

Early Learning Programs Estimating Conference
School Readiness Program
Executive Summary
December 18, 2025

The Early Learning Programs Estimating Conference met on December 18, 2025, to adopt a new School Readiness Program forecast through FY 2030-31. The new forecast incorporates final FY 2024-25 FTE data; FY 2025-26 data through October 2025; and demographic data from the latest Demographic Estimating Conference.

Children in eligible low-income households can participate in the program's range of services from birth through the age of 12.¹ The FTE are linked to "Care Level" (Infant, Toddler, 2 Year Old, Preschool 3, Preschool 4, Preschool 5, and School Age) with three different forecasting methodologies tailored to those levels of care. To forecast Infant FTE, average historical rates of Infant FTE relative to births are applied to the Demographic Estimating Conference birth series. Historical progression trends from each of the Care Levels between Infant and Preschool 5 are used to forecast cohorts moving through these respective levels. Finally, average historical rates of School Age FTE relative to non-scholarship Florida Education Finance Program (FEFP) FTE are applied to the Education Estimating Conference non-scholarship FTE forecast series to produce the School Age FTE forecast.

Final enrollment data reported for FY 2024-25 shows a revised total of 113,272.22 FTE, an increase of 209.70 relative to the prior estimate (August 2025) and an increase of 1,857.40 (1.7%) over FY 2023-24. Enrollment data reported through October 2025 for FY 2025-26 suggests a preliminary total of 109,480.60 FTE, a decrease of 3,781.82 relative to the prior forecast and a steep decline of 3,791.62 (-3.3%) from the FY 2024-25 actual. For the subsequent years, growth over the prior year ranges from a high of 2,901.41 (2.6%) in FY 2030-31 to a decline of 138.49 (-0.1%) in FY 2026-27. In the final year of the forecast, FY 2030-31, total school readiness FTE is expected to reach 115,622.74.
