\text {nd }}$ largest expenditure of the southern states. On a per capita basis, Florida ranked last among all states.

A more in-depth discussion of federal grant expenditures (i.e., actual outlays) to state and local governments is addressed in Part Three of this report. The amount of total grant obligations to Florida discussed here is approximately $\$ 0.5$ billion less than the amount of total grant expenditures listed in Part Three. The funding amount presented here includes obligations to state and local governments as well as non-governmental entities while the funding amount presented in Part Three reflects expenditures to state and local governments only. The grant expenditures total is greater than the grant obligations total because expenditures in the current year can reflect amounts obligated in the current year as well as prior years.

## 4. Procurement Contracts

Procurement contracts represented the fourth largest category of federal direct expenditure to states. Such payments to states totaled $\$ 476$ billion, or $\$ 1,569$ per capita, and represented 18 percent of total direct expenditures. These payments to Florida totaled $\$ 16.6$ billion, or $\$ 907$ per capita, and represented 11 percent of total direct expenditures to the state. As illustrated in Table 1-5 on pages 14-15, Florida had the $6^{\text {th }}$ largest expenditure of all states, the $4^{\text {th }}$ largest expenditure of the most populous states and the southern states. On a per capita basis, Florida ranked $32^{\text {nd }}$ among all states, $5^{\text {th }}$ among the most populous states, and $11^{\text {th }}$ among the southern states.

This category includes contract awards to the Department of Defense and non-defense agencies. In Florida, contracts awarded by the Department of Defense accounted for 74 percent of total procurement contracts awarded.

## 5. Salaries and Wages

Federal salary and wage payments represented the smallest category of direct expenditure to states. Such payments to states totaled $\$ 231$ billion, or $\$ 762$ per capita, and represented 9 percent of total direct expenditures. These payments to Florida totaled $\$ 11.5$ billion, or $\$ 627$ per capita, and represented 8 percent of direct expenditures to the state. As illustrated in Table 1-6 on pages 16-17, Florida had the $5^{\text {th }}$ largest expenditure of all states, the $3^{\text {rd }}$ largest expenditure of the most populous states, and the $4^{\text {th }}$ largest expenditure of the southern states. On a per capita basis, Florida ranked $35^{\text {th }}$ among all states, $2^{\text {nd }}$ among the most populous states, and $15^{\text {th }}$ among the southern states.

This category includes salary and wage payments made by the Department of Defense and nondefense agencies. In Florida, the payments made by non-defense agencies accounted for 66 percent of total salary and wage payments.

## 6. Summary

One way to assess how individual states are doing in their fiscal relationship with the federal government is to calculate each state's proportional share for each direct expenditure category. If the state's share for each expenditure category is roughly equivalent to the state's share of the national population, then perhaps a measure of equality has been satisfied. The shares for each state are summarized in Table 1-7 on pages 18-19.

The first column lists each state's share of the July 1, 2008 national population. The next column lists each state's share of total federal direct expenditure with subsequent columns listing the states' shares for each of the five components of federal spending. Based on the percentages listed, Vermont is the best example of a state that reflects an average performance with a 0.2 percent share of the national population and identical shares for three of the five separate components of federal spending. Other states reflecting average performances include Delaware, Idaho, Kansas, Maine, Mississippi, Montana, Nebraska, New Hampshire, North Dakota, Rhode Island, South Dakota, West Virginia, and Wyoming.

Florida recorded 6.0 percent of the national population but only 5.5 percent of total direct expenditures. At 7.1 and 7.0 percent, the state's proportional shares for direct payments for retirement/disability and other direct payments, respectively, were well above the 6.0 percent average. However, the state's proportional shares for each of the remaining components were well below the 6.0 percent average with 3.6 percent for grant obligations, 3.5 percent for procurement contracts, and 5.0 percent for salaries and wages.

This type of analysis may be useful with respect to grant funding since many grant formulas rely on national population, or some variation of it, to distribute funds. Interestingly, New York had the largest positive percentage difference between its share of the grant obligations (i.e., 9.7 percent) and its share of national population (i.e., 6.4 percent). Florida had the largest negative percentage
difference between its share of the grant obligations (i.e., 3.6 percent) and its share of national population (i.e., 6.0 percent).

## E. Other Financial Assistance

The three categories of other financial assistance are: 1) face value of insurance coverages, 2) dollar volume of guaranteed loans, and 3) dollar volume of direct loans. Other financial assistance to Florida totaled $\$ 487$ billion, or $\$ 26,555$ per capita. Florida's share constituted 30 percent of such assistance to all states. The state ranked first among the fifty states in both total and per capita assistance due to the significant face value of flood insurance coverage provided to Florida.

## 1. Face Value of Insurance Coverage

The face value of insurance coverage represented the largest category of other financial assistance to states. Such assistance to states totaled $\$ 1.27$ trillion, or $\$ 4,172$ per capita, and represented 79 percent of other financial assistance provided to all states. Such coverage in Florida totaled $\$ 472$ billion, or $\$ 25,740$ per capita, and represented 97 percent of other financial assistance provided to the state by the federal government. Florida had the largest face value of insurance coverage of the fifty states and ranked first among the states in both total and per capita insurance coverage. As illustrated in Table 1-8 on page 20, flood insurance accounted for 99 percent of the total face value of all federal insurance coverage provided to the state.

## 2. Dollar Volume of Guaranteed Loans

The second largest category of other financial assistance to states was guaranteed loans. Such assistance to the fifty states totaled $\$ 295$ billion, or $\$ 972$ per capita, and represented 19 percent of other financial assistance provided to states by the federal government. These loans to Florida totaled $\$ 13.8$ billion, or $\$ 755$ per capita, and represented only 3 percent of other financial assistance to the state. As illustrated in Table 1-9 on page 21, Mortgage Insurance for Homes accounted for 62 percent of the total dollar volume of federal guaranteed loans made to the state. Florida had the $3^{\text {rd }}$ largest dollar volume of all states and the most populous states, and the $2^{\text {nd }}$ largest volume of the southern states. On a per capita basis, Florida ranked $34^{\text {th }}$ among all states, $4^{\text {th }}$ among the most populous states, and $13^{\text {th }}$ among the southern states.

## 3. Dollar Volume of Direct Loans

Direct loans represented the smallest category of other financial assistance provided to states. Such assistance to the fifty states totaled $\$ 37$ billion, or $\$ 123$ per capita, and represented 2 percent of other financial assistance to states. These loans to Florida totaled $\$ 1.1$ billion, or $\$ 60$ per capita, and represented only 0.2 percent of other financial assistance to the state. As illustrated in Table 1-10 on page 22, Florida had the $16^{\text {th }}$ largest dollar volume of all states, the $7^{\text {th }}$ largest volume of the most populous states, and the $5^{\text {th }}$ largest volume of the southern states. On a per capita basis, Florida
ranked $42^{\text {nd }}$ among all states, and last among the most populous states and the southern states.

## 4. Summary

Using the same methodology applied in Table 1-7, Table 1-11 on page 23 accesses how individual states did in their fiscal relationship with the federal government with respect to the various types of other financial assistance offered to states.

While Florida recorded 6.0 percent of the national population, it recorded 30.4 percent of total other financial assistance. Due to the effect of federal flood insurance, Florida's proportional share for insurance programs at 37.3 percent was greater than the 6.0 percent average; however, the state's proportional shares for guaranteed loans at 4.7 percent and for direct loans at 2.9 percent were less than its share of the national population.

## F. Conclusion

Federal direct expenditures represent either actual expenditures or obligations of the federal government to this state. By contrast, the reported amounts of other financial assistance reflect the face value of insurance coverage and the dollar volume of loans made.

Florida had high per capita expenditures for federal direct payments for individuals when compared to the national average. This was due primarily to the state's large retiree and elderly populations. However, in the remaining categories of federal direct expenditure (i.e., grants, procurement contracts, and salaries and wages), Florida had per capita expenditures that were considerably lower than the national average.

The allocation of federal financial assistance has significant impacts on the finances of state and local governments. Since numerous federal policies govern the distribution of federal funding to states, future policy changes will likely affect individual states quite differently. Knowing the magnitude of such financial assistance to Florida should be useful to policy makers as they assess strategies for increasing the state's share of federal funding.

| 2) Funding figures for federal direct expenditures represent either actual expenditures or obligations. Generally, the federal grants and procurement data represent obligated funds, while the direct payments to individuals and salaries and wages represent actual expenditures. Direct and guaranteed loan figures represent the dollar volume of loans made. Data on insurance coverages represent the face value of coverage provided. In the published report, the funding data are rounded to the nearest thousand dollars. |  |  |  |  |  |  |  |  |  |
| 3) Based on July 1, 2008 population estimates, the seven most populous states, in descending population order, were: California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio. 4) As designated by the U.S. Census Bureau, Florida is one of 16 states in the South region. The other states in the South region are: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia. |  |  |  |  |  |  |  |  |  |

| Funding Categories / Subcategories | Amount | Total | All | Populous | Region | Amount | All | Populous | Region |

Notes

1) In the published report, the data are rounded to the nearest thousand dollars
2) An asterisk indicates that one or more states had no reported federal grant obligations
3) Based on July 1, 2008 population estimates, the seven most populous states, in descending population order, were: California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio
4) As designated by the U.S. Census Bureau, Florida is one of 16 states in the South region. The other states in the South region are: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

| Florida as \% of All States | 37.3\% |  |  |  |  |  |  |  |  |

Notes:
In the published report, the data are rounded to the nearest thousand dollars.
2) An asterisk indicates that one or more states had no reported federal insurance coverages.
3) Based on July 1, 2008 population estimates, the seven most populous states, in descending population order, were: California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio.
4) As designated by the U.S. Census Bureau, Florida is one of 16 states in the South region. The other states in the South region are: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

## Part Two: <br> Federal Direct Expenditures to Florida Counties

## A. Introduction

Federal spending can significantly impact the finances of local governments. The purpose of this part is to illustrate how the $\$ 150$ billion in federal direct expenditures to Florida in fiscal year 2008 was distributed among the state's sixty-seven counties.

## B. Data Source

The source of the data summarized in this part is the U.S. Census Bureau publication entitled Consolidated Federal Funds Report for Fiscal Year 2008. This publication summarizes federal government expenditures or obligations to states, counties, and subcounty areas. However, the focus here is on the distribution of federal direct expenditures among Florida’s counties, as geographic areas rather than units of local government.

## C. Geographic Coding of Federal Direct Expenditures

The basis for the geographic coding of federal direct expenditures to counties varies depending on the data sources; however, the following general guidelines apply. For salaries and wages, the distribution is based on the place of employment. The distribution of procurement contract awards is based on the place of performance. For retirement and disability payments as well as other direct payments, the distribution is based on the recipient's location.

The distribution of grants is based on the location of the initial recipient. For grants that are ultimately distributed throughout the state, the reader should note that significant dollar amounts are included in Leon County's total, which reflects the data coding of such grants to state government as the initial recipient. Many federal grants involve a direct payment to state government that is then responsible for program administration. Such examples include those grants that are 'passedthrough' to local governments. Another example includes those grants, such as for highway construction, in which the financial impact is spread over all areas of the state. A third example includes those grant programs that the state government administers but for which the ultimate beneficiaries are found throughout the state.

## D. Federal Direct Expenditures by County

As previously mentioned, federal direct expenditures are categorized as direct payments to individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, or salaries and wages. The distribution of such expenditures within Florida is discussed in more detail in the following sections.

## 1. Federal Direct Expenditures by Category

The distribution of the $\$ 150$ billion in federal direct expenditures by county geographic area is summarized in Table 2-1 on pages 24-25. In total, the magnitude of federal direct expenditures varied significantly by county from a low of $\$ 38$ million within Glades County to a high of $\$ 13.6$ billion within Leon County.

Direct payments for individuals for retirement and disability totaled $\$ 57.7$ billion statewide. The value of such payments varied from a low of $\$ 14.5$ million within Lafayette County to a high of $\$ 4.8$ billion within Miami-Dade County. Such payments to individuals totaled one billion dollars or more in 18 counties: Brevard, Broward, Collier, Duval, Escambia, Hillsborough, Lake, Lee, Manatee, Marion, Miami-Dade, Orange, Palm Beach, Pasco, Pinellas, Polk, Sarasota, and Volusia.

Direct payments to individuals other than for retirement and disability totaled $\$ 43.9$ billion statewide. Such payments ranged from a low of $\$ 9.5$ million within Lafayette County to a high of $\$ 5.8$ billion within Leon County. Other direct payments to individuals totaled one billion dollars or more in 11 counties: Broward, Duval, Hillsborough, Lee, Leon, Orange, Palm Beach, Pasco, Pinellas, Sarasota, and Volusia.

Federal grant obligations totaled $\$ 20.2$ billion statewide. Leon County had the largest grant obligation at $\$ 6.8$ billion; Glades County had the smallest at $\$ 4.8$ million. Although the majority of Leon County's total is due to the coding issue previously discussed, reported grant obligations still exceeded $\$ 200$ million in 14 other counties: Alachua, Brevard, Broward, Duval, Escambia, Hillsborough, Lee, Marion, Miami-Dade, Orange, Palm Beach, Pinellas, Polk, and Volusia.

Federal procurement contracts totaled $\$ 16.6$ billion statewide. The value of such contracts ranged from a low of $\$ 199,000$ within Glades County to a high of $\$ 3.7$ billion within Orange County. In addition to Orange County, Bay, Brevard, Duval, Hillsborough, Miami-Dade, Okaloosa, and Pinellas counties each had contracts valued greater than $\$ 500$ million.

Federal salary and wage payments totaled $\$ 11.5$ billion statewide. The value of such payments varied from a low of $\$ 863,000$ within Glades County to a high of $\$ 1.5$ billion within Miami-Dade County. Federal salary and wage payments totaled $\$ 200$ million or more in 13 counties: Alachua, Bay, Brevard, Broward, Duval, Escambia, Hillsborough, Miami-Dade, Okaloosa, Orange, Palm Beach, Pinellas, and Walton.

## 2. Per Capita Federal Direct Expenditures by Category

Table 2-2 on pages 26-27 lists the per capita federal direct expenditures by category within each county geographic area. Excluding Leon County due to the data coding of significant federal funding to the seat of state government, per capita total direct expenditures varied significantly from a low of $\$ 3,357$ within Glades County to a high of $\$ 17,393$ within Okaloosa County.

Per capita direct payments to individuals for retirement and disability varied from a low of \$1,754 within Lafayette County to a high of $\$ 5,719$ within Lake County. Per capita direct payments to individuals other than for retirement and disability ranged from a low of $\$ 307$ within Miami-Dade County to a high of $\$ 3,067$ within Pinellas County.

Again excluding Leon County from consideration, per capita grants varied from a low of \$220 within Osceola County to a high of $\$ 2,397$ within Jackson County. Of the ten counties having the highest per capita grants figures, eight are less populated, rural counties in the northwest and north central regions of the state, which demonstrates the relative importance of federal grants as a revenue sources in these counties.

Per capita procurement contracts varied from a low of $\$ 18$ within Glades County to a high of $\$ 7,361$ within Okaloosa County. Per capita salary and wage payments ranged from a low of $\$ 76$ within Glades County to a high of $\$ 6,387$ within Walton County. Federal procurement and salary and wage spending associated with Eglin Air Force Base in northwest Florida are factors in Okaloosa and Walton counties' high per capita dollar figures, respectively.

## 3. Federal Direct Expenditures by Category as a Percentage of Total

Table 2-3 on pages 28-29 provides a county-by-county list of federal direct expenditures by category as a percentage of total expenditures. A number of factors explain differences in counties’ proportional shares attributable to each expenditure category. For example, the relative share attributable to federal direct payments to individuals was generally highest in counties with large elderly or retiree populations, such as Clay, Flagler, and Santa Rosa; or with proportionately larger populations receiving certain benefits, such as Broward, De Soto, and Pasco. The relative share attributable to federal grants (excluding Leon County) was highest in less populated, rural counties such as Gadsden, Jefferson, and Madison. The relative share attributable to federal procurement was highest in counties such as Brevard, Okaloosa, and Orange, which are engaged in significant military and space-related contracting. The relative share attributable to federal salary and wage payments was generally highest in those counties such as Okaloosa and Walton where military installations are located.

## E. Conclusion

The economic impact of federal direct expenditures varies significantly from county to county. Past changes in federal spending have had unequal impacts on local economies. Likewise, future changes in the receipt of federal funding are likely to affect areas of the state quite differently. This information should be useful to policy makers as they assess the impact of future changes in federal direct expenditures on Florida’s local economies.

## Part Three: <br> Federal Grants to Florida's State and Local Governments

## A. Introduction

Federal grant expenditures to Florida’s state and local governments totaled \$20.7 billion, or \$1,127 per capita, in fiscal year 2008. Florida had the $4^{\text {th }}$ largest expenditure of all states and the seven most populous states, and the $2{ }^{\text {nd }}$ largest expenditure of the southern states, after Texas. ${ }^{1}$ Compared to 2007, Florida's rankings were unchanged. On a per capita basis, Florida ranked $46{ }^{\text {th }}$ among all states, last among the most populous states, and $14^{\text {th }}$ among the southern states. The state's per capita rankings among the most populous and southern states were unchanged from 2007; however, Florida's per capita ranking among all states dropped from $45^{\text {th }}$ to $46^{\text {th }}$.

A summary of Florida's federal grant expenditures by department or agency can be found in Table 3-1 on page 39. In addition to total reported expenditures, calculations of per capita expenditures have been included. Florida's rankings among the fifty states, the seven most populous states, and the other southern states on the basis of total and per capita expenditures are listed as well. Of the $\$ 20.7$ billion in total grant expenditures to Florida in 2008, the grant funding received from six federal departments: Health and Human Services, Transportation, Education, Housing and Urban Development, Agriculture, and Homeland Security totaled $\$ 20$ billion and accounted for 97 percent of all grant expenditures to Florida.

## B. Data Sources

The data reported in this part was obtained from the U.S. Census Bureau publication entitled Federal Aid to States for Fiscal Year 2008 issued July 2009. The Census Bureau’s publication presents federal expenditures to state and local governments by state and U.S. outlying areas. However, the focus of this part is on the total expenditures made to the fifty states collectively and the expenditures by program category made to Florida.

The total grant expenditures to Florida of $\$ 20.7$ billion are slightly more than the state's federal grant obligations of $\$ 20.2$ billion discussed previously in Part One. This difference results from the use of the Federal Aid to States (FAS) report as the data source here as opposed to the use of the Consolidated Federal Funds Report (CFFR). The FAS report presents state-by-state distributions of federal expenditures for grants to state and local governments only. By contrast, federal grants reported in the CFFR generally represent obligations. Obligations are federal funds designated state-by-state and available to be "drawn down" through a variety of program requirements. Additionally, the CFFR includes payments to state and local governments as well as nongovernmental recipients.

[^2]Distributions and obligations will eventually translate into expenditures by the state and local governments, which are addressed in the Committee’s reports Federal Grants to Florida’s Local Governments and subsequent updates. ${ }^{2}$ This report profiles grant expenditures reported to the Federal Audit Clearinghouse by local governments and is part of an ongoing effort by the Committee to assist local governments in maximizing their drawdown of federal awards. Furthermore, local government expenditures sorted by grant program have been compiled and are available for download on the committee's website. ${ }^{3}$

## C. Federal Grants by Department or Agency

The tables in this part provide more detailed summaries of federal grant expenditures to Florida by department or agency. In the FAS report, these federal grant expenditures are reported by program categories. It is important to note that the majority of these program categories reflect the sum total of numerous individual grant programs.

In the Catalog of Federal Domestic Assistance (CFDA), federal grants are classified into one of two types: formula grants and project grants. ${ }^{4}$ Formula grants are allocations of money to states or their subdivisions in accordance with distribution formulas prescribed by law or administrative regulation for activities of a continuing nature not confined to a specific project. Project grants are funding for specific projects for fixed or known periods of time and can include fellowships, scholarships, research grants, training grants, traineeships, experimental and demonstration grants, evaluation grants, planning grants, technical assistance grants, survey grants, and construction grants. Currently, the CFDA lists 237 formula grant programs and 1,299 project grant programs. In total, 1,536 separate federal grant programs are listed in the CFDA. Data on states' participation in each of these individual grant programs is not part of the FAS report.

Utilizing the data published in the FAS report, the following tables summarize federal grant expenditures to Florida by department or agency.

Table 3-2: U.S. Department of Agriculture (page 40)
Table 3-3: U.S. Department of Commerce (page 41)
Table 3-4: U.S. Department of Defense (page 42)
Table 3-5: U.S. Department of Education (page 43)
Table 3-6: U.S. Department of Energy (page 44)
Table 3-7: U.S. Environmental Protection Agency (page 45)

[^3]Table 3-8: U.S. Department of Health and Human Services (page 46)
Table 3-9: U.S. Department of Homeland Security (page 47)
Table 3-10: U.S. Department of Housing and Urban Development (page 48)
Table 3-11: U.S. Department of Interior (page 49)
Table 3-12: U.S. Department of Justice (page 50)
Table 3-13: U.S. Department of Labor (page 51)
Table 3-14: U.S. Department of Transportation (page 52)
Table 3-15: U.S. Department of the Treasury (page 53)
Two additional tables summarize changes in federal grant expenditures to Florida by department or agency for the period of 1996 through 2008. Table 3-16 on pages 54-57 lists the total expenditures, the percentage change in total expenditures from one year to the next, and Florida's rankings among the fifty states. Table 3-17 on pages 58-59 lists the per capita expenditures and Florida's rankings among the fifty states. Table $\mathbf{3 - 1 8}$ on pages $60-61$ provides a comparison of each state's proportional receipt of federal grants by agency in 2008. If the state's proportional share by agency is roughly equivalent to the state's share of the national population, then perhaps a measure of equality has been satisfied. Supplemental information describing each federal department or agency and many of the grant programs can be obtained from their respective websites. A list of those websites can be found in the Appendix.

Chart 3-1 on page 62 illustrates total federal grant expenditures to states and their respective local governments plotted against the states’ populations. A trend line is utilized to visually illustrate the expenditure level predicted by an individual state's population. Although this analysis does not consider the numerous other factors that affect states’ receipts of grant funding, it does allow for a comparison similar to the analysis of per capita measures utilized in this report. Federal grant expenditures to state and local governments generally cluster around the trend line, indicating a high level of dependence on population. However, expenditures to a few states differ substantially, indicating that they receive more or less grant funding than would be predicted by population alone. Louisiana, Mississippi, and New York illustrate expenditures substantially above their predicted levels while Florida, Texas, and Virginia illustrate those substantially below their predicted levels.

## D. Conclusion

For reporting purposes, the federal government aggregates expenditures of hundreds of separate grant programs into broad program categories. Consequently, it is difficult to determine why the state ranks so low, on a per capita basis, relative to other states in many program categories. Certainly, this aggregation of expenditure data masks differences from one grant program to another. Within the same program category, a high per capita ranking in an individual grant program may be offset to some degree by a low per capita ranking in another program.

According to past statements made by representatives of several state agencies, per capita measurements of certain federal grants receipts, while low compared to other states, may not reflect
the fact that the amounts are adequately serving their target populations. Additionally, some grant funding formulas incorporate variables other than the population at large; therefore, the use of a per capita measure for comparisons among states may not be appropriate. Florida's per capita expenditures for select grants may be lower than for most other states because of the state's unique demographic composition, which features large elderly and retiree populations. However, when funding is compared in terms of actual dollars, or per target populations, the state may actually rank much higher nationally.

It is important to note that a number of factors determine how successful or not an individual state can be in maximizing federal grant funding. How a state fares in the receipt of grant funding is largely determined by formula. Although the total number of project grants outnumbers the total number of formula grants by a factor of five, the cumulative dollar value of project grants is small relative to the cumulative dollar value of the large formula grant programs that exist in education, health care, and transportation, for example.

Another factor that affects states' receipt of grant funding is the natural resources existing within their boundaries. States that typically do well in the receipt of grant funding are those that receive payments for the value of natural resources extracted from their public lands. The existence of such extractable natural resources favors states like Alaska, Louisiana, and Wyoming, relative to a state like Florida with fewer extractable natural resources.

Medicaid is another factor that affects how a state fares in the receipt of grant funding, given the size of the program itself. While Medicaid spending has been increasing, an individual state could experience a smaller than average increase if its Medicaid matching rate declines. Conversely, a state experiencing an increase in its matching rate could see a substantial increase in grant funding. Additionally, the type of Medicaid program run by the state, whether relatively modest and less expensive or more expansive and more expensive, will affect the level of federal reimbursements.

In spite of the caveats mentioned above, the data presented in this part suggest that it is possible for Florida to realize improvement in the acquisition of federal grants. Therefore, elected federal, state, and local officials should consider the development of a comprehensive strategy in the evaluation and acquisition of federal grants and identify federal and state policy changes to enhance the state's access and receipt of such funding.

## Table 3-1

Federal Grant Expenditures to Florida State and Local Governments Federal Fiscal Year 2008

| Federal Agency or Department | Total Expenditures |  | \% of State's Total | Florida's Rankings: Total Expenditures |  |  | Per Capita Expenditures |  | Florida's Rankings: Per Capita Expenditures |  |  |

Notes:

1) In the published report, the data are rounded to the nearest thousand dollars.
2) An asterisk indicates that one or more states had no reported federal grant expenditures.
3) The calculation of per capita expenditures was made using population estimates that represent the state's resident population as of July $1,2008$.
4) Based on July 1, 2008 population estimates, the seven most populous states, in descending population order, were: California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio.
5) As designated by the U.S. Census Bureau, Florida is one of 16 states in the South region. The other states in the South region are: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

3) The calculation of per capita expenditures was made using population estimates that represent the state's resident population as of July 1,2008
4) Based on July 1, 2008 population estimates, the seven most populous states, in descending population order, were: California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio.
5) As designated by the U.S. Census Bureau, Florida is one of 16 states in the South region. The other states in the South region are: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

# Part Four: <br> Florida's Per Capita Federal Grant Expenditures by Agency as a Percentage of the National Per Capita Expenditures 

## A. Introduction

The purpose of this part is to illustrate how Florida's per capita federal grant expenditures by agency compare to the national per capita expenditures as well as those of the other states. This part analyzes changes in states' per capita expenditures, relative to national per capita expenditures, during fiscal years 1996 through 2008.

## B. Data Sources

The figures reported in this part were calculated by the LCIR staff from data published in the U.S. Census Bureau publications: Federal Expenditures to States (FES) for fiscal years 1996 through 1997 and its successor Federal Aid to States (FAS) for fiscal years 1998 through 2008.

## C. States’ Per Capita Federal Grant Expenditures by Agency

In analyzing the federal grants data, the LCIR staff calculated per capita expenditures for each state, as well as the per capita expenditures of the fifty states collectively, by federal agency for each of the fiscal years 1996 through 2008. The per capita expenditures of the fifty states is hereafter referred to as the national per capita expenditures.

Each state's per capita expenditures, as a percentage of the national per capita expenditures, are calculated. The per capita expenditures of individual states are either less than, equal to, or greater than the national per capita expenditures. If a state's percentage value in a given year is less than 100 percent, then that state had a per capita expenditure less than the national per capita expenditure. If a state's percentage value is greater than 100 percent, then that state's per capita expenditure exceeded the national per capita expenditure.

Utilizing the data published in the relevant FES and FAS reports, the following tables summarize states' per capita federal grant expenditures as a percentage of national per capita expenditures.

## D. Conclusion

Part Three of this report discussed several shortcomings in using a per capita measure to evaluate federal grant expenditures to states, and those shortcomings apply here as well. The inherent assumption when comparing states’ per capita expenditures is that federal grants are distributed solely on the basis of total population, which is not the case for all individual grant programs. Since grant funding formulas may incorporate variables other than states' total populations, the use of a per capita measure for comparative purposes may not always be appropriate.

However, in spite of these caveats, these analyses may provide some rough measure of how well Florida fares, relative to all other states, in the receipt of grant funding by agency after controlling for population differences among the states. The analyses demonstrate that Florida's per capita expenditures have been below the national per capita expenditures for the majority of federal agencies, in particular those agencies that provide the majority of grant funding to states. During 2008, the state's per capita expenditures were above the national per capita expenditures for only three of the 22 federal agencies (i.e., Corporation for Public Broadcasting, Homeland Security, and Justice) that provided grant funding to Florida, and the combined grant funding provided by those three agencies accounted for only 5.2 percent of total grant funding provided to the state by all 22 agencies. Given the large number of federal grant programs (i.e., 1,536 currently), additional research into these programs would need to be conducted to assess the extent to which Florida's receipt of funding from individual grant programs could be increased in the future.

Florida Legislative Committee on Intergovernmental Relations
