

# Education Estimating Conference

## Florida College System Enrollment

### Executive Summary

August 9, 2024

The Education Estimating Conference on Florida College System Enrollment met on August 9, 2024, to review and adopt a new forecast for Florida College System full-time equivalent (FTE) enrollment through FY 2029-30 incorporating final FY 2023-24 FTE.

Final FY 2023-24 data indicate a system-wide total FTE of 284,140.6, an increase of 14,500.0 FTE (5.4%) from FY 2022-23 and a gain of 6,281.6 FTE (2.3%) from the prior forecast. For all Lower Division programs, FTE enrollment increased by 14,202.2 FTE (5.6%) from 252,399.4 FTE in FY 2022-23 to 266,601.6 FTE in FY 2023-24. A smaller enrollment increase of 297.8 FTE (1.7%) over the prior year occurred in Upper Division programs. Upper Division FTE represented approximately 6.2% of total enrollment in FY 2023-24.

Final FTE for FY 2023-24 is -36,161.4 FTEs (-11.3%) below the pre-pandemic enrollment level that occurred in FY 2018-19. Nevertheless, FY 2023-24 is the first year of positive growth since the pandemic. This turn-around supported a stronger college system FTE forecast. Relative to the December conference, the new forecast has increases each year ranging from 11,945 FTE (FY 2024-25) to 29,285 FTE (FY 2028-29). By the end of the forecast horizon (FY 2029-30), FTE enrollment is expected to reach 332,455 FTE, with 312,334 FTE in Lower Division programs and 20,121 FTE in Upper Division programs.

Overall, the outer forecast years anticipate FTE to rise above pre-pandemic levels. The last two years of the forecast (FY 2028-29 and FY 2029-30) surpass pre-pandemic enrollment by 4,470.6 FTE (1.4%) and 12,152.6 (3.8%) FTE respectively. As a note, the Conference only addresses state-funded FTE, meaning the total FTE enrollment activity at colleges may differ.

College Name: Eastern Florida State College

Status: **Adjusting Projections**

Narrative:

Review of RY 2024 FTE: EFSC full time equivalent (FTE) enrollment increased by about 619 FTE in reporting year (RY) 2024, this represents about a 6.9% increase. As seen in the RY2024 row of the FTE by Credit Type table below, there were strong gains in Advanced Professional (AP), Postsecondary Vocational (PSV), and Developmental education types of credit and a modest increase in upper division FTE (0.38%). Career Technical Certificate (CTC) credit was the only type of credit in which there was a decrease in FTE.

The AP credit type has historically accounted for the largest proportion of FTE and even a small percentage increase in enrollment within these courses contributes significantly to the overall FTE total. Upper division credits account for about 9.4% of FTE enrollment and the FTE increase during RY 2024 is the first gain since RY2021. The strong increase in enrollment has continued into summer 2024. We anticipate base college credit FTE to have increased by about 12% in summer 2024 when compared to summer 2023. The increase is about 192 FTE between the two summer terms (see Appendix C). Initial fall enrollment comparisons to about the same point in the registration cycle for the fall show potentially significant gains and as of July 15th; credit-hour FTE for fall 2024 is about 13% higher than this time in the fall 2023 registration cycle (See Appendix C). With over three weeks to go prior to the start of the term we are about 76% of the way towards the final FTE from fall 2023.

Justification for accepting overall projections from the state

EFSC accepts the overall total FTE projected within the FEP model. However, EFSC is proposing some adjustments to the allocation of FTE by campus each year. The narrative below provide justification to accept the overall totals with adjustments by reporting year to the totals assigned to each campus.

Clock-hour CTC (PSAV) programs:

The increased FTE for the PSAV type credit is in line with our anticipated enrollment career technical certificates and coincide nicely with the plans to move the Aviation Maintenance program and expand the number of cohorts accepted each year. EFSC has been awarded funds to retrofit a large building on its Titusville campus to help grow the aviation maintenance program by relocating to the Titusville campus. We anticipate that the building will be completed by Spring of 2026. This new location will enable us to accept 1-2 new cohorts per year which will increase headcount enrollment by about 50 students between RY2026 and RY2027. The first of these cohorts should be accepted in late Spring of 2026. Current students in the Aviation maintenance program enroll at an FTE to student ratio of 0.8:1, or about 80 FTE per 100 students. With the additional 25 students per year, we expect about a 20 FTE increase during RY2026 and 20 FTE increase during RY2027. However, EFSC has recently closed another clock-hour program (Phlebotomy) and due to the length of the Aviation program we do not anticipate 20 FTE each year. The states projected increase of about 11 FTE of PAV type credits each year throughout the model aligns closely with our anticipated growth for these types of programs.

During RY 2026, we shifted FTE an additional 11 FTE to the Titusville campus and kept the proportion of PAV FTE about the same for each campus for the remainder of the projection.

Lower division AP and PSV:

The College has been fortunate to receive funding to expand capacity of high-tech programs on the Melbourne Campus with plans to open the Center for Innovative Technology Education building which

will provide unique facilities for collaboration with NASA and dozens of regional employers in the high-tech industry. We anticipate a close partnership with regional employers to help deliver high tech training to their staff through short term college certificate and AS degree courses. These partnerships will help to meet the projected increases in enrollment in both AP and PSV type credits and support our technology programs. Among other programs, this building will provide additional capacity for our computer and engineering technology programs, which have maintained strong enrollment over the past few years. With the additional resources and opportunities for expansion in the lower division PSV credit type, our Computer Programming and Engineering Technology programs are expected to continue growing. We have already seen interest in these programs spike and enrollment within the AS and Bachelor's degree programs in this area is up more than 11% between RY2023 and 2024. We will closely monitor these programs and may be able to grow FTE in these areas once the CITE building is complete and open (expected in Fall 2025). The projected increases of about 60 credits each year starting in RY 20226 in PSV credit type and to a lesser extent the AP credit type are supported by this planned building project.

#### Impact of Increased High School Graduates and Population Projections

The State's model shows an increase in AP, PSV, and CP type credits. The state has provided data showing a positive forecast of high school graduates and Brevard County's population is projected to grow over the next five years in three key age brackets, 15-17, 18-19, and 25-39 (POPAFEP). These age groups account for about 69% of EFSC enrollment (14%, 25%, and 30% respectively). The increased high school graduates and their subsequent enrollment as an FTIC along with general increases in population in these age brackets supports the states projected increases within each of these credit types.

#### Upper Division Programs

Upper division course enrollment increased between RY2023 and 2024 by 0.38%. This is a positive sign that efforts to encourage students to continue their studies in an EFSC baccalaureate program is starting to take effect. Upper division enrollment this summer increased by about 4.8% (15 FTE higher). However, 2024 fall enrollment as of July 15th when compared to fall 2023 at about the same time is essentially flat. With just about three weeks to go prior to the start of the term, and several courses offered in the second half of the fall, we anticipate being slightly up this fall in upper division credits but at this time we are accepting the upper division projections as provided by the State. The 30 added FTE is a reasonable anticipated increase in upper division courses.

#### Re-distribution of FTE by campus

Re-distribution of FTE by campus is done each year to reflect the continued increase in importance of the Melbourne campus of EFSC and plans for moving a program from on off-site location to Titusville. Upper division, AP, and PSV credits are shifted throughout the projections to align more closely with proportions of students who declare each campus their home campus and course enrollment by campus trends. The FTE shifts to Melbourne recognizes the many financial resources for online learning located in Melbourne. The shifting of clock hour credits to Titusville starting in RY2026 is in anticipation of the aviation program moving to that location. The shift in FTE is primarily from Site 1 which includes both the Cocoa campus enrollment and Online enrollments. The shift in PAV credit during RY 2026 is due to the expansion of the aviation maintenance program on the Titusville campus.

CC02

College Name: Broward College

Status: **Adjusting Projections**

Narrative:

Broward College is adjusting the FTE enrollment projections for the state reporting year 2025 to be in accordance with the annual average growth of 0.6% of the college model mentioned in the next paragraph. The college is accepting the 2026-2030 projections provided by Community College and Technical Center Management Information Services (CCTCMIS) because the growth rate during these years agrees with the college model.

In 2021, Broward College conducted a 10-year FTE trend analysis as an initial step and the foundation for these revised projections. To further validate these revisions, the Office of Institutional Research at Broward College developed an internal Ordinary Least Squares (OLS) regression model. This model utilized 10-year trends and, over the last two years, has demonstrated a high level of accuracy, boasting an adjusted R-squared of 97%. Moreover, the model incorporates a term variable to control for seasonality. Key predictors included in the model encompass Broward County High School graduation rates, yearly retention, term duration, unemployment rate, COVID (dummy variable), adult county population, current and projected earnings growth, as well as current and projected job growth. The model projects an approximate annual average growth of 0.6% over the next five years, with the exception of adult basic education and apprenticeship programs, which are expected to remain steady. Factoring in both the trend analysis and the model's estimated projections, adjustments were made to align with our internal analysis for the years 2025, 2026, 2027, 2028, 2029 and 2030. Notably, the adjustment for the year 2027 exceeded 0.6% due to the remodeling efforts detailed in the subsequent paragraph.

Further, FTE projections aligned with the expansion of buildings 56 & 57. The current plans should increase student stations from 549 existing stations to approximately 725 stations. Using the SFREF formula and facilities planning calculations, we should yield approximately 350 to 355 FTE. The adjustment based on the remodeling was previously applied to year 2027 (AP – 355). The growth will be derived largely from increased capacity in our physical science and nursing labs. The buildings will also have some general science, mathematics, and nursing lecture classrooms. The building is noted as a STEM building; however, we were able to secure funding by shifting from a general STEM focused building encompassing all STEM areas, to focus more heavily on science labs and health science/nursing. To grow enrollment in nursing and health science programs, for which the FLDOE has identified as high priority, we highlighted the need to increase the number of students who successfully complete science pre-requisite courses needed for health science and nursing programs.

Several new initiatives will affect our reporting of COFTE for the current and out-year projections. The College had determined we can best serve our online education students by decentralizing the program, moving portions of the online program to our North (+2,800 FTE, site 20), Central (+2,000 FTE, site 10), and South (+2,800 FTE, site 30) campuses from WHC (-7,600 FTE, site 11).

The supporting document (CC02.FTEPLAN.ADJDOCS.2024.PROD.PDF) includes the ROI for building 56 & 57 (Site 20).

\*\*\*\*\*

CC03

College Name: College of Central Florida

Status: **Adjusting Projections**

Narrative:

The college is adjusting the division's projections for the FTE Enrollment Projections due to the following:

Overall, programs are projected to increase during the 2025 to 2030 academic years, particularly between now and 2027, due to recently added Associate of Science program offerings in healthcare and certification programs. We project sixty-six (66) additional FTE in the Advanced and Professional programs and forty-five (45) additional FTE in Post-Secondary Vocational programs. In addition, five (5) new Applied Technical Certificate programs started last fall (Fall 2023). These new programs are expected to steadily increase Advanced and Professional FTE as students prepare by taking prerequisites. The college projects forty (40) additional FTE in new/improved programs in 2026. This is in alignment with trend analysis for the recently added health programs. The college is accepting the UD, DE, EPI, PSAV, AB, and ASG categories for years 2025 and 2026 as it is in alignment with the colleges' projections.

Furthermore, we anticipate a steady increase in enrollment at the Vintage Farm campus (site 5) in 2025. The college is projecting a total of eighty (80) FTE at the farm in 2025, a total FTE of ninety-five (95) for 2026, and total FTE of one hundred five (105) in 2027. The rationale for these increases are due to enrollment increases in the existing AgriBusiness and Equine Business Associate of Science programs offered at Vintage Farm. Also, the college is anticipating offering a new A.S. program in Precision Agriculture and Environmental Sciences Technician college credit certificate in 2027 upon board approval. This new program will be based at site 5 and will continue the increase for that site. FTE has been removed from Ocala campus (site 1) and added to the Vintage Farm (site 5) to show this projection.

The college expects FTE to fall in line with the state's 3% average increase each year beginning 2027 through 2030.

CC04

College Name: Chipola College

Status: **Accepting Projections**

Narrative:

Chipola College has reviewed and accepted the Florida College System's FTE Projections for 2025-2030.

Overall Projections Based on County Demographics

The decision to accept the FCS FTE projections was based primarily on the demographic trends for the five counties served by Chipola College. Analysis of the projected population data supplied by DOE shows that the population numbers for our five county district are projected to increase every year for the next six (6) years. Based on the projected population increases, we agree with the projected enrollment increases proposed by the FCS FTE projections.

\*\*\*\*\*

CC05

College Name: Daytona State College

Status: **Adjusting Projections**

Narrative:

Daytona State College does not agree with the 2024-25 estimates provided by the state. Due to growth and expansion at our Deltona Campus, along with a trend of increased enrollment for Summer 2024 and an increase in Fall enrollments, the FTE increases from the previous year were maintained through the Fall 2023 semester and the Spring 2024 semester. Currently, DSC is reporting increases in new student applications, persistence and retention rates, and overall enrollment for the Fall 2024 term. We will outline the supporting documentation for each of the categories. The only adjustments we have made without documentation were to the EPI and VP categories by adding 1 FTE in each category, respectively. These are still programs that we offer and still have some enrollment in.

The college experienced an enrollment growth of 4.8% in FTE for the Spring 2024 semester. We are also reporting an increase of 8.0% for the Summer 2024 semester compared to last year. Additionally, indications show an increase in Fall enrollment, along with increased persistence and retention rates, which have allowed us to maintain an overall increase in enrollment compared to last year. While we agree that there will be increases in many categories, we are currently trending higher than the state projections. For example, we are seeing an increase in applications in the UD category, which can be attributed to several factors. In the BSEd program, DSC added a Teacher Apprenticeship Program, and the education department was awarded the "Grow Your Own Grant." Additionally, Bachelor of Science in Engineering Technology, Industrial Engineering Technology Concentration, the new concentration in Healthcare Management as part of our Bachelor of Applied Science program, and the introduction of the Bachelor in Cardiopulmonary Science are supporting growth in the UD category. We are continuing to engage students to identify ways to help them persist and ensure that there should not be any major effect on returning students for the spring semester. The college is currently seeing higher-than-average enrollment trends compared to the same point in time last year. For the 2024-25 year, the residence hall has maintained its demand, as it has filled to capacity for the Fall 2024 semester. The addition of the residence hall on campus has increased student engagement in campus activities. We are continuing to see increases in the categories of Adult Basic Education and Adult Secondary Education.

The college accepts the subsequent adjusted estimates for the academic years beyond the 2024-25 reporting year as they align with our expected enrollment projections. According to the population projections provided by FLDOE, the population of our target demographics within our service district is projected to continuously increase during the reporting periods. Over the years covered in this report, the college's service district is projected to grow by an average of 1.56%, with high school graduates projected to increase for 2024-25 and the following year. This is consistent with the percentage of growth provided by the state. Additionally, several efforts are underway to stabilize enrollment for the 2023-2024 academic year and beyond. For example, the college is currently implementing a CRM system that focuses on both the recruitment of new students and the retention of current students. The student retention module of the CRM went live in early Fall 2023, and the recruitment module went live in June 2024. We have seen increased engagement to assist with efforts for the Fall 2024 academic term. The goal of this system is to increase engagement with prospective students to positively impact the yield rate. Additionally, the CRM will also be used as the system of engagement for current students to continue positively influencing our persistence and retention rates. These data-driven support mechanisms will allow the college to positively impact enrollment and retention.

2024-2025 Academic Year:

Daytona State College does not agree with the state's overall FTE estimate. The projections in the AP (5595), UD (906) and PSV (2182) categories can be attributed to the opening of a new academic building at the Deltona Campus and the addition of new academic programs, including the Associate of Science in

Sonography, the expansion of the CNC program, the eventual expansion of a Welding cohort, and the introduction of several new bachelor programs. Additionally, due to the state-reported increase in high school graduates within the region, we anticipate growth as well. We have adjusted, and projected increases, in the PSAV (745) and APP (566) categories due to the state's significant investment in critical workforce and apprenticeship opportunities. DSC continues to experience growth in the Adult Basic and Adult Secondary categories from the 2023-24 reporting year and has slightly adjusted the estimates to 159 and 36, respectively, due to continued successful strategies to increase enrollment efforts. The college agrees with the projected figure for the DE category (151). Additionally, the passage of Senate Bill 52, which allows institutions to develop "alternative methods" for evaluating placement for students, especially students in the dual enrollment program, will reduce the barriers of standardized tests and increase opportunities for students to enroll. The same statute also allows for increased access for students to dual enroll who attend private secondary schools. These conditions will factor into the projections outlined here and in the following years as well. Additionally, application increases for the 2024-25 academic year will contribute to a higher number of returning students for this academic year as well. Finally, our efforts and strategies within the Title III Grant have been fully implemented and contribute to enrollment through gains in our persistence, retention, and completion rates. The Strengthening Institutions Grant from the U.S. Department of Education, entitled LENS: Learner Engagement, Navigation, and Support, was written to focus on implementing significant institutional changes to positively influence persistence, retention, and completion rates over the next five years. These efforts help to support the state's projections.

#### 2025-2026 Academic Year:

Daytona State College agrees with the state's adjusted estimate based on the percentage growth for the 2025-2026 academic year. We are projected to see the following category FTE: UD category (920), AP category (5681), PSV category (2217), Dev Ed category (155), EPI category (1), PSAV category (756), APPR category (575), Adult Basic category (161), Adult Secondary category (36), and VP category (1). This growth is due to the continued implementation of our various efforts (CRM, Academic Coaching, COMPASS program) that will contribute to enrollment through gains in our persistence, retention, and completion rates. The expanded programs at our regional sites should continue to increase student enrollments. Additionally, when comparing the projected high school graduates provided by the state to the current capture rate of students graduating from high school (30.6%), enrollment increases are anticipated.

#### 2026-2027 Academic Year:

Daytona State College agrees with the state's adjusted estimate based on the percentage growth for the 2026-2027 academic year, we are projected to see the following category FTE: UD category (934), AP category (5767), PSV category (2249), Dev Ed category (158), EPI category (1), PSAV category (768), APPR category (584), Adult Basic category (163), and Adult Secondary category (37), and VP category (1). This is, in large part, due to the increased effect of the opening of a new building at the Deltona and DeLand Campuses.

#### 2027-2028 Academic Year:

Daytona State College agrees with the state's estimate for the 2027-2028 academic year, we are projected to see the following category FTE: UD category (948), AP category (5853), PSV category (2283), Dev Ed category (160), EPI category (1), PSAV category (779), APPR category (593), Adult Basic category, (167), and Adult Secondary category (37), and VP category (1). This is, in large part, due to the implemented efforts of the strategies within the college will contribute to enrollment through gains in our persistence, retention and completion rates.

#### 2028-2029 Academic Year:

Daytona State College agrees with the state's estimate for the 2028-2029 academic year, we are projected to see the following category FTE: UD category (963), AP category (5937), PSV category (2316), Dev Ed category (162), EPI category (1), PSAV category (791), APPR category (601), Adult Basic category (169), and Adult Secondary category (39), and VP category (1). This is, in large part, due to the implemented efforts of the strategies within the college will contribute to enrollment through gains in our persistence, retention and completion rates.

#### 2029-2030 Academic Year:

Daytona State College agrees with the state's estimate for the 2029-2030 academic year, we are projected to see the following category FTE: UD category (976), AP category (6018), PSV category (2347), Dev Ed category (164), EPI category (1), PSAV category (802), APPR category (609), Adult Basic category (172), and Adult Secondary category (39), and VP category (1). This is, in large part, due to the implemented efforts of the strategies within the college will contribute to enrollment through gains in our persistence, retention and completion rates.

\*\*\*\*\*

CC06

College Name: Florida SouthWestern State College

Status: **Replacing Projections**

Narrative:

Florida SouthWestern State College (FSW) is replacing Division projections with a College Projection Model. This decision is based on model goodness of fit, and then adjusted according to expecting growth patterns.

Considering the model first, we are replacing the Division projection based on a linear regression with a more representative power law model. As the decay in the power law model is not constant, the declines therefore adjust over time, unlike the linear regression. This is a better fit to current trends and is visible in Figures 1 and 2 in the evidence file. And because it is a power law, it is also more robust, and therefore not as heavily influenced by outliers.

The power law ( $y=9281.5x-0.006$ ) more accurately reflects recent trends. Therefore, FSW first adjusts the projections according to the power law model. However, because the power law model is developed only considering recent trends, it still does not accurately reflect the best possible projection at present because it does not consider recent changes at FSW which are expected to affect enrollment. As a result, two additional singular adjustments are made to the power law. The first adjustment, the +147 depicted in 2024-25, is a result of three separate expected enrollment increases. The first is an expected increase of 50 FTE due to the recent closure of the local Hodges University's Physical Therapist Assistant program. That program is expected to be taken on by FSW. The second is due to the closure of Hodges University in general. FSW expects approximately 25 FTE further from students in other programs from Hodges who wish to complete their degrees utilizing common programs with FSW. And the third, resulting in a further 72 FTE in 2024-25 is expected due to the expansion of FSW's Nursing program whereby a total of 144 FTE will become newly available. Based on completion expectation, FSW has projected 72 FTE for 2024-25, and the remaining 72 FTE at program's expansion completion in 2027-28. The combination of the second and third programmatic factors results in final projections for 2024-25 through 2029-30 to be adjusted as follows: 2024-25 up from 9134 to 9347, 2025-26 up from 9043 to 9333, 2026-27 up from 8941 to 9324, 2027-28 up from 8828 to 9386, 2028-29 up from 8707 to 9379, and 2029-30 up from 8574 to 9373.

All adjustments are made to the A&P category for the following reasons. First, all onboarding of Hodges University students will be in the A&P category. Second, all programmatic changes (the Physical Therapist Assistant and AS Nursing) will be in the A&P category. And third, 95% of FSW FTE is housed within A&P and any major trends up/down are driven by a change in A&P, therefore the power law model is applied universally to A&P. As the adjustments are not due to expanded industry, policy decisions, opening of a new campus or program, or change in high school graduates, they are therefore relegated to 'other factors' in the adjustment categories.

\*\*\*\*\*

CC07

College Name: Florida State College at Jacksonville

Status: Adjusting Projections

Narrative:

Florida State College at Jacksonville rejects the Florida College System's FTE estimate of 15,121 for 2024-25 and the projected estimated FTE for 2026-2030 based on the belief we have in our data, the efforts of the individuals that work at our institution, and the growth in communities that we serve.

Florida State College at Jacksonville has been closely monitoring its FTE and during 2023-2024 we had an overall enrollment increase of 9.79%. This overall increase in 2023-2024 supports our decision to increase the 2024-25 Florida College System's FTE by 2% for a total of 15,298 and adjust years 2026-2030 to a 2.5% growth each year.

Summer 2024 enrollment has trended upwards of 10% at times and, currently, fall 2024 is up by 3.8%. We believe this upward trend is a result of our commitment to student success, ongoing efforts in recruitment initiatives, grant awards, and institutional policy alignments that were implemented and continued throughout 2023-24 will continue to evolve and have a ripple effect into the 2024-25 academic year and the remaining projected 2026-2030 academic years.

FSCJ can expect a 2% FTE growth in 2024-25 throughout 2025-2026 based on trend data from our weekly enrollment reports, the 32% population growth in Duval and Nassau Counties, an increase in on-going recruitment events (comprehensive nudging campaigns), proactive case management and assigned advising, and various grants all support growth in enrollment and retention. Therefore, we are forecasting UD to increase by 30 FTE with the end of year FTE planned projection of 1,582, A&P to increase by 168 FTE with the end of year FTE planned projection of 8590, PSV will increase by 65 FTE with the end of year FTE planned projection of 3320, DE will increase by 12 FTE with the end of year FTE planned projection of 632, and PSAV will increase by 14 FTE with the end of year FTE planned projection of 721. Based-on Data Quality Report 3 verification report for 2023-2024, we have seen an increase in enrollment for AB, will increase by 8 FTE with the end of year FTE planned projection of 423. Based on a recalculation of hours, we believe that ASE will increase by 2 FTE with the end of year FTE planned projection of 17 and VP will increase by 1 FTE with the end of year FTE planned projection of 8.

Based on our weekly enrollment reports, we are agreeing with the 2024-25 FTE projections for the following areas: EPI-5 FTE, APP-0 FTE (FSCJ does not have any apprenticeship programs),

Understanding change and how it works, we have listed some strategies and initiatives which directly or indirectly impact student success now and in years to come.

For example, FSCJ Connections Community Partner Events will continue to connect with community leaders making them aware of the education opportunities for their employees. This will continue to open the door for more third party sponsored students, as well as encourage local employers to promote FSCJ to their workforce.

Additionally, FSCJ has invested in the use of Lightcast as an additional tool to help more accurately highlight business and industry growth in the College's service area. These data help to identify where near and mid-term future needs are to support the growth of academic and workforce programs. Although increased program enrollment will help cover program costs, the College and its Foundation are committed to data-informed program growth and associated costs through their inclusion in a comprehensive campaign expected to launch in 2025.

One of FSCJ's current efforts is focusing on supporting college students who are parents by working closely with an Achieving the Dream Coach to communicate, create policy, and secure grants that would provide resources that directly impact their ability to stay enrolled in school. Currently, we have a Child Care Access Means Parents In School (CCAMPIS) grant that assists student parents with the cost of keeping their children enrolled in quality, accredited and conveniently located child care while they are enrolled at FSCJ.

The software program myGradPlan was implemented in 2021 and continues to be one of FSCJ's long-term efforts that supports enrollment growth and retention for all categories for 2025-2030. This long-term effort is done on a short-term basis through: Assigned Advising w/ Differentiated Care, Student Communications, and predictive analytics (forthcoming).

Assigned Advising is a proactive model that builds proactive touchpoints based on student need for each semester. The support (Low, moderate, or high) is based on data points (i.e grades, credit hours, GPA, Developmental Course Requirements) which are analyzed each semester to determine which level of support is needed for a student. (Differentiated Care attachment)

Student Communications includes FSCJ's Comprehensive Nudge and Outbound Call campaigns, which impacts all categories and will continue into 2025 and beyond. This communication initiative increases the number of enrollment messages via email and text message to ALL students encouraging and reminding students to enroll. Since we reported FTE-2, we have sent over 19k students SMS messages encouraging them to enroll in Summer and Fall courses (2024 myGradPlan, CRM Outcomes attachment).

Another example is FSCJ's Outbound Call Campaign, where the Contact Center maintained an active outbound call campaign to move targeted populations through the enrollment funnel.

Examples:

- Future students that have started an application but not submitted it.
- Applicants who haven't submitted residency or still need to submit additional documents.
- Active students in PeopleSoft/Campus Solutions that have advanced to the point of being able to register, but haven't yet registered for a class.
- Registered students at risk of their schedule being dropped for non-payment.

Overall, there has been a 72% increase in recruitment events for spring/summer 2024 compared to spring/summer 2023 with an expectation that fall will increase as well. Individual interactions for spring/summer 2024 have increased by 38% compared to spring/summer 2023 with an expectation that fall 2024 will follow suit. All of the data supports an upward trend with the anticipation that these efforts lead to enrollment. (Recruitment Narrative)

UD has seen an increase in the past year and, based on our weekly enrollment reports, we strongly believe that our ongoing efforts within our recruitment initiatives will increase enrollment with the end of year UD FTE projection of 1,582. FSCJ's Comprehensive Nudge campaign increases the number of communication messages via email and text message to students encouraging enrollment. Additionally, brochures for the 2+2 pathway have been created and distributed highlighting only FSCJ Bachelor programs.

A&P has seen an increase in the past year and based on our weekly enrollment reports, we strongly believe that our ongoing efforts within our recruitment initiatives will increase enrollment with the end of year A&P FTE projection of 8,590. PSV has seen an increase in the past year and based on our weekly enrollment reports, we strongly believe that our ongoing efforts within our recruitment initiatives will increase enrollment with the end of year PSV FTE projection of 3,320. High school yield is still an “opportunity of growth” for both areas and our continued presence on high school campuses every first and third Wednesday of each month, Recruitment and Dual Enrollment Coordinators are able to meet students, assist with applications/enrollment, and engage with the counselors.

Dev Ed, based on our weekly enrollment reports, has shown an increase over the past year. We strongly believe that our ongoing efforts within our recruitment initiatives will increase enrollment with the end of year DE FTE projection of 632. Another factor that increases enrollment in this category is new placement tests and cut-off scores implemented in the 2023-24 reporting year. This category has seen an enrollment growth of 223 for FEP and COFTE 2024 compared to FEP and COFTE 2023.

EPI, based on our weekly enrollment reports, we are agreeing with the end of year EPI FTE projection of 5.

PSAV based on our weekly enrollment reports, we are agreeing with the end of year PSAV FTE projection of 721. As of today, summer term career certificate enrollment is at 193,422 hours which is an 18% increase compared to this same time last year.

Based on our weekly enrollment reports and the 2023-2024 increase in enrollment and instructional hours on the Data Quality Report 3, we are agreeing with the end of year AB FTE projection of 423, ASG FTE projection of 17, and VP FTE projection of 8.

Years	Row		
2025	C.	FTE Growth: HS Graduates	
2025	D.1	New/Improved Program	
2025	D.2	Program Reduction/Deletion

2025	D.4	Policy Decisions (Down Only)	
2025	D.5	New Expanded Industry	

Years	Row		
2025	D.6	Other Factors	Florida State College at Jacksonville has been closely monitoring its FTE during the 2023-24 academic year. As of right now, our actual FTE is 14,998 which exceeded our projection of 14,187 for FTE-2. Currently, our summer FTE for credit is +10.3% and career certificates is +17.2%, which, for both, is higher compared to the same time last year. As a result of new and continued initiatives, policy changes, and on-going efforts outlined below, FSCJ has seen summer 2024 enrollment increase by more than 10% for credit and fall 2024 increase by 7% compared to the same day last year. Increase in enrollment growths in the following areas: UD+30, A&P+168, PSV+65, Dev Ed+12, PSAV+14, AB+8, ASG+17, and VP+8. These increases are due to FSCJ's ongoing efforts of assigned advising, text messaging campaigns, high school collaborations, and enhancements to maximize the communications plans functionality of our CRM so that we are better able to get students through the application pipeline. For EPI, ASG, and VP are weekly enrollment reports support the state's projection of 0 enrollment growth.

CC08

College Name: The College of the Florida Keys

Status: **Adjusting Projections**

Narrative:

The estimates in the report include minor and significant adjustments for several reasons. The College of the Florida Keys (CFK) estimates 956 FTE for the 2024-25 reporting year. As evidenced in the Fall 2023 and Fall 2024 Applicant Reports, the College has noticed differences in AP, PSAV, and PSV applications. As a result, the estimated FTE has been adjusted to reflect a reduction of 5 FTE for UD and 23 for AP. However, the College accepts the estimates for PSV, DE, PSAV, and APP based on increased in applications and matriculants for associated programs for the 2024-25 reporting year. State projections remain unaltered for 2026 due to no planned (as of today) major projects or program developments that would further inform FTE enrollment projections. In 2027, CFK is projected to open a new 240-bed Residence Hall on the Key West Campus. AP (94), PSV (60), and UD (6) are anticipated to contribute to FTE growth based on the new Residence Hall. The College accepts the state projections for 2027 for DE, APP, and PSAV due to no planned (as of today) major projects or program developments that would further inform FTE enrollment projections for these categories. In 2028, FTE growth AP (6), PSV (5), and UD (4) stem from the Residence Hall reaching its full potential. The College accepts the state projections for 2028 for DE, APP, and PSAV due to no planned (as of today) major projects or program developments that would further inform FTE enrollment projections for these categories. 2029 and 2030 state projections remain unaltered due to no planned (as of today) major projects or program developments that would further inform FTE enrollment projections.

College Name: Gulf Coast State College

Status: **Adjusting Projections**

Narrative:

Gulf Coast State College has reviewed and adjusted the Florida College System's one-year FTE Projections for the 2024-25 academic year.

Gulf Coast State College is accepting subsequent years through 2029-30 due to the consistent but conservative increase over time. Our enrollment is projected to increase as the population increases. Please refer to the 'Population by County by Age-Group' document. Our service areas are Bay, Gulf, and Franklin counties, and each county total line reflects population increases through 2029-30. (6)

In regards to the one-year FTE Projections for the 2024-25 academic year, Gulf Coast State College has been closely monitoring FTE this summer, as well as current enrollments for fall term, and acknowledges that our data supports an end-of-year FTE of 3,493. (Details below.)

Years	Row

CC10

College Name: Hillsborough Community College

Status: **Adjusting Projections**

Narrative:

Hillsborough Community College has reviewed the Division Projections in detail. Three adjustments to the projections have been identified. The first adjustment is to upper-division (UD), this is a continuation of the enrollment ramp-up to capacity for the Bachelor of Science Degree in Nursing (BSN) program. The growth rate from 2022-23 to 2023-24 was applied to succeeding years until the program capacity of 315 was reached. The second adjustment is to apprenticeship, it is prompted by current enrollment trends. The state projections show a decline throughout the projection period that is not supported by local demand forecasts for apprentices. Apprenticeship is being held steady at the state estimate for 2024-25 for all years in this projection cycle. The third adjustment to AP, PSV, DE, EPI, and PSAV was prompted by the steep slope downwards seen in the current state projections overall in contrast to college total enrollment growth, currently at +8.5% for the year. Overall enrollment is expected to continue on an upward trend. This is supported by current trends in population and high-school graduates. The narrative documentation discusses, documents and explains the adjustments and the method for adjusting in more detail.

Years	Row		
2025	C.	FTE Growth: HS Graduates	
2025	D.1	New/Improved Program	UD is adjusted upwards by 55 FTE.

\*\*\*\*\*

CC11

College Name: Indian River State College

Status: **Adjusting Projections**

Narrative:

Indian River State College is adjusting the Division of Florida Colleges' FEP/COFTE projections. IRSC is continuing the approach of applying the Division's projection formula within instructional areas that are large enough and linear enough to do so. Using the formula in this way yields higher enrollment projections for IRSC's A&P Lower and AB, and lower enrollment projections for PSAV. Early enrollment data for summer and fall follow these trends. More information is on page 1 of the supporting documents.

IRSC is accepting the rest of the Division's projections, either because (1) non-linear trends or small populations that do not allow for the formula to be used for the particular instructional area, or (2) in the case of upper level and apprenticeships, early 2024-25 data are more in line with the Division's projections. We expect a growth in upper level enrollment due to the continuation of our Promise students to the bachelor program, and early fall and summer data support this. We also do not expect apprenticeship enrollment to continue declining, as supported by early fall and summer data.

As of now, we don't expect other large increases or decreases to occur in the next 5 years due to policy or program/industry changes. However, we do expect that our current strategies will attract future students, and our enrollment for each year will be larger than we can project right now based on currently available data. Finally, although campus distributions will change in the coming years as more courses are taught on campus rather than online, the timeline and magnitude of these changes is unknown.

CC12

College Name: Florida Gateway College

Status: **Accepting Projections**

Narrative:

Florida Gateway College (FGC) has examined and analyzed the Florida College System's FTE estimate for the upcoming 2024-25 year and for the subsequent academic years 2026 through 2030, and accepts the Division's projections as presented.

Overall Observations

FGC confirmed projection numbers derived from running the three-year linear regression analysis align to that of the Division's projections within an acceptable margin, reflecting an upward trend in overall enrollment. The following narrative justifies the expected overall increase of 2.64% the Division has projected.

Upper Division

Upper Division programs have experienced variable rates of growth within the four Bachelor's degree programs offered at the College. An additional fifth program will start in Fall 2024, and though its impact on FTE is yet to be determined, we expect at least some positive growth. Overall, current baccalaureate programs are showing modest growth. Our projections remain conservative and aligned with the Division's projection. FGC is constantly assessing and evaluating program efficacy and viability, particularly in areas requiring licensing and/or certification. Enrollment changes often are in direct correlation to assessment results such as licensing pass rates, certification attainment, and employment statistics.

As stated above, in addition to baccalaureate degrees FGC already offers, a B.S. in Business Administration will be added to the College's roster in Fall 2024. The addition of this program will allow students in our A.S. of Business Administration program to continue to enroll at FGC, rather than transfer to other institutions. Growth in this program is expected to start low and gradually increase over time, therefore a modest increase to FTE is expected over the coming semesters that will be attributable to this program.

As in other early childhood education-related programs, the B.S. in Early Childhood Education has essentially plateaued in the near term, with a degree of unpredictability in the long term. Many of the variables impacting enrollment in these programs are societal in nature (salaries, testing, accountability, etc.). Childcare centers often struggle to keep employees due to low pay that is not competitive with pay in other industries having fewer educational requirements. There will continue to be a need for training new workers entering the field, but demand is likely to remain relatively flat.

Having begun in Spring 2021, enrollment in the B.S. in Elementary Education remains steady. FGC's A.A. graduates are choosing to enroll in the B.S. program at FGC, rather than transferring to other institutions. As of Fall 2024, this program will be introducing a new apprenticeship track, which should positively affect FTE. Steady, modest growth is expected to continue over the next several years.

The B.S. in Nursing (BSN) program has experienced cyclical increases and decreases over the years. No modification to the projections has been made, as the Division's growth estimate already encompasses expected increases in the program. The college is consistently participating in recruiting activities and maintains an expectation of continued modest growth. We expect the growth to be restrained, but steady, as our capacity increases. Historically, one of the major obstacles to growth continues to be the availability of qualified adjuncts to manage higher enrollments.

The B.A.S. in Water Resources is primarily a cohort-based program that is predominantly reliant on Second Chance Pell enrollment. A new cohort started at one of our correctional institutions in Spring 2024, which consisted of mostly pre-requisite courses. Current enrollment in the program is twenty-three students.

The Educator Preparation Institute (EPI) program, previously a post-baccalaureate program, is now a baccalaureate program. Likely, few students will remain enrolled in EPI, but the baccalaureate level courses may cause a slight increase in FTE for Upper Level courses.

Overall, the college expects the Upper Division to remain strong, with a slight increase in enrollment over the 2024-2025 year, reflected in the 2.54% increase in the Division's projection.

#### Advanced and Professional

As it is our program with the highest enrollment, many factors affect FTE in our Associate in Arts (A.A.) program. For example, the A.A. student population is highly dependent upon the area high schools' enrollment and graduate numbers. The program continues to show modest growth, due greatly in part to an increased number of students entering the dual enrollment program. Students in dual enrollment courses attribute considerably to FTE for the College. Notably, pass rates for the Postsecondary Education Readiness Test (PERT) have increased, which is a requirement for high school students to enter the dual enrollment program. Additionally, an Online Math Bootcamp (developed by the College's Mathematics Dept.) is available to help current and prospective students improve their math score on the PERT. Dual enrollment numbers trended upward for Summer and Fall 2024 in comparison to those semesters in the prior year. Baker Co-op is an organization in one of our service counties which hosts meetings for parents of local high school students. Our Dual Enrollment department has partnered with this organization, regularly doing presentations on behalf of the College. Many students have entered the dual enrollment program as a result or are actively testing to get in. In summary, our dual enrollment and recruitment staff are diligently working with public high schools within our district to participate in recruiting activities. Their efforts continue to positively impact AP FTE.

Overall, the college expects Advanced and Professional to remain strong, with a slight increase in enrollment, particularly in dual enrollment, over the 2024-2025 year, reflected in the 2.58% increase in the Division's projection.

#### Postsecondary Vocational

Associate in Science (A.S.) degrees and college credit certificates comprise the College's Postsecondary Vocational (PSV) programs. We are accepting the Division's estimate, which reflects a positive increase in FTE.

As the program in PSV with the highest enrollment, Registered Nursing, A.S. degree (ASDN) continues to have the highest impact on PSV FTE. ASDN program expects to see continued, though moderate, growth in the near term and in the ensuing few years. FGC has made changes that make our program more appealing to prospective students: eliminating the summer break and implementing a second (spring) cohort each year. The implementation of the second cohort allows the College to now accept an additional 60-students to the program every spring. Though the second cohort has allowed for more students to enter the program, the College is still not able to accommodate all students who apply, which leaves room for future expansion. In addition, there were 28 more students enrolled in Summer 2024 than in Summer 2023. The program's annual headcount enrollment is above average when observing a five-year span.

The College will introduce a Fire Science A.S. in Fall 2024, which should positively impact FTE. As with all new programs, growth is expected to be gradual at first. We anticipate approximately ten students to be in the first cohort. In the coming year, we will closely monitor how this program will impact FTE in the long run.

Unfortunately, enrollment in the Physical Therapist Assistant A.S. had been steadily declining. However, the program regained accreditation October 2023. As a result, we've seen an uptick in enrollment. Therefore, we expect future enrollment to continue to climb slowly.

The College's Operations Management A.S., which launched in Spring 2024, is currently going into its third semester and has demonstrated a positive impact on FTE. Student enrollment is expected to remain reflective of its first two terms. The College feels any increase in FTE is adequately reflected in the Divisions projections.

Overall, the college expects Postsecondary Vocational to remain strong, with a slight increase in enrollment over the 2024-2025 year, reflected in the 2.81% increase in the Division's projection.

#### Developmental Education

Though FGC experienced a significant increase in Developmental Education (DE) FTE in 2022-23, FTE saw a moderate drop in 2023-24. However, the Division is predicting an increase in DE FTE in 2024-25. This is in alignment with the increase in our peak district demographic of 15–34-year-old students. Therefore, we are accepting the Division's projections without change.

Overall, the college expects Developmental Education to remain stable, with a potential slight increase in enrollment over the 2024-2025 year, reflected in the 2.63% increase in the Division's projection.

#### Educator Preparation Institute

Educator Preparation Institute (EPI) FTE will likely remain low, with no expectation of a return to previous levels. The counties that have used EPI as their alternative certification provider are now using the free North East Florida Educational Consortium (NEFEC) version. We have additionally converted the EPI program to baccalaureate level courses that can be taken individually. The impact will likely result in a slight increase in upper-level FTE, but a drop in EPI FTE. The FTE enrollment in the whole program is expected to stay low. Additionally, courses with the EPI prefix will be phased out after Summer 2024. Overall, the college expects EPI to remain small, with no adjustment to enrollment over the 2024-2025 year, reflected in the flat enrollment in the Division's projection.

#### Postsecondary Adult Vocational

Postsecondary Adult Vocational (PSAV) programs remain some of the most volatile in terms of enrollment. Most programs are of shorter duration, and are offered in response to current demand. Within the PSAV Trade and Industrial programs, we note that statewide initiatives have emphasized the importance and benefit of industry certificates of value. We offer a strong array of such programs, some of which have seen solid growth in the last few years.

One of our local industries with the highest demand is the Dept. of Corrections. The College continues to offer Corrections courses to meet this need, and the program continues to perform well, showing an upward trend.

While our Phlebotomy program declined in the year following COVID, it has seen a steady increase since then. FGC expects this gradual increase to continue.

Florida Gateway Colleges Facials, Firefighter, and Law Enforcement programs, just to name a few, have maintained steady enrollment. Cosmetology has also maintained steady enrollment, with all classes at full capacity for Fall 2024. In addition, our HVAC program continues to grow, which can be attributed to the hiring of a second instructor for Summer 2024. The impetus created by the Open Door Grant continues to positively impact growth in these career-oriented programs as well.

With statewide initiatives emphasizing the importance and benefit of industry certificates, we expect the demand to remain stable throughout the projection years. Overall, the college expects Postsecondary Adult Vocational to remain strong, with a slight increase in enrollment over the 2024-2025 year, reflected in the 2.75% increase in the Division's projection.

#### Summary

Florida Gateway College continues to monitor all the factors affecting enrollment and economic developments in our district region. We continue to actively pursue new programs of relevance, investing in our facilities, and continually recruiting in our communities. It is our expectation that we will continue to be well positioned to offer programs of value for the present and beyond. In light of our current upward trend in enrollment, we accept all of the Division's mathematically-derived projections.

\*\*\*\*\*

CC13

College Name: Lake-Sumter State College

Status: **Accepting Projections**

Narrative:

Lake-Sumter State College is accepting the 2024-25 FEP and accepting the 2025-26 to 2029-30 Projections.

The decision was based on the district county population's steady growth, public high school graduation, and increased overall student enrollment. The estimated numbers accurately reflect the ongoing growth patterns of the College campuses for UD, AP, PSV, and DE.

\*\*\*\*\*

CC14

College Name: State College of Florida, Manatee Sarasota

Status: **Replacing Projections**

Narrative:

SCF has replaced the model due largely to the fact that we have already seen significant increases for Summer and Fall 2024. A base enrollment increase has been applied to reflect a projected 1.35% increase due to changes in the local population. This is calculated by taking a weighted average of local population growth by age as compared to the percentage of the college enrollment in that age category. An additional .651% enrollment has been added to this to describe the enrollment increase seen in the Summer Enrollment. Fall Enrollment is already exceeding this at 5.0% up so a total of 3.91% projected for 2025 is a conservative estimate. The enrollments, population calculations, and a summary of this justification have been provided as evidence supporting the projection. The out-year projections were made using the same methodology as the baseline enrollment growth for the area weighted against the college enrollment profile by age. 2026 = 1.21%, 2027 = 0.73%, 2028=0.074%, 2029 =0.70%, and 2030=0.063%. Each year, the plan is to add some full-time equivalent (FTE) positions to Site 3, where distance learning will play a larger and more important role. By increasing the FTE count at Site 3, we aim to better support online enrollment and balance the site's capacity.

CC15

College Name: Miami Dade College

Status: **Adjusting Projections**

Narrative:

FTE Enrollment Plan and Capital Outlay FTE Projections (COFTE) Adjustment Supporting Documentation  
Thank you for the opportunity to review the latest state FTE Enrollment Plan and Capital Outlay FTE Projections (COFTE) for Miami Dade College (MDC). The state-supplied background materials are very helpful in facilitating our work on the project. The College's internal process includes a careful review of the state-supplied materials, input from the project workgroup regarding 2024-25 enrollment growth to FTE collegewide and by campus as well as planned and deployed strategies for growing enrollment.

MDC agrees with the Division of Florida College's 2024-25 estimated increase of 2.57%. This is based on our examination of prior year data, year-to-date enrollment figures used internally for strategic enrollment management, recent and planned program additions/refinements, and additional external resources/factors (e.g., high school graduates' projections, county population estimates, and employment data). In the out years, MDC is submitting projections that elevate enrollment in 2025-26 through 2029-2030 at a 2.00% annual rate. Sustaining and building on the 11.11% growth reflected in 2023-24 enrollment compared to 2022-23 will require substantial efforts by the college moving forward.

The series of 2.00% rate increases in 2025-26 through 2029-2030 delivers a more conservative approach than the latest division COFTE proposal and reflects an increase from the 2023-24 FTE-3 agreement. The division's 25.38% gain in 2029-30 from the 2023-24 base year provides a useful point of reference for future consideration. As the college moves forward and gains additional information the potential for higher out-year projections exists.

Source: Florida Department of Education <https://www.fldoe.org/accountability/data-sys/CCTCMIS/reports.html>

Initiatives below address increasing enrollment and retention since the college is aiming to grow beyond 2023-24 – the highest gain reported by MDC in the last 11 years – which will require strengthening existing enrollment and retention practices, procedures, and protocols as well as adding innovative approaches.

#### HIGHLIGHTING MIAMI DADE COLLEGE INTERNAL INITIATIVES

MDC is dedicated to expanding regional opportunities and serving the community through quality educational programs and services. Several new or scaling internal practices at MDC are expected to contribute to increases in enrollment and student success including the Future Ready Miami-Dade Scholarship program; technology-enabled student acquisitions and transitioning; scheduling that expedites major coursework entry; and promoting access through textbook and course material affordability.

#### Future Ready Miami-Dade Scholarship

In Spring 2024 Miami-Dade County and Miami Dade College (MDC) initially launched the Future Ready Miami-Dade Scholarship program. We are thankful to Miami Dade County for securing initial initiative funding through its annual budget process. Miami-Dade County is committing nearly \$3 million to fund this multi-year initiative and approved the first \$750,000 in their fiscal year 2023-24 budget in October 2023. Additionally, CareerSource South Florida has pledged to fund support services for scholarship recipients. The Future Ready Scholarship provides Miami-Dade County residents with the opportunity to

complete an Associate in Arts (AA) or Associate in Science (AS) degree at MDC for zero cost. Highlights from MDC's Future Ready Miami-Dade Scholarship website follow. The scholarship covers up to 60 credits toward the completion of an associate degree. Students can earn badges and career certificates as they progress toward their associate degree.

MDC will provide comprehensive support services, including personalized onboarding assistance, individualized help with the Free Application for Federal Student Aid (FAFSA), career counseling, resume development, and dedicated student success advisors. Students will also have opportunities to participate in Changemaking activities, recognition events, and networking opportunities with experts in their field of interest. The scholarship funds will be applied at the in-state tuition rate after all other resources available to cover tuition and fees have been applied.

#### Eligibility Criteria for the Future Ready Miami-Dade Scholarship

- Each student must be entering college for the first time or be a graduating dual enrollee. To meet the enrollment eligibility, students must enroll for a minimum of 9 credits (in the fall term moving forward) following high school graduation from a high school in Miami-Dade County. Eligible graduation dates are between May-July.
- Students must currently reside in Miami-Dade County.
- Students must have a cumulative high school GPA of at least a 2.0.
- Students must be admitted to Miami Dade College and registered for a minimum of 9 credits for the fall and spring semesters after high school graduation.
- Students must complete the corresponding FAFSA. You do not need to be eligible for federal financial aid, but you must complete the FAFSA application. If students are unable to complete a FAFSA application, they should complete the Expected Family Contribution Calculator. Email the results to their campus Financial Aid office.
- Students obtaining a standard high school diploma through Florida Virtual School will be accepted if they reside in Miami-Dade County.

#### Future Ready Miami-Dade Scholarship Functionality

- The Future Ready Miami-Dade Scholarship partnership program funds will be applied after all other scholarships, financial aid, and grants funds have been applied.
- Students must enroll for a minimum of 9 credits each Fall and Spring semester. Summer enrollment is encouraged.
- Students who wish to enroll before the initial fall term in August may qualify for the established Fast Track Shark Program during their first summer term.
- Out-of-state costs per credit for out-of-state students are not covered.
- Special fees for the Aviation and Culinary Arts programs are not covered.
- Failed or withdrawn courses count toward the 60-credit limit of the scholarship.
- No separate scholarship application is required.
- The Future Ready Miami-Dade Scholarship pays for in-state tuition and class fees and is not disbursable in cash.

While the start of the Fall semester is still just over a month away, Fall 2024 enrollment figures for current-year high school graduates are trending upward. The Future Ready Scholarship is playing an important role in attracting an array of direct transitioning students including those who otherwise might not have considered attending college a viable option for them financially. Tuition support and holistic

services offered by MDC and Career Source South Florida will help these students persevere and contribute to MDC degree completion.

#### Technology-enabled Student Acquisition and Transitioning Success

The Salesforce customer relationship management (CRM) platform is a major tool for enhancing MDC's student outreach and recruitment. Salesforce strategically nudges students throughout the enrollment process. Fall 2024 marks MDC's scaling up of its implementation of Salesforce. All Pre College-Advisors use the system to better manage communications and schedule orientation sessions. Recurring invites to students who have not signed up for orientation are now fully automated following standardized communications escalation protocols. Additionally, students who have already registered for orientation receive periodic, smart nudges encouraging them to complete onboarding steps such as verifying residency, submitting the FAFSA, providing transcripts, etc. which are vital steps in the enrollment process.

Additionally, MDC has launched the college's newest campaign using Salesforce with a strong emphasis on lead generation and pursuit which focuses on prospective students who have expressed interest in MDC but have not yet applied. This new campaign regularly nudges prospects to complete their admissions applications and successfully advance through the enrollment funnel. MDC staff are excited about having all prospective students in the CRM platform. This includes the ever-growing population of Dual Enrollment students. The software helps staff monitor growth and helps identify opportunities for further intervention throughout the process. One indicator of growth is the number of students who have attended orientation since March 1, 2024, in comparison to the same period last year. Over 1,400 additional students have attended orientation during the same period this year versus last year. Orientation is among the last steps in the enrollment process.

MDC's Fall 2024 expanded implementation of Salesforce emphasizes messaging automation while capitalizing on the software's ability to personalize recruitment/outreach communications. Salesforce software is used to monitor and reinforce on-track behavior which contributes to the delivery of better customer service. MDC's Fall 2024 Salesforce scaling is proceeding as planned and is expected to pay dividends for our students and the community that we serve.

#### Scheduling That Expedites Major Coursework Entry

The goal is to refine schedules to deliver entry into major-specific courses right away. The concept is to implement a "not-one-size-fits-all" course schedule approach to help students reach their educational aspirations. To accomplish this, the College is providing intensive advisor training opportunities. Student Services and Academic department facilitators encourage pathways that will lead students to early success outcomes including first-term completion with elevated first-term course pass rates. MDC is getting students into major coursework asap and helping students enter program offerings in growth industries including technology, education, health sciences, and nursing.

Students are strongly encouraged to declare a major upon college entry to bring additional clarity to the purpose of their studies. For AA students it can be an academic pathway/meta major that provides direction to their transfer-related schoolwork. Early on most educational plans include a healthy dose of general education core coursework. Making early entry into major coursework a scheduling default can help students better appreciate the connection between their studies and their career goals.

Strengthening the connection between student's "why" for pursuing higher education can contribute to improved engagement and elevated retention. Hence, MDC is encouraging consistent, more than half-

time course taking while refining schedules to deliver entry into at least one major specific course in the student's initial semester and in every subsequent term. Students enrolling over half-time have the best opportunity to pursue major specific coursework each semester.

#### Promoting Access Through Textbook and Course Materials Affordability

Collegewide, MDC is committed to posting instructional material costs in Follett's Discover System well in advance of the start of classes. Through a collaborative process, Academic Affairs, Follett's, and Strategy and Institutional Effectiveness (SIE) have implemented a proactive approach for delivering instructional materials costs to students well in advance of state guidelines. Approximately three months before the start of classes SIE sends Deans of Faculty detailed course section information indicating the sections that have instructional materials available to students and those where it is missing. Progress and outcomes are tracked weekly to prompt timely posting. This process allows students sufficient time to identify and pursue options to cost-effectively acquire needed instructional materials. MDC exceeds state standards for promptly posting textbook information and costs.

Moreover, MDC offers the MDC-Follett Shark Pack Program which is designed to support textbook affordability efforts and reduce the cost of instructional materials for students. For Fall 2024, MDC will continue expanding the program to deliver required core course materials through the College's learning management system (LMS), Canvas, and additional publishers have transitioned to codeless delivery. Highlights from MDC's Shark Pack website follow. The Shark Pack program delivers required course textbook(s) and learning material(s) at a reduced rate for eligible courses and class sections.

For eligible general courses and class sections (except First Year Experience Seminar SLS1106 and Medical Campus courses), required course textbook(s) and learning material(s) at present are delivered at a rate of \$20 per credit hour for an array of core courses. For a non-Medical Campus 3-credit class, all required materials for participating courses are typically \$60. For eligible SLS 1106 and Medical Campus courses and class sections, required course textbook(s) and learning material(s) are delivered at a flat rate per class. Students save an average of 25% off the current retail price of their required materials, with instructional materials for several courses available at a savings of 40%. Students can see the Shark Pack fees for eligible classes on their student fee invoice in MDConnect.

Shark Pack also delivers the required textbook(s) and learning material(s) on the first day of class, making sure students are ready to succeed. Additionally, MDC's Shark Pack initiative offers students additional affordable book options via digital resources. Students are benefiting from reduced instructional materials costs.

#### MIAMI DADE COLLEGE EXTERNAL FACTORS

External factors in Miami Dade County are favorable with an expanding population, gains in public high school graduates, and low unemployment rates. Economic conditions support growth with general moderation of inflationary factors.

#### Miami Dade County Population and High School Graduate Trends

Source: FLDOE POPCOLP & POPHSGA

Population -- Based on FLDOE figures, Miami Dade County population is up slightly in 2023-24 vs last year (0.8%) and down compared to five years ago (-1.2%). The table on the next page shows that looking

ahead, over the next five years consistent population growth is projected in Miami Dade County up 0.9% in one year and 3.1% through 2028-29. (Source: POPCOLP & POPHSGA).

Source: POPCOLP, POPHSGA & POPHSGP

Public HS Graduates -- Historical public high school graduate counts are up substantially in 2023-24 compared to the prior year (23.3%) as well as five years ago (12.2%) (Source: POPCOLP, POPHSGA & POPHSGP). Moving forward growth is projected to continue in the number of Miami Dade County high school graduates albeit at a more moderate rate of 4.6% short term and 7.8% long term.

Recent research suggested that Florida is in a better position than the nation as a whole and most other states in terms of high school graduate growth. Texas A&M built off research by the Western Interstate Commission for Higher Education (WICHE) which found ten states in America produced 56% of all high school graduates in 2019. The three highest-producing states in 2019 were California (485K), Texas (374K), and Florida (220K), together accounting for 28.6% of all high school graduates that year. Between 2000 and 2019, the United States saw a 32.2% increase in high school graduates, rising from 2.85M to 3.77M. The 3.77M graduates in 2019 are projected to rise to 3.93M in 2025, which would be a 4.2% increase. However, an 11-year downward trend from 2026 to 2037 is likely, with 3.52M high school graduates predicted in 2037. That would represent a -10.4% national decrease from 2026 to 2037, dropping production of high school graduates nationwide to its lowest levels since 2015 based largely on the reduction in annual births. Florida is among the exceptions. Between 2019 and 2037, 13 states are predicted to have graduate increases, with the highest increases expected in North Dakota (+33.6%) and Florida (+17.9%). Source: Predicting the Future of High School Graduates.

#### Low Unemployment in MDC's Service Region and Across Florida

Florida economic conditions continue to be favorable for workers. According to Florida Commerce, "Florida's May 2024 seasonally adjusted unemployment rate was 3.3%, unchanged from April 2024, and up 0.5 percentage points from a year ago. Florida's seasonally adjusted total nonagricultural employment was 9,951,600 in May 2024, an increase of 6,000 jobs (+0.1 percent) over the month. The state gained 222,200 jobs over the year, an increase of 2.3 percent. Nationally, May 2024 unemployment was 4.0% with the number of jobs rising 1.8 percent over the year." Investopedia contends that although economist's opinions vary, "many consider an unemployment rate of 5% or lower to be maximum employment, or as close to full employment as is possible in the real world ... there is general agreement that some unemployment is necessary to avoid inflation".

In May 2024, Monroe County had the state's lowest unemployment rate (1.9 percent), followed by Miami-Dade County (2.2 percent), and Okaloosa County and Wakulla County (2.6 percent each). Statewide, seven of ten major industries experienced positive over-the-year job growth in May.

"In May 2024, 23 of all twenty-four metro areas in Florida had over-the-year job gains. The areas with the largest gains were the Miami-Miami Beach-Kendall MD (+33,800 jobs, +2.6 percent), followed by the Tampa-Saint Petersburg-Clearwater MSA (+23,900 jobs, +1.6 percent), and the Fort Lauderdale-Pompano Beach-Deerfield Beach MD (+21,100 jobs, +2.3 percent). Only the Homosassa Springs MSA was unchanged in jobs over the year." Source:

<https://lmsresources.labormarketinfo.com/library/press/release.pdf> (June 21, 2024)

#### Moderating Inflation

According to the US Bureau of Labor Statistics, The Consumer Price Index for All Urban Consumers (CPI-U) for Miami-Fort Lauderdale-West Palm Beach declined 0.4 percent from April to June, 2024. The bi-monthly decrease in the “all items” index was largely attributed to a decline in the gasoline, recreation, and electricity indexes. The “all items” CPI-U increased 3.5 percent for the 12 months ending in June. February 2024 year over year was up 4.9%. Source: [https://www.bls.gov/regions/southeast/news-release/consumerpriceindex\\_miami.htm](https://www.bls.gov/regions/southeast/news-release/consumerpriceindex_miami.htm) (June 2024)

CC16

College Name: North Florida College

Status: **Adjusting Projections**

Narrative:

North Florida College is adjusting the projected FTE as follows:

2025 - AP by 16 FTE which is attributed to increasing the cohort size of the LPN to RN Bridge program (4 FTE), a new Agribusiness program starting (8 FTE), and an additional cohort of EMT (4 FTE). PSV increased by 4 FTE because of a new CNA program starting in Fall 2024. PSAV is projected to increase by 34 from reinstating the LPN program (17 FTE) and the first cohort of welding students to begin in the spring of 2025(13 FTE) and a new Food Service program (4 FTE). The projections for UD and DE were not adjusted as they align with NFC's internal projections.

2026 - UD increased by 15 FTE due to a new BAS in Organizational Management beginning the in the spring of 2025. PSAV increased by 25 due to a 2nd cohort of welding added (10 FTE), a 2nd cohort of LPN's added and cohort cap size increased from 16 to 24 (9 FTE), and the remaining courses in Summer 2025 for LPN cohort1 (6 FTE). The projections for AP, PSV, and DE were not adjusted as they align with NFC's internal projections.

2027 - UD increased by 30 FTE - second cohort of BAS Organizational Management (15 FTE) and first cohort of new BS Early Childhood (15 FTE). The projections for AP, PSV, and DE were not adjusted as they align with NFC's internal projections.

2028 - UD increased by 15 FTE - second cohort of BS Early Childhood (15 FTE). The projections for AP, PSV, and DE were not adjusted as they align with NFC's internal projections.

2029 - 2030 - NFC accepts the projected FTE for years 2029 and 2030 as they are inline with internal projections.

CC17

College Name: Northwest Florida State College

Status: **Accepting Projections**

Narrative:

Northwest Florida State College has reviewed and agrees with the projections provided. NWFSC has no contradictory data that shows any specific, significant, or identifiable changes that would significantly alter the projections provided. Current enrollment trends/projections are in alignment with local and regional trends and projections in population growth. As a 4-year junior college, the majority of our students reside within our service district of Okaloosa and Walton counties. Therefore, it is appropriate that our projected enrollment growth aligns with our local and regional projected population growth. As of January 2024, Walton County (in our service district) was ranked as the Number 1 fastest growing county in the state of Florida, and the 7th fastest growing county in the nation. Additionally, the projected enrollment increases align with historical trends in enrollment growth for the college. No outliers were noted in the data.

\*\*\*\*\*

CC18

College Name: Palm Beach State College

Status: **Adjusting Projections**

Narrative:

Palm Beach State College will be adjusting the Division Projections for the 2024-2025 reporting year. The FTE adjustments are due to the 2023-2024 reporting year being up 4.5% from the previous year. In addition, our current summer enrollment and early fall term registration are up 11% and 9% respectively compared to the same terms last year.

We expect FTE to increase by 5% for the 2024-2025 reporting year. However, we are accepting the Division Projections for the subsequent years of 2025-2026 to 2029-2030. One of the main factors in our conservative approach is that because of the pandemic, the last three years are not good indicators of where our enrollment will be in the future.

The adjustment numbers were determined by looking at the current registration numbers for the summer and fall terms and reviewing the numbers from the 2023-2024 reporting year. In addition, speaking with the subject matter experts coming to a consensus on where they see the increases coming from.

The adjustments are also based on the following:

- Population of ages 15-17 through 40-44 (DFC Data File FL\_Population\_by\_County\_by\_Age\_Projected). The age groups include students in dual enrollment, traditional high school graduates, adult workforce programs and baccalaureates programs
- Projection of HS Graduates over the next few years (DFC Data File FL\_High\_School\_Grads\_by\_County\_Projected)
- Stabilization and enhancements to our new Student Information System (Workday)
- Additional advisors embedded in high schools to assist in recruitment
- Offering more embedded courses in High Schools
- Growth of Baccalaureate Programs
- Growth of Dual Enrollment Program
- Revised MOU with School District of Palm Beach County
- Increasing retention through implementation of EAB Navigate 360
- Grant to expand Cybersecurity and IT Pathway
- Corporate Partnerships/Tuition Reimbursement
- Outreach to Veterans
- Target strategic effort called 4DX aimed at student success rates, student engagement, and increase courses offered on shortened academic terms.

\*\*\*\*\*

CC19

College Name: Pasco-Hernando State College

Status: **Accepting Projections**

Narrative:

Pasco-Hernando State College (PHSC) has reviewed and accepts the Florida College System's FTE projections for 2025 through 2030. PHSC agrees with the population projections for the counties within the college area, as we too are showing a slight population increase of 2% per year over the next 5 years and have been pretty consistent in our yield rates of prior-year HS grads. .Additonally, PHSC is showing a slight increase in the Fire Academy enrollment due to the opening of the Burn Center on our East (Dade City) campus. This was accounted for in 2024, as the Burn Center opened in Spring of 2024. Our indicators are in line with the state's cacluations for 2025. As we recently transitioned to a new ERP, we are unable to substantiate or challenge the state's modest increase in enrollment over the next 5 years, as we are in the process of developing validation reports within the new ERP.

\*\*\*\*\*

CC20

College Name: Pensacola State College

Status: **Adjusting Projections**

Narrative:

Pensacola State College (PSC) submits this justification statement to the Florida Department of Education regarding the updates made to our Full-Time Equivalent (FTE) projection model, emphasizing the efficacy of our previous model and the rationale behind our projections through 2030.

Our FTE projection model for the 2023-24 academic year, based on last year's data, demonstrated exceptional accuracy in predicting enrollments. This success underscores the reliability and effectiveness of our modeling approach. Given this track record, we have confidence in maintaining our previous year's predictions for the immediate future.

Looking ahead to 2030, although our previous model did not explicitly extend to that year, we have extrapolated projections based on current trends and strategic considerations. Our conservative recommendation of a nominal 8.12% increase beyond 2029 reflects both our data-driven approach and adjustments made to align with evolving educational strategies and goals.

Pensacola State College has made significant strides in enhancing operational efficiencies, notably through the implementation of a new student enterprise system. This system, despite initial challenges during implementation, is now fully operational and is pivotal in supporting our efforts to optimize student success, recruitment, and retention strategies.

Key strategic appointments, including our [relatively] new Associate Vice President of Student Affairs and Director of Academic and Student Affairs, have further strengthened our capacity to innovate in student recruitment and enrollment management. These initiatives are complemented by ongoing efforts to improve FAFSA completion rates, which we recognize as crucial in driving enrollment growth. Our Associate Vice President, Institutional Research and Enterprise Solutions has also been given the opportunity to take over the leadership of Financial Aid and Military Affairs. Where other organizations are struggling packaging their FAFSA applications, Pensacola State is not. PSC has packaged almost 4,000 FAFSA applications which is trending alongside the same parallel increase from 2023.

Furthermore, the decision to eliminate the application fee has proven instrumental, we are still seeing a drastic increase in applications and therefore, student matriculation. This increase is particularly notable given the discontinuation of Adult Education courses, which were historically FTE generating, highlighting our ability to adapt and thrive in changing educational landscapes. PSC still is not hurting from the closure of Adult Education.

Looking forward to Fall 2024, early registration efforts have shown promising results with a significant increase in FTE compared to the previous year at the same period. These positive outcomes reinforce our confidence in the effectiveness of our enrollment strategies and operational adjustments.

In contrast to projections from the Florida College System (FCS) FTE Growth Model, which foresee declines, PSC anticipates sustained growth. Our projections for FTE through 2030 reflect careful analysis of enrollment trends, strategic investments, and the evolving educational landscape.

In summary, our decision to update the FTE projection model with current data is grounded in the demonstrated accuracy of our previous predictions and our proactive approach to adapt to evolving educational needs. We remain committed to transparency and excellence in our projections, ensuring alignment with the educational objectives of Pensacola State College and the State of Florida.

Thank you for considering our submission. We look forward to continued collaboration with the Florida Department of Education to advance educational opportunities and outcomes in our community.

CC21

College Name: Polk State College

Status: **Accepting Projections**

Narrative:

Polk State College has reviewed and accepted the Florida College System's FTE Estimates for 2025 and Projections until 2030.

Polk State College has been closely monitoring its FTE this Fall 2023 and Spring 2024 semesters and acknowledges that our data supports an end of year FTE of (6033). Enrollment in Upper Division UD has remained steady and flat for the last several semesters and the estimate of 661 FTE looks to be right on target in accordance with our Enrollment Reports. The enrollment projections for UD up until 2030 are also accepted with our data supporting FTE enrollment increasing over that period from 661 to 790. Enrollment in the Advanced and Professional category has remained strong for Fall 2023 and Spring 2024 and the College agrees that it will acquire (3608) FTE in A&P this year. Enrollment in the A&P courses has increased steadily because of the college-aged population in Polk County increasing and demand for courses. The projections for A&P also look accurate for a significant increase out until 2030 and are accepted. Polk State College Spring 2024 FTE for A&P is up 7.9% from previous year. The A&P will continue to increase as projected by Florida College System. The estimates and projections for the PSV category also appear accurate, with a increase in FTE. Polk State College FTE is currently up 6.3% from the previous year. The College continues in its efforts to recruit credentialed faculty. We also accept the DE FTE estimate and projections with FTE slightly increasing from 123 to 146 between 2025 and 2030. The College accepts the Florida College System's estimates of slow slight enrollment growth and projections for EPI as they reflect the College's efforts to increase enrollment through curriculum updates and increased field experience and student teaching opportunities. The estimate and projections of FTE for the PSAV category are both accepted - with a modest increase between 2023-24 and 2024-25, and then increase 3-4% per year in the following years up until 2030.

\*\*\*\*\*

CC22

College Name: St. Johns River State College

Status: **Adjusting Projections**

Narrative:

Overall College FTE Projections Based on Service District Population

St. Johns River State College accepts the Division Projection Model with adjustments for 2024-2025 (FEP). The College also accepts the Division Projection Model with adjustments for the five-year Capital Outlay Full-Time Equivalent (COFTE). The adjustments are based on new/improved programs for reporting years 2025 through 2027. College personnel reviewed historical FTE files for total FTE and service district population files to confirm that three years of historical data were used in the Division's projections for the College (DFC Data file FTE\_Enrollment\_History\_Lower\_Upper\_Combined, FL\_Population\_by\_College\_Actual, and FL\_Population\_by\_College\_Projected).

The Division's model and College adjustments for RY 2025 result in an FTE of 4,413 (+2.06%). The Division's model and College adjustments for RY 2026 and RY 2027 result in a final FTE of 5,169 in RY 2030 (COFTE yearly % increase ranges from +2.46% to +5.19%).

Programmatic Projections

The College accepts DE, EPI, PSAV, AB and ASG projections and is adjusting FTE for upper division, lower division A&P, and PSV categories.

Upper Division

The College is adjusting FTE for both FEP and COFTE projections. The College is opening two new baccalaureate degree programs in fall 2024 which are expected to add 11 upper division FTE in RY 2025 (SACSCOC Substantive Change Approval Letters for BS in Criminal Justice – Applied Intelligence Studies and BAS in Information Systems Technology). The 2025 adjustment (new/improved programs) to the model results in a projected growth in FTE of 7.00% for an upper division FTE of 214 in RY 2025. The College has also adjusted the FTE by 40 in RY 2026 due to planning of 5 more additional baccalaureate degree programs opening in fall 2025 (Notice of Intent for 5 programs and District Board of Trustees approval). The 2026 adjustment (new/improved programs) results in a 21.03% increase to the model and a final RY 2026 FTE of 259. In RY 2027 the College has added an additional 15 FTE to the new/improved programs category to account for the new baccalaureate programs now teaching all upper division courses in the new programs. This results in a 7.72% increase in FTE. This is then followed by increases for the next three years (2.05% to 2.51%) which mirror the College's overall FTE trends.

A & P Lower Division

The College is adjusting the divisions projections for RY 2025 and RY 2026 based upon the additional lower-division enrollment of baccalaureate students (see above). The adjustment for RY 2025 is 10 FTE and the adjustment for RY 2026 is 20 FTE. These adjustments result in an FTE of 3,208 (+1.23%) in RY 2025 and an FTE of 3,323 (+3.58%) in RY 2026. This category is then projected to increase (2.58% to 2.83%) for the remaining four years for a final FTE of 3,699 in RY 2030. This mirrors the College's overall FTE trends which is to be expected as approximately 73% of the College's FTE was in this category in the 2024 reporting year.

PSV

The College is making adjustments to the Division's projection for PSV in RY 2025 and RY 2026. Both adjustments are in the New/Improved programs category. The College is adding 25 FTE in RY 2025 for a final FTE of 801, and 40 FTE in RY 2026 for a final FTE of 864. The adjustments are due to the projected increase in enrollment from the opening/reopening of three additional AS degrees in fall 2024 (SACSCOC Substantive Change Approval Letters of AS Programs). With the adjustments this category is projected to increase 4.30% in RY 2025, 7.87% in RY 2026, and then continue to increase for the following four years

(2.36% to 2.71%). These outyear increases are very similar to that of lower division A & P which is to be expected as both categories enroll first-time-in-college (FTIC) students and recent high school graduates.

#### DE

The College accepts the Division's projections for this category. The projection model has DE FTE stable for RY 2025 (36 FTE) followed by slight increases of 1 or 2 FTE for RY 2026 to RY 2030. This is in line with college expectations for the program.

#### EPI

The College accepts the Division's projections for this category (RY 2025 through RY 2030). The projection model predicts FTE's ranging from 12 FTE in RY 2025 to 13 FTE in RY 2030. The projected FTE is consistent with College expectations for EPI.

#### PSAV

The College accepts the Division's projections for this category (RY 2025 through RY 2030). The annual FTE % changes range from 0.84% to 3.97% and are very similar to those for A&P and the College as a whole. This category accounted for almost 3% of the RY 2024 FTE and like A&P enrolls FTIC students and recent high school graduates.

#### AB

The College has reviewed and accepts the Division's projections for Adult Basic Education of an increase of +1 FTE in RY 2025 followed by stable FTE or slight increases to give a final projected FTE of 24 in RY 2030.

#### ASG

The Division's model projects a total FTE of between 1 and 2 for all projection years in this category. The College accepts the Division's projection for this program area.

#### Site Projections

The College is accepting the site projections for all categories with no adjustments.

CC23

College Name: St. Petersburg College

Status: **Replacing Projections**

Narrative:

St. Petersburg College continuously monitors its FTE and has replaced the projections from the Division of Florida College's (DFC) to better reflect current trends.

As the pandemic has drastically skewed enrollment, using traditional models for predicting enrollment is not feasible. Instead, the college has considered several factors when determining its 5-year projections:

- Current national and regional outlook
- County population and HS graduate data
- Enrollment term trends comparison to prior years
- New initiatives.
- Program scalability measures
- New scheduling tools
- New programs

#### New Programs & Programmatic Projection Changes

##### Upper Division

The DFC projection for Upper Division is a -3.0% decrease. With the new bachelor's programs started this year (Cardiopulmonary Science, Secondary English Education, Prekindergarten/Primary Education) and the continued success of our BAS Human Services program, we anticipate an increase of about 0.9% to 2,223 for the 2024-25 year. Additional year adjustments have been made to 2026-2030 considering the new programs and programs still awaiting approval.

##### A&P

The DFC projection for A&P is at -3.0% decrease. Our new AA pathways and High school programs continue to have a positive impact on enrollment. In addition, our FTIC enrollment is up 5.4% overall and 2% A&P compared to the same day last year. We anticipate an increase of 2.2% to 8,187 for the 2024-25 year. Additional year adjustments have been made to 2026-2030 to reflect the overall anticipated FTE.

##### PSV

The DFC projection for PSV is a -3.0% decrease. Enrollment in our AS and certificate programs continues to improve. Our Health Sciences community in particular is showing significant improvement. Success in our AA pathways is also having an impact in this area. The Promise Scholarship initiative is going strong and was expanded this year to cover three additional high schools for a total of eight. The College anticipates an increase of 3.1% over the prior year at 4,045 for the 2024-25 year. Additional year adjustments have been made to 2026-2030 to reflect the overall anticipated FTE.

##### College Prep

The DFC projection for College Prep is a -3.1% decrease. As of today, we see an increase in our College Prep enrollment when compared to last year. The College expects a small increase of 1.0% to 355 for the 2024-25 year, with minimal change in the following years 2026-2030.

##### PSAV

The DFC projection for PSAV is a -3.2% decrease. Our PSAV program enrollment remains steady this year and is expected to remain at 187 for the 2024-25 year. Additional year adjustments have been made to 2026-2030 to reflect the overall anticipated FTE.

#### Apprenticeship

The DFC projection for Apprenticeship is a -2.9% decrease. Our Electrical Lineworker apprenticeship program is expected to stabilize this year. The College expects an increase of 1.0% in this area to 138 for the 2024-25 year. Additional year adjustments have been made to 2026-2030 to reflect the overall anticipated FTE.

Based on the above, the College is projecting 15,135 FTE for the 2024-25 year, an increase of 2.2%. This is in line with the current reporting year increases compared to the prior year on the same day.

1. For Summer 2024 we are up 3.2% FTE as of the same day compared to Summer 2023
2. For Fall 2024 we are up 2.8% FTE as of the same day compared to Fall 2023
3. Overall, we are up 2.9% FTE as of the same day when compared to last year

Note, for the FTE comparisons, the 2024-2025 FTE is as of 7/18/2024. The prior year FTE is based on equivalent day of respective reporting year/terms. Additional year adjustments have been made to 2026-2030 to reflect the overall anticipated FTE.

CC24

College Name: Santa Fe College

Status: **Adjusting Projections**

Narrative:

Santa Fe College's current Fall 2024 registration cycle shows a 4% increase in enrollment over 2023 at 33 days prior to the start of classes. With four weeks remaining before the start of the Fall 2024 term, a lot will happen regarding enrollment. The increases are encouraging, and increases were also realized in the summer of 2023 and spring of 2024.

The projections provided show a steady increase in enrolment/FTE going forward. It is a modest increase of about 3% every year and about a 25% increase from 2023-2030.

New programs in ETAM (Engineering and Technology Advanced Manufacturing and Diesel Mechanics) are coming online with starts date this year. The projected increases by the COFTE projections reflect the added FTE expected from these programs.

Leadership at Santa Fe College agrees with the projections provided and are therefore accepting the projections presented. The only adjustment being made is a result of moving our Automotive program from our main campus (site #1) to Blount Hall (site #3).

Please see the additional information in our CC24.FTEPLAN.ADJDOS.2024.PROD.pdf document showing the analysis of the provided projections.

CC25

College Name: Seminole State College of Florida

Status: **Adjusting Projections**

Narrative:

Adjustments were made to the Division of Florida College's 2025-2030 enrollment projections by the Seminole State College. The primary reason for adjustments is to account for the College's Strategic Enrollment Management Plan (SEMP). Seminole State College used FY2024 the baseline for the SEM, with expected changes occurring as of Fall 2024. The SEMP specifically addresses Associate of Arts (AA) and career-ready programs such as the Associate of Science (AS) degree, as a result the changes to the FTE projection for AP, PSV, and PSAV have been made to align with the SEMP goals. As a result, we have reviewed and adjusted the Florida College System's FTE Projections for 2025 through 2030 to compensate for the planned increases

The College has implemented the SEMP and based on the actions being undertaken, we anticipate growth in our AP, PSV, and PSAV FTE categories over the next several years. These projections include a 2% increase for FY2025, a 3% increase for FY2026, and a 5% increase for FY2027. Following this plan, we expect the practices we enact to create residual growth through FY2030.

Additionally, the College's "Seminole State Commits" is currently underway and is designed to identify areas of educational opportunity within Seminole County and provide services to help increase mobility by addressing three goals:

1. Identify and build relationships with local community leaders and residents in underserved communities.
2. Build awareness and trust among minorities and under-employed, unemployed, and working adults, especially those impacted by COVID-19.
3. Create degrees, certificates and programs that meet community and employer needs and provide family-sustaining incomes.

Through partnerships across Seminole County, the College will develop career and employer-focused programs and pathways to attract more students. As a result, the College has made changes to the AP, PSV, and PSAV FTE projections for FY2025 through FY2030.

Finally, from fall 2023 through summer 2024 we have exceeded prior year enrollment totals, suggesting that the new practices are improving enrollment and bringing Seminole State College back into alignment with the positive trends projected by FDOE prior to the COVID-19 pandemic.

UD

Seminole State College accepts the UD projections of 871 for FY2025 and the changes projected through FY2030 based on the current enrollment in baccalaureate programs.

AP

Seminole State College has adjusted the initial AP projections based on the SEMP, Seminole State Commits, and our QEP. The QEP, Excel-A-Raider, enters year 2 in FY2025 and is designed to help increase retention of AA students, resulting in a larger number of students retained by the College, increasing our overall population of AP students. For FY2025, Seminole State College has adjusted the projections to reflect the 2% growth outlined in the SEMP, increasing FTE from 6,107 to 6,229. For FY2026, based on the SEMP goal of a 3% increase in enrollment, FTE has been adjusted from 6,229 to 6,416. For FY2027, based on the SEMP goal of a 5% increase in enrollment, FTE has been adjusted from 6,416 to 6,737. For FY2028-FY2030, based on the changes enacted through the SEMP, Seminole State expects a 3% increase each year. This is reflected in increasing the FTE projections for FY2028 from 6,737 to 6,939; FY2029 from 6,939 to 7,147; and for FY2030 from 7,147 to 7,361.

PSV

Based on the SEMP and Seminole State Commits, Seminole State College has adjusted the PSV FTE for FY205 through FY2030. For FY2025, Seminole had adjusted the projections to reflect the 2% growth outlined in the SEMP, increasing FTE from 2,537 to 2,588. For FY2026, based on the SEMP goal of a 3% increase, FTE projections have been increased from 2,588 to 2,666. For FY2027, based on the SEMP goal of a 5% increase, FTE projections have been increased from 2,666 to 2,799. For FY2028-FY2030, based on the changes enacted through the SEMP, Seminole State expects a 3% increase each year. This is reflected in increasing the FTE projections for FY2028 from 2,799 to 2,883; FY2029 from 2,883 to 2,969; and for FY2030 from 2,969 to 3,058.

#### DE

Based on the current trend of decline in DE from continuing impacts from SB1720 and fewer non-exempt students we accept the FTE projections.

#### EPI

Based on the current changes in demand from Seminole County Public Schools based on their enrollment, we accept these projections.

#### PSAV

Based on the SEMP and Seminole State Commits, Seminole State College has adjusted the PSAV FTE for FY205 through FY2030. For FY2025, Seminole had adjusted the projections to reflect the 2% growth outlined in the SEMP, increasing FTE from 243 to 248. For FY2026, based on the SEMP goal of a 3% increase, FTE projections have been increased from 248 to 255. For FY2027, based on the SEMP goal of a 5% increase, FTE projections have been increased from 255 to 268. For FY2028-FY2030, based on the changes enacted through the SEMP, Seminole State expects a 3% increase each year. This is reflected in increasing the FTE projections for FY2028 from 268 to 276; FY2029 from 276 to 284; and for FY2030 from 284 to 293.

#### APP

Though Seminole State College is currently evaluating its apprenticeship programs, at present we agree with the FTE projections based on current enrollment levels.

#### AB and ASG

Based on the current demand from Seminole State College's service area, we accept the FTE projections for both categories.

#### VP

Based on the current demand in this area, we accept the FTE projections.

CC26

College Name: South Florida State College

Status: **Adjusting Projections**

Narrative:

South Florida State College (SFSC) has carefully reviewed the Division of Florida Colleges' FTE projections for 2024-2025 through 2029-2030. After thorough analysis, SFSC has adjusted these projections to reflect our anticipated enrollment trends more accurately. Our justification for these adjustments is based on a combination of recent enrollment data, ongoing initiatives, and strategic planning efforts.

#### Overall Enrollment Trends and Strategic Planning

SFSC's enrollment management team, led by the Dean of Student Services and Dean of Institutional Effectiveness, meets bi-monthly to analyze enrollment and FTE data. This proactive approach entails data analysis and implementing targeted activities to promote the college's programs and services while improving student retention (SFSC Forecast Analysis). This strategic focus has yielded positive results, as evidenced by our recent enrollment figures (SFSC\_FTE\_2017\_2025).

For the spring term of 2024, SFSC experienced a significant increase in total FTE, up approximately 7.56% or 73.91 FTE compared to the previous year (SFSC\_FTE\_Spring\_Summer\_Fall). This growth trend has continued into the summer 2024 term, with FTE currently up 2.51% or 7.86 FTE compared to the same day last year. Furthermore, our fall 2024 enrollment, though still ongoing, shows an increase of 31.74 FTE or 4.99% (SFSC\_FTE\_Spring\_Summer\_Fall). These consistent increases across multiple terms support our projection for continued growth into 2025 and beyond (SFSC\_FTE\_2017\_2025).

#### Program-Specific Growth and New Initiatives

##### 1. Adult Education Programs

One of SFSC's most significant areas of growth has been in our Adult Education programs (ABE, GED, and ESOL). In the spring 2024 term, Adult Education FTE increased by 25.53 FTE or 21.42% compared to the previous spring. This growth was largely driven by the expansion of our ESOL program, which saw a headcount increase of 41.74% or 96 students (SFSC\_FTE\_Spring\_Summer\_Fall).

The upward trend in Adult Education has been consistent since 2022. Total FTE in this area has grown from 254.29 FTE in 2022 to 375.65 in 2024, representing a substantial increase of 47.73% (SFSC\_Adult\_Education\_FTE). Given this solid historical performance and our ongoing efforts to support adult learners, we anticipate continued growth in this area.

##### 2. Dual Enrollment and Career Education

Our dual enrollment programs have grown remarkably, particularly in the Postsecondary Adult Vocational (PSAV) area. Spring term dual enrollment headcount increased by 55 students or 6.85%, with PSAV enrollment up by 43.2% (SFSC\_FTE\_Spring\_Summer\_Fall). Much of this growth can be attributed to the success of the Highlands Career Institute at SFSC, which allows high school students to simultaneously earn a high school diploma and work toward a career certificate or college credit. This program is a pipeline for future enrollment as students continue their education beyond high school (HCI).

### 3. New Program Initiatives

SFSC has recently launched several new programs designed to meet the evolving needs of our community and attract new student populations:

a. Criminal Justice Specialization: Starting this year, we have introduced a new criminal justice specialization as part of our Bachelor's in Supervision and Management degree program. This specialization targets working professionals in law enforcement, corrections, and probation who are seeking leadership positions (Criminal\_Justice\_Specialization). This new specialization will contribute to growth in our upper-division FTE.

b. Drafting Career Certificate: We are enrolling students in a new Drafting Career Certificate program that includes architectural, civil, and multidiscipline drafting (Drafting (Hardee) Flyer and Drafting Program Hardee). We project that this program will generate approximately eight FTE in the PSAV category for 2025.

#### Program Reclassification and FTE Distribution

It's important to note that SFSC has reclassified several programs, primarily in the health sciences, from Advanced and Professional (AP) to Post Secondary Vocational (PSV). This reclassification accounts for the projected 255 FTE increase in PSV for 2025 and a large portion of the corresponding 263 FTE decrease in AP (255 decrease due to ICS reclassification to PSV and eight FTE decrease to align with the College's FTE forecasting).

#### Marketing and Recruitment Efforts

To support our growth initiatives, SFSC's marketing team has launched a new campaign called "It's Possible" (Detail POP SOUTH FLORIDA STATE COLLEGE-06-27-2024 06-12-30-16 (1)\_Page\_1, Detail POP SOUTH FLORIDA STATE COLLEGE-06-27-2024 06-12-30-16 (1)\_Page\_2, Facebook Banner July, It's Possible to Start a New Career). The campaign is designed to attract new students by highlighting the accessibility and transformative potential of education at SFSC. The campaign focuses on drawing in prospective students by emphasizing the college's ability to catalyze personal and professional growth.

#### Conclusion

Based on our recent enrollment trends, strategic program development, and targeted marketing efforts, SFSC believes that the adjusted FTE projections reflect our anticipated growth more accurately. We are committed to continuing our data-driven approach to enrollment management and program development to ensure that we meet the educational needs of our community while maintaining sustainable growth.

Looking beyond 2025, SFSC anticipates continued and modest growth in our FTE projections. Specifically, we project growth rates of approximately 2% annually through 2030. Our forecasts indicate growth of 2.1% in 2026, 1.91% in 2027, 2.19% in 2028, 2.11% in 2029, and 1.83% in 2030. These projections are based on our ongoing strategic initiatives, the maturation of our new programs, and our commitment to meeting the evolving needs of our service area.

SFSC is dedicated to monitoring these projections closely and adjusting our strategies to ensure we meet our enrollment goals and, more importantly, fulfill our mission of serving our students and community effectively.

College Name: Tallahassee State College

Status: **Accepting Projections**

Narrative:

Tallahassee State College (TSC) reviewed and evaluated the Florida College System's FTE Enrollment Projections. An analysis of TSC's current enrollment trends support the projections. Therefore, TSC accepts the Florida College System's FTE Projections. Tallahassee State College (TSC) is accepting the Florida College System's FTE Estimate for the college because the 1.7% FTE increase matches the growth patterns of our population demographics in our recruiting areas. Last year, TSC started new Bachelor Degree programs. Based on trending enrollment, the Bachelor Degree programs will maintain enrollment in the 2024-2025 year. For new Credit programs, TSC trends show slight increases as the college strengthens the program curriculum. Postsecondary Vocational Apprenticeship and Adult trends remain the same for the college. TSC is accepting the 2026-2030 projections for the college. These projections follow the trend data for the 2024-2025 projections. Also, TSC Projections for the 2026-2030 year follow the growth seen in service district enrollments and retention rates for continuing students.

CC28

College Name: Valencia College

Status: **Adjusting Projections**

Narrative:

Valencia College continues to experience enrollment increases, and the enrollment gains from the Summer 2024 term combined with the Fall 2024 gains experienced so far support the adjustment. In Summer 2024, student headcount increased by 9.1% and FTE increased by 9.4%. For the Fall 2024 term, student headcount is up 6.7% compared to the same day last year, and FTE is up 5.9% compared to the same day last year. Though these two items might suggest even higher headcount than the adjusted number, we are adopting a conservative estimate given the difficulties some students are having navigating financial aid changes due to the redesigned Free Application for Federal Student Aid (FAFSA). Specifically, we are requesting adjustments of 40 FTE for Upper Division due to new baccalaureate programs in Public Safety and Education, 400 FTE for A&P where we have seen an 11.7% FTE increase between Summer 2023 and Summer 2024, 90 FTE for PSV enrollment where we have seen a 4.8% FTE increase between Summer 2023 and Summer 2024 along with 24 FTE for DE which grew 5.2% between Summer 2023 and Summer 2024 for a grand total of 554 FTE. Our day-over-day comparison data for Fall 2024 compared to Fall 2023 displays strong growth demonstrating that this is not a single term increase. The FTE totals by program are actual increases for the Summer 2024 term and day-over-day increases in the Fall 2024 enrollment funnel to date. We also monitor our student's payment and financial aid status to ensure that we do not see a higher than usual proportion of enrollments that are unpaid or awaiting financial aid.

We attribute this enrollment growth to (1) continuous improvement of enrollment, registration and other Student Affairs processes, (2) increased capacity in front door courses due to part-time faculty hiring, (3) baccalaureate degree program expansion, and (4) Dual Enrollment student identification partnerships with our school district partners.

Though significant growth is expected through 2030, Valencia College is concerned about its ability to expand capacity given operational budget constraints. Without the ability to add course sections and scale student supports like advising and tutoring, the college will not be able to meet the regional demand that is expected.

We accept the divisions projections for years 2026 - 2030.
