

**Revenue Estimating Conference
Slot Machine Revenues
February 25, 2021
Executive Summary**

The Revenue Estimating Conference reviewed slot machine revenues on February 25, 2021. Through February, collections were running \$0.4 million under estimate. Today, all facilities are operating under reduced hours and, with one exception, have deployed only 50 percent of the typical number of machines. There are no current plans to increase this number.

Because the \$0.4 million loss was mainly attributable to the larger facilities, the Conference made a slight reduction in revenue in the current year. On net, these adjustments decreased projected tax collections by \$2.2 million in FY 2020-21 relative to the forecast made in December 2020.

In FY 2021-22, tax collections grow by 24.1% based on the assumption that a viable vaccine or effective treatment will be widely available by the beginning of the new fiscal year. The growth in FY 2021-22 is marginally less (by 0.6 percentage points) than anticipated in the December forecast, reflecting the slightly lower revenue performance in the current year. The machine count, days of operation and overall growth rates for the subsequent years all return to the December forecast, but working from a reduced base. The details of the annual forecast and the changes are shown in the table below.

This forecast does not include any impact from the expansion of the Seminole Hard Rock Casino in Hollywood, which was completed in October of 2019. The introduction of new slot machines at this site is likely to decrease slot machine gaming activity at the pari-mutuel facilities in Broward and Miami-Dade counties to an extent that is presently unknown, lowering state revenues and associated transfers to the Educational Enhancement Trust Fund (EETF).

**Slot Machines Tax
