

Review of Federal Funding to Florida in Fiscal Year 2007

December 2008

**Florida
Legislative Committee on Intergovernmental Relations**

Florida Legislative Committee on Intergovernmental Relations

(As of December 2008)

Legislative Members

Senator Anthony Hill, Sr., Chair
District 1
Representative James Frishe, Vice Chair
District 54
Senator Nancy Detert
District 23
Senator Mike Haridopolos
District 26
Senator Frederica Wilson
District 33
Representative Charles Chestnut, IV
District 23
Representative Brad Drake
District 5
Representative Mike Horner
District 79

Gubernatorial Appointees

To Be Announced

Alton L. "Rip" Colvin, Jr. - Executive Director

What is the LCIR?

The Florida Legislative Committee on Intergovernmental Relations (LCIR) is a legislative entity that facilitates the development of intergovernmental policies and practices. The Florida LCIR strives to improve coordination and cooperation among state agencies, local governments, and the federal government.

What Issues Have Been Addressed by the LCIR?

The LCIR completes several publications annually, including the Local Government Financial Information Handbook, Finalized Salaries of County Constitutional Officers and Elected School District Officials, and Intergovernmental Impact Report (Mandates and Measures Affecting Local Government Fiscal Capacity). In addition, the LCIR has addressed the following issues:

- Municipal Incorporations and Annexation
- Impact Fees
- Natural Disaster Preparedness, Response and Recovery
- Local Government Financial Emergencies
- Urban Infill & Infrastructure Capacity
- Marina and Dock Permitting
- State, Regional, and Local Planning
- Voting by Mail
- Economic Development
- Affordable Housing
- Federal Funds to Florida
- Federal/State Relations

If you would like additional copies of this report or have comments or questions pertaining to the information contained herein, please contact the LCIR at (850) 488-9627. We welcome your input or suggestions. Our mailing address is:

Executive Summary

The purpose of this report is to provide the Florida Legislature and other interested parties with a review and analysis of federal funding to Florida in fiscal year 2007 using data produced by the U.S. Bureau of the Census. In particular, this report focuses on federal grant expenditures to Florida's state and local governments. Florida's historically low per capita ranking among the states in the receipt of federal grants has been an area of particular concern to policymakers.

This report should be useful for making statistical comparisons among states of various federal agencies' funding programs. Additionally, the report should be instructive to decision makers working to develop consensus on priorities and strategies for increasing the state's receipt of federal grants.

This report begins with a review of the two major classifications of federal financial assistance provided to states. These two classifications are: 1) federal direct expenditures and 2) other financial assistance.

Federal Direct Expenditures to Florida

Federal direct expenditures constitute actual funding outlays or obligations of the federal government. These expenditures are reported by the U.S. Bureau of the Census in five categories: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries & wages.

In 2007, federal direct expenditures to Florida totaled \$147 billion or \$8,059 per capita, based on the state's 2007 population estimate of 18.3 million. Florida had the 4th largest expenditure of all states, unchanged from 2006. However, on a per capita basis, Florida ranked 29th among the states, down from 25th in 2006.

Direct payments for individuals for retirement and disability constituted the largest category of federal direct expenditure. This category includes Social Security payments, federal retirement and disability payments, and veterans' benefits. Florida's direct payments for retirement and disability totaled \$55.6 billion, or \$3,044 per capita, and accounted for 38 percent of the state's total federal direct expenditures. Florida had the 2nd largest expenditure total of the fifty states, unchanged from 2006, and ranked 7th on a per capita basis, unchanged from 2006.

Considering Florida's large elderly and retiree populations, these rankings should come as no surprise. Based on Census 2000 counts, Florida's elderly population, defined as age 65 years and over, totaled 2.8 million and accounted for 8 percent of the nation's total elderly population of 35 million. In Florida, the elderly constituted nearly 18 percent of the state's total population. The elderly, as a percentage of the total state population, was higher in Florida than in any other state.

The next largest category of federal direct expenditure was direct payments for individuals other than for retirement and disability. This category includes such items

as Medicare benefits, Excess Earned Income Tax Credits, Unemployment Compensation, and Food Stamp payments. Florida's other direct payments totaled \$42.6 billion, or \$2,332 per capita, and accounted for 29 percent of the state's total federal direct expenditures. Florida had the 2nd largest expenditure total of the fifty states, unchanged from 2006, and ranked 7th on a per capita basis, up from 8th in 2006.

Federal grant obligations to Florida totaled \$21.4 billion, or \$1,173 per capita, and represented 15 percent of total federal direct expenditures to the state. Florida had the 4th largest obligations total of the fifty states, up from 5th in 2006; however, the state ranked 49th on a per capita basis, down from 46th in 2006.

The value of procurement contract obligations totaled \$15.8 billion, or \$863 per capita, and accounted for 11 percent of the state's total federal direct expenditures. Florida had the 5th largest obligations total of the fifty states, unchanged from 2006, and ranked 32nd on a per capita basis, also unchanged from 2006.

The smallest category of federal direct expenditures to Florida was salaries and wages. Such payments totaled \$11.8 billion, or \$647 per capita, and accounted for 8 percent of total federal direct expenditures to the state. Florida had the 4th largest expenditure total of the fifty states, unchanged from 2006; and the state ranked 33rd on a per capita basis, down from 32nd in 2006.

Other Financial Assistance to Florida

Other financial assistance consists of the face value of federal insurance coverage as well as

the dollar volume of federal guaranteed and direct loans. Other financial assistance to Florida totaled \$465 billion or \$25,453 per capita. The state ranked first among the fifty states in both total and per capita assistance due to the significant face value of flood insurance coverage provided to Florida, which constituted 97 percent of total other financial assistance provided to the state by the federal government.

The total amounts of other federal assistance to Florida are summarized below.

Face Value of Insurance Coverage

Total: \$454 billion; Rank: 1st (1st in 2006)

Per Capita: \$24,862; Rank: 1st (1st in 2006)

Dollar Volume of Guaranteed Loans

Total: \$10.2 billion; Rank: 3rd (3rd in 2006)

Per Capita: \$561; Rank: 32nd (41st in 2006)

Dollar Volume of Direct Loans

Total: \$544 million; Rank: 15th (5th in 2006)

Per Capita: \$30; Rank: 46th (18th in 2006)

How Florida Compares to Other Populous States

The U.S. Census Bureau reported that the federal direct expenditures (i.e., direct payments for individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, and salaries and wages) to the fifty states totaled \$2.47 trillion in 2007, up from \$2.37 trillion in 2006. The combined federal direct expenditures to the seven most populous states of California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio, totaled \$1.05 trillion or 42 percent of the fifty states' total.

The total federal direct expenditures of the seven most populous states are as follows.

1. California: \$260 billion
2. Texas: \$172 billion
3. New York: \$158 billion
- 4. Florida: \$147 billion**
5. Pennsylvania: \$117 billion
6. Ohio: \$105 billion
7. Illinois: \$89 billion

However, as illustrated below, the states' respective rankings change when controlling for population differences. The per capita federal direct expenditures of these same seven states are as follows.

1. Pennsylvania: \$9,423 (1st in 2006)
2. Ohio: \$9,175 (5th in 2006)
3. New York: \$8,177 (2nd in 2006)
- 4. Florida: \$8,059 (3rd in 2006)**
5. Texas: \$7,186 (4th in 2006)
6. California: \$7,124 (6th in 2006)
7. Illinois: \$6,899 (7th in 2006)

Florida's Receipt of Federal Grants

Federal grants continue to be important sources of revenue utilized by our nation's state and local governments to provide necessary infrastructure and services to their residents. Federal grant expenditures (i.e., actual outlays) to the fifty states totaled \$430 billion in fiscal year 2007.

As opposed to the \$21.4 billion of federal grant obligations to Florida previously discussed, federal grant expenditures to our state and local governments totaled \$20 billion, or \$1,098 per capita. Florida had the 4th largest federal grants expenditure of the fifty states, unchanged from 2006, and the

state ranked 45th on a per capita basis, up from 47th in 2006.

The grant funding received from six federal departments (i.e., Health and Human Services, Transportation, Education, Housing and Urban Development, Agriculture, and Homeland Security) totaled \$19.3 billion and accounted for 96 percent of all grants expenditures to Florida. A summary of these grant expenditures to Florida as well as some of the more well-known program categories within these departments are listed below.

Health and Human Services Grants

Total: \$11 billion; Rank: 5th (5th in 2006)

Per Capita: \$604; Rank: 46th (46th in 2006)

- Centers for Medicare and Medicaid Services
- Administration for Children and Families

Transportation Grants

Total: \$2.7 billion; Rank: 3rd (4th in 2006)

Per Capita: \$149; Rank: 35th (40th in 2006)

- Federal Highway Administration
- Federal Aviation Administration
- Federal Transit Administration

Education Grants

Total: \$2.1 billion; Rank: 4th (4th in 2006)

Per Capita: \$113; Rank: 31st (35th in 2006)

- Office of Elementary and Secondary Education
- Office of Special Education and Rehabilitative Services
- Office of Vocational and Adult Education

Housing & Urban Development Grants

Total: \$1.7 billion; Rank: 10th (9th in 2006)

Per Capita: \$95; Rank: 36th (44th in 2006)

- Housing Programs
- Community Planning and Development

Agriculture Grants

Total: \$1.1 billion; Rank: 4th (4th in 2006)

Per Capita: \$61; Rank: 42nd (42nd in 2006)

- Food and Nutrition Services
- Cooperative State Research, Education and Extension Services
- Rural Development Activities

Homeland Security Grants

Total: \$618 million; Rank: 2nd (2nd in 2006)

Per Capita: \$34; Rank: 7th (5th in 2006)

- Federal Emergency Management Agency
- Domestic Preparedness and Anti-terrorism Programs

Federal Grants to Florida in Recent Years

Since 1996 the LCIR has conducted an annual review of federal funding to Florida using the U.S. Census Bureau's data. Federal grant expenditures to Florida have increased significantly during this period.

Between 1996 and 2007, federal grant expenditures increased 138 percent from \$8.4 billion to \$20 billion, which equates to an average annual growth rate of 12.6 percent. Florida's ranking among all states in total grant expenditures improved from 7th in 1996 to 4th in 2007. However, much of this substantial growth in federal grant

expenditures to Florida occurred between 1997 and 2003. In fact, between 2004 and 2007, the average annual growth rate was 3.3 percent.

Florida's relative share of grant expenditures to the fifty states increased from 3.9 percent in 1996 to 4.7 percent in 2007, which was unchanged from 2006. Interestingly, Florida's relative share of the total population of the fifty states increased from 5.4 percent in 1996 to 6.1 percent in 2007.

Florida's per capita federal grant expenditure increased from \$586 in 1996 to \$1,098 in 2007. Although Florida's per capita ranking has shown some upward movement in recent years, it still remains low. The state's per capita ranking improved from 48th in 1996 to its highest level of 43rd in 2005, but dropped to 47th in 2006 then improved to 45th in 2007.

Conclusion

Although this report discusses the various types of federal direct expenditure and other financial assistance to Florida, the focus is on federal grant expenditures. Despite Florida's low per capita federal grants expenditure, 45th in 2007, federal assistance to our state, primarily in the form of grant funding, accounted for 28 percent of state government's total direct revenue during the 2005-06 fiscal year, according to the Florida Consensus Estimating Conference's most recent *Long Term Revenue Analysis (Fall 2007)*.

Numerous reasons exist for Florida's low per capita federal grants funding; however, three likely explanations are of particular significance. First, many funding formulas are

based on outdated population figures or other factors that do not reflect the state's rapid growth in recent decades. Congressional support to revise funding formula inequities is difficult to obtain if other states stand to lose federal funds under revised formulas that benefit Florida. Second, small state minimums in formula allocations disadvantage more populous states like Florida. Third, Florida may not be aggressively pursuing all federal grant opportunities.

Several years ago, the LCIR surveyed Florida's state agencies regarding the receipt of federal grants. In response to the question of why the state ranked low in the per capita receipt of many federal grants, state agencies offered a number of explanations. Such explanations included the state's failure to allocate sufficient state matching funds, federal "strings" or policy requirements serving as conditions for receipt of federal grants funding, and cutbacks in federal funding.

In this report, the LCIR utilized the per capita measure to control for population differences among states. However, such a measure does not take into consideration levels of need or utilization. State agency representatives have previously noted that per capita measurements of certain federal grants receipts, while low compared to other states, might not have reflected the fact that such funding was adequately serving the target populations.

In spite of these caveats, the data presented in this report show that Florida still lags behind other states in the receipt of federal grants. In 2007, Florida's per capita federal grants expenditure was \$331 less than the national per capita expenditure. In 2006, Florida's per

capita federal grants expenditure was \$295 less than the national per capita expenditure, so the "gap" has increased. In 2007, Florida's per capita expenditure was 77 percent of the national per capita expenditure, compared in 81 and 78 percent in 2005 and 2006, respectively. Had Florida's per capita grants expenditure of \$1,098 in 2007 equaled just the national average of \$1,429, then this state would have received \$6 billion in additional grant funding.

Recommendations

During the 2007-08 legislative interim, the LCIR staff undertook a research project entitled, *Federal Grants – How Florida's Local Government Can Improve*, to identify federal grants that the state's local governments receive and determine if similarly situated local governments are eligible to participate in those grant programs. The results of that research project were published in the Committee's June 2008 report entitled *Federal Grants to Florida's Local Governments*.

A number of recommendations, many of which have been included in prior editions of this annual report, as well as several new recommendations included in the June 2008 report, *Federal Grants to Florida Local Governments*, are offered as ways to potentially increase Florida's receipt of federal grants.

Local governments should take the following steps to increase their receipt of grant funds:

- Register with www.Grants.gov and take full advantage of all this interactive website has to offer.

- As www.Grants.gov continues to evolve, local governments should provide the website with feedback on issues that could bear improvement, such as timeframes and uniformity of application processes and forms.
- Collaborate with other local governments and regional entities to explore meeting eligibility requirements of certain grants.
- Using data posted on the LCIR's website, www.floridalcir.gov, local governments can compare themselves with neighboring or similarly situated local governments to ascertain whether they are taking full advantage of all available grant opportunities.
- Once suitable grants have been identified, local government staff should develop a direct rapport with personnel from the granting agency through phone and e-mail contact whenever possible.
- Conduct cost-benefit analyses to assess the fiscal value of hiring one or more grant writers.
- Identify federal and state policy changes needed to enhance Florida's access to federal funding streams.
- Support state efforts to form coalitions with similarly-situated states to pursue changes in outdated or inequitable federal funding formulas.
- Work with the state and Congress to implement changes to federal funding formulas determined to be outdated or inequitable.
- Vigorously pursue increased availability of state matching funds or other locally available funds.
- Invest in training provided at the state and local levels for accessing federal and state grant funding.
- Increase communication and coordination on federal funding issues among state agencies, the Governor's Office, the Florida Washington Office, the Legislature, and the Congressional Delegation.
- When competing with local governments from other states for non-formula grants, enlist assistance from Congressional Offices, who are typically able to provide letters of support.

The Department of Environmental Protection may wish to consider:

- Advocating for amendment to Governor's Executive Order 95-359 to clarify and streamline the role and function of the Single Point of Contact (SPOC) housed within the department, and any appropriate statutory changes to s. 403.061(40), F.S.
- Alternatively, evaluating the benefit to the state and local governments of the SPOC and determining whether the SPOC should be dispensed with or maintained.

Introduction

The Florida Legislative Committee on Intergovernmental Relations (LCIR) annually reviews the state's receipt of federal funds. The purpose of this report is to provide the Legislature and other interested parties with an overview and analysis of federal financial assistance to Florida. In particular, the report focuses on federal grants to Florida's state and local governments. This review is intended to be part of an ongoing strategy to improve federal-state relations generally and facilitate the development of strategies to increase the return of federal tax dollars to the state.

The LCIR reviewed and analyzed federal expenditure data for federal fiscal year 2007 (i.e., October 1, 2006 to September 30, 2007) using data obtained from two U.S. Bureau of the Census publications: *Consolidated Federal Funds Report for Fiscal Year 2007* and *Federal Aid to States for Fiscal Year 2007*, both issued in September 2008. Two types of federal financial assistance to states are documented in this report. These types are **federal direct expenditures** and **other financial assistance**.

Federal direct expenditures constitute actual outlays or obligations of the federal government. These expenditures are reported by the U.S. Census Bureau in five categories: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries and wages. Federal direct expenditures to the state totaled \$147 billion or \$8,059 per capita.

Other financial assistance does not constitute actual outlays but, in large measure, reflects the contingent liability of the federal government via the face value of insurance coverages and the dollar volume of loans made. Other financial assistance to Florida totaled \$465 billion or \$25,453 per capita.

This report is divided into four parts and includes one appendix.

Part One discusses the types of federal financial assistance to states by addressing the five categories of federal direct expenditure and the three categories of other financial assistance. A series of tables summarize dollar amounts of federal financial assistance to the fifty states collectively, and Florida specifically. In addition, Florida's rankings among the fifty states, the seven most populous states, and the other southern states on the basis of total and per capita funding are included.

Part Two summarizes federal direct expenditures to each of Florida's sixty-seven counties by addressing total expenditures by category, per capita expenditures by category, and category expenditures as a percentage of total expenditures.

Part Three focuses on federal grant expenditures to state and local governments. A series of tables provide detailed summaries of grants expenditures to Florida by federal agency. Additionally, Florida's rankings among the fifty states, the seven most populous states, and the other southern states on the basis of total and per capita expenditures are listed.

Part Four examines the states' per capita federal grant expenditures by agency as a percentage of the national per capita expenditures. The intent is to show how the states fare, relative to the national average, after controlling for population differences.

The **Appendix** lists the websites of federal agencies.

Additional LCIR Resources

In addition to this report summarizing federal funding to Florida in fiscal year 2007 and prior reports summarizing federal funding to the state in previous fiscal years,¹ the LCIR has prepared several other resources relating to Florida's receipt of federal grants.

In June 2008, the Committee published a report entitled *Federal Grants to Florida's Local Governments*.² The report provides an analysis of federal grants to local governments and offers data that allows local governments to compare their performance with neighboring localities and similarly situated local governments.

In October 2008, the Committee published an issue brief entitled *Federal Grant Expenditures by School District*.³ This brief provides an analysis of federal grants to school districts.

Furthermore, the Committee has compiled federal grant expenditures to Florida's county and municipal governments in fiscal years 2005 and 2006 as well as to the states' school districts in fiscal year 2007. These data files can be downloaded from the Committee's website.⁴

Part One: Federal Financial Assistance to Florida

A. Introduction

This part summarizes the five categories of federal direct expenditures (i.e., direct payments for individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, and salaries and wages) provided to Florida. Three categories of other financial assistance (i.e., insurance coverage, guaranteed loans, and direct loans) are summarized as well. Reported dollar amounts for these other assistance programs represent the face value of insurance coverage or the dollar volume of loans made rather than actual expenditures.

B. Data Source

The source of the data summarized in this part is the U.S. Bureau of the Census publication entitled *Consolidated Federal Funds Report for Fiscal Year 2007* issued in September 2008. This publication presents federal government expenditures or obligations in state, county, and subcounty areas of the United States. Although the Census Bureau's report includes the relevant data for the District of Columbia and U.S. outlying areas, the focus here is on the assistance provided to the fifty states collectively and Florida specifically.

The financial activity of all federal government agencies is covered except for those agencies that do not submit data to any of the federal reporting systems that serve as information sources for the Census Bureau's report. As a general guide, the grants and procurement data represent obligated funds, while the direct payments and salaries and wages data represent actual expenditures.

C. Federal Financial Assistance to Florida

The distribution of federal financial assistance to states in fiscal year 2007 is summarized in **Table 1-1** on page 9. Federal direct expenditures to the fifty states totaled \$2.47 trillion or \$8,211 per capita while other financial assistance totaled \$1.36 trillion or \$4,524 per capita. Federal direct expenditures to Florida totaled \$147 billion or \$8,059 per capita, and other financial assistance totaled \$465 billion or \$25,453 per capita.

Federal direct expenditures to Florida constituted approximately 6.0 percent of such expenditures to all fifty states. Florida had the 4th largest expenditure of all states, the 4th largest expenditure of the seven most populous states, and the 2nd largest expenditure of the southern states, after Texas.¹ On a

¹ Based on July 1, 2007 population estimates prepared by the U.S. Census Bureau, the seven most populous states were California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio. The Census Bureau has classified 16 states in the South region. They are Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

per capita basis, the state ranked 29th among all states, 4th among the most populous states, and 11th among the southern states.

Other financial assistance to Florida constituted 34 percent of such assistance to all fifty states. The state ranked first among all states in both total and per capita assistance due to the significant face value of flood insurance coverage.

D. Federal Direct Expenditures

As previously mentioned, there are five categories of federal direct expenditures: 1) direct payments for individuals for retirement and disability, 2) direct payments for individuals other than for retirement and disability, 3) grants, 4) procurement contracts, and 5) salaries and wages. Each of these categories is discussed in more detail in the following sections.

1. Direct Payments for Individuals for Retirement and Disability

Retirement and disability payments represented the largest category of federal direct expenditure to states. Such payments totaled \$773 billion, or \$2,569 per capita, and represented approximately 31 percent of total direct expenditures to states. These payments to Florida totaled \$55.6 billion, or \$3,044 per capita, and accounted for 38 percent of total direct expenditures to the state.

Florida had the 2nd largest expenditure of all states, after California; the 2nd largest expenditure of the most populous states, after California; and the largest expenditure of the southern states. On a per capita basis, Florida ranked 7th among all states; 2nd among the most populous states, and 5th among the southern states.

As illustrated in **Table 1-2** on page 10, this category includes four types of payments: 1) Social Security payments, 2) federal retirement and disability payments, 3) veterans benefits, and 4) other payments. In Florida, Social Security payments accounted for 78 percent of the state's total value of federal retirement and disability payments to individuals.

Florida's large elderly population is a primary reason for the state's high per capita expenditure relative to other states. Based on the results of Census 2000, Florida's elderly population (i.e., age 65 years and over) totaled 2.8 million and accounted for 8 percent of the nation's total elderly population of 35 million. In Florida, the elderly constituted nearly 18 percent of the state's total population. Relative to other age groupings, the proportion of the total population defined as elderly was greater in Florida than any other state.

2. Direct Payments for Individuals Other Than for Retirement and Disability

These payments represented the second largest category of federal direct expenditure to states. Such payments totaled \$578 billion, or \$1,921 per capita, and represented approximately 23 percent of

total direct expenditures to states. These payments to Florida totaled \$42.6 billion, or \$2,332 per capita, and accounted for 29 percent of total direct expenditures to the state. As illustrated in **Table 1-3** on page 11, this category includes eight types of payments. Medicare benefits accounted for 68 percent of other direct payments to the state.

Florida had the 2nd largest expenditure of all states, after California; the 2nd largest expenditure of the most populous states, after California; and the largest expenditure of the southern states. On a per capita basis, Florida ranked 7th among all states, 3rd among the most populous states, and 1st among the southern states.

3. Grants

Grant obligations represented the third largest category of federal direct expenditure to states. These obligations to states totaled \$484 billion, or \$1,608 per capita, and represented 20 percent of total direct expenditures. These grant obligations to Florida totaled \$21.4 billion, or \$1,173 per capita, and represented 15 percent of total direct expenditures to the state.

As illustrated in **Table 1-4** on pages 12-13, Florida had the 4th largest expenditure of all states; the 4th largest expenditure of the most populous states; and the 2nd largest expenditure of the southern states. On a per capita basis, Florida ranked 49th among all states; last among the most populous states, and last among the southern states.

A more in-depth discussion of federal grants to state and local governments is addressed in Part Three of this report. The amount of total grant obligations to Florida discussed here is approximately \$1.4 billion greater than the total listed in Part Three. While the funding amount presented here reflects total obligations, the funding amount presented in this latter part reflects total expenditures (i.e., actual outlays). Additionally, the funding amount presented here includes obligations to non-governmental entities while the funding amount presented in Part Three reflects expenditures to state and local governments only.

4. Procurement Contracts

Procurement contracts represented the fourth largest category of federal direct expenditure to states. Such payments to states totaled \$405 billion, or \$1,346 per capita, and represented 16 percent of total direct expenditures. These payments to Florida totaled \$15.8 billion, or \$863 per capita, and represented 11 percent of total direct expenditures to the state.

As illustrated in **Table 1-5** on pages 14-15, Florida had the 5th largest expenditure of all states, the 3rd largest expenditure of the most populous states, and the 4th largest expenditure of the southern states. On a per capita basis, Florida ranked 32nd among all states, 4th among the most populous states, and 11th among the southern states.

This category includes contract awards to the Department of Defense and non-defense agencies. In Florida, contracts awarded by the Department of Defense accounted for 76 percent of total procurement contracts awarded.

5. Salaries and Wages

Federal salary and wage payments represented the smallest category of direct expenditure to states. Such payments to states totaled \$231 billion, or \$768 per capita, and represented 9 percent of total direct expenditures. These payments to Florida totaled \$11.8 billion, or \$647 per capita, and represented 8 percent of direct expenditures to the state.

As illustrated in **Table 1-6** on pages 16-17, Florida had the 4th largest expenditure of all states, the 3rd largest expenditure of the most populous states, and the 3rd largest expenditure of the southern states. On a per capita basis, Florida ranked 33rd among all states, 3rd among the most populous states, and 14th among the southern states.

This category includes salary and wage payments made by the Department of Defense and non-defense agencies. In Florida, the payments made by non-defense agencies accounted for 62 percent of total salary and wage payments.

6. Summary

One way to assess how individual states are doing in their fiscal relationship with the federal government is to calculate each state's proportional share for each direct expenditure category. If the state's share for each expenditure category is roughly equivalent to the state's share of the national population, then perhaps a measure of equality has been satisfied. The shares for each state are summarized in **Table 1-7** on pages 18-19.

The first column lists each state's share of the July 1, 2007 national population. The next column lists each state's share of total federal direct expenditure with subsequent columns listing the states' shares for each of the five components of federal spending. Based on the percentages listed, Vermont is the best example of a state that reflects an average performance with a 0.2 percent share of the national population and identical shares for four of the five separate components of federal spending. Other states reflecting average performances include Delaware, Idaho, Maine, Montana, Nebraska, New Hampshire, North Dakota, Rhode Island, South Carolina, South Dakota, West Virginia, and Wyoming.

Florida recorded 6.1 percent of the national population and 6.0 percent of total direct expenditures. However, the state's proportional shares for each of the separate components differed significantly from the average with 7.2 and 7.4 percent for direct payments for individual for retirement/disability and other, respectively; 4.4 percent for grant obligations; 3.9 percent for procurement contracts; and 5.1 percent for salaries and wages.

This type of analysis may be useful with respect to grant funding since many grant formulas rely on national population, or some variation of it, to distribute funds. Interestingly, New York had the largest positive percentage spread between its share of the national population (i.e., 6.4 percent) and its share of grant obligations (i.e., 9.9 percent). Florida had the second largest negative percentage spread, after Texas, between its share of the national population (i.e., 6.1 percent) and its share of grant obligations (i.e., 4.4 percent).

E. Other Financial Assistance

The three categories of other financial assistance are: 1) face value of insurance coverages, 2) dollar volume of guaranteed loans, and 3) dollar volume of direct loans. Other financial assistance to Florida totaled \$465 billion, or \$25,453 per capita. Florida's share constituted 34 percent of such assistance to all states. The state ranked first among the fifty states in both total and per capita assistance due to the significant face value of flood insurance coverage provided to Florida.

1. Face Value of Insurance Coverage

The face value of insurance coverage represented the largest category of other financial assistance to states. Such assistance to states totaled \$1.17 trillion, or \$3,885 per capita, and represented 86 percent of other financial assistance provided to all states. Such coverage in Florida totaled \$454 billion, or \$24,862 per capita, and represented 98 percent of other financial assistance provided to the state by the federal government.

As illustrated in **Table 1-8** on page 20, this category includes five types of insurance coverage. Flood insurance accounted for 99 percent of the total face value of all federal insurance coverage provided to the state. Florida had the largest face value of insurance coverage of the fifty states and ranked first among the states in both total and per capita insurance coverage.

2. Dollar Volume of Guaranteed Loans

The second largest category of other financial assistance to states was guaranteed loans. Such assistance to the fifty states totaled \$170 billion, or \$566 per capita, and represented 12 percent of other financial assistance provided to states by the federal government. These loans to Florida totaled \$10.2 billion, or \$561 per capita, and represented only 2 percent of other financial assistance to the state.

As illustrated in **Table 1-9** on page 21, this category includes seven types of guaranteed loans with Federal Family Education Loans accounting for 33 percent of the total dollar volume of federal guaranteed loans made to the state. Florida had the 3rd largest dollar volume of all states, the 3rd largest volume of the most populous states, and the 2nd largest volume of the southern states. On a per capita basis, Florida ranked 32nd among all states, 4th among the most populous states, and 10th among the southern states.

3. Dollar Volume of Direct Loans

Direct loans represented the smallest category of other financial assistance provided to states. Such assistance to the fifty states totaled \$22 billion, or \$73 per capita, and represented 2 percent of other financial assistance to states. These loans to Florida totaled \$544 million, or \$30 per capita, and represented only 0.1 percent of other financial assistance to the state.

As illustrated in **Table 1-10** on page 22, Florida had the 15th largest dollar volume of all states, the 6th largest volume of the most populous states, and the 7th largest volume of the southern states. On a per capita basis, Florida ranked 46th among all states, 6th among the most populous states, and last among the southern states.

4. Summary

Using the same methodology as previously illustrated in Table 1-7, **Table 1-11** on page 23 accesses how individual states did in their fiscal relationship with the federal government with respect to the various types of other financial assistance offered to states.

While Florida recorded 6.1 percent of the national population, it recorded 34.1 percent of total other financial assistance. Due to the effect of federal flood insurance, Florida's proportional share for insurance programs was 38.8 percent; however, the state's proportional shares for guaranteed loans at 6.0 percent and for direct loans at 2.5 percent were less than its share of the national population.

F. Conclusion

Federal direct expenditures represent either actual expenditures or obligations of the federal government to this state. By contrast, the reported amounts of other financial assistance reflect the face value of insurance coverage and the dollar volume of loans made.

Florida had high per capita expenditures for federal direct payments for individuals when compared to the national average. This was due primarily to the state's large retiree and elderly populations. However, in the remaining categories of federal direct expenditure (i.e., grants, procurement contracts, and salaries and wages), Florida had per capita expenditures that were considerably lower than the national average.

The allocation of federal financial assistance has significant impacts on the finances of state and local governments. Since numerous federal policies govern the distribution of federal funding to states, future policy changes will likely affect individual states quite differently. Knowing the magnitude of such financial assistance to Florida should be useful to policy makers as they assess strategies for increasing the state's share of federal funding.

Notes:

- 1) In the published report, the data are rounded to the nearest thousand dollars.
- 2) Funding figures for federal direct expenditures represent either actual expenditures or obligations. Generally, the federal grants and procurement data represent obligated funds, while the direct payments to individuals and salaries and wages represent actual expenditures. Direct and guaranteed loan figures represent the dollar volume of loans made. Data on insurance coverages represent the face value of coverage provided. In the published report, the funding data are rounded to the nearest thousand dollars.
- 3) Based on July 1, 2007 population estimates, the seven most populous states, in descending population order, were: California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio.
- 4) As designated by the U.S. Census Bureau, Florida is one of 16 states in the South region. The other states in the South region are: Alabama, Arkansas, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

Part Two: Federal Direct Expenditures to Florida Counties

A. Introduction

Federal spending can significantly impact the finances of local governments. The purpose of this part is to illustrate how the \$147 billion in federal direct expenditures to Florida in fiscal year 2007 was distributed among the state's 67 counties.

B. Data Source

The source of the data summarized in this part is the U.S. Bureau of the Census publication entitled *Consolidated Federal Funds Report for Fiscal Year 2007*. This publication summarizes federal government expenditures or obligations to states, counties, and subcounty areas. However, the focus here is on the distribution of federal direct expenditures among Florida's counties, as geographic areas rather than units of local government.

C. Geographic Coding of Federal Direct Expenditures

The basis for the geographic coding of federal direct expenditures to counties varies depending on the data sources; however, the following general guidelines apply. For salaries and wages, the distribution is based on the place of employment. The distribution of procurement contract awards is based on the place of performance. For retirement and disability payments as well as other direct payments, the distribution is based on the recipient's location.

The distribution of grants is based on the location of the initial recipient. For grants that are ultimately distributed throughout the state, the reader should note that significant dollar amounts are included in Leon County's total, which reflects the data coding of such grants to state government as the initial recipient. Many federal grants involve a direct payment to state government that is then responsible for program administration. Such examples include those grants that are 'passed-through' to local governments. Another example includes those grants, such as for highway construction, in which the financial impact is spread over all areas of the state. A third example includes those grant programs that the state government administers but for which the ultimate beneficiaries are found throughout the state.

D. Federal Direct Expenditures by County

As previously mentioned, federal direct expenditures are categorized as direct payments to individuals for retirement and disability, direct payments for individuals other than for retirement and disability, grants, procurement contracts, or salaries and wages. The distribution of such expenditures within Florida is discussed in more detail in the following sections.

1. Federal Direct Expenditures by Category

The distribution of the \$147 billion in federal direct expenditures by county geographic area is summarized in **Table 2-1** on pages 24-25. In total, the magnitude of federal direct expenditures varied significantly by county from a low of \$37.1 million within Lafayette County to a high of \$15.2 billion within Miami-Dade County.

Direct payments for individuals for retirement and disability totaled \$55.6 billion statewide. The value of such payments varied from a low of \$14.8 million within Lafayette County to a high of \$4.6 billion within Miami-Dade County. Such payments to individuals totaled one billion dollars or more in 17 counties: Brevard, Broward, Duval, Escambia, Hillsborough, Lake, Lee, Manatee, Marion, Miami-Dade, Orange, Palm Beach, Pasco, Pinellas, Polk, Sarasota, and Volusia.

Direct payments to individuals other than for retirement and disability totaled \$42.6 billion statewide. Such payments ranged from a low of \$10.9 million within Glades County to a high of \$5.3 billion within Miami-Dade County. Other direct payments to individuals totaled one billion dollars or more in 9 counties: Broward, Duval, Hillsborough, Miami-Dade, Orange, Palm Beach, Pasco, Pinellas, and Volusia.

Federal grant obligations totaled \$21.4 billion statewide. Miami-Dade County had the largest grant obligation at \$2.9 billion; Lafayette County had the smallest at \$6.3 million. Although several billion dollars worth of grants are reported within Leon County's total due to the coding issue previously discussed, reported grant obligations exceeded \$200 million in 20 other counties: Alachua, Brevard, Broward, Collier, Duval, Escambia, Hillsborough, Lake, Lee, Manatee, Marion, Miami-Dade, Orange, Palm Beach, Pasco, Pinellas, Polk, Sarasota, Seminole, and Volusia.

Federal procurement contracts totaled \$15.8 billion statewide. The value of such contracts ranged from a low of \$186,000 within Glades County to a high of \$3.3 billion within Orange County. In addition to Orange County, Bay, Brevard, Broward, Duval, Hillsborough, Miami-Dade, Okaloosa, Palm Beach, and Pinellas counties each had contracts totaling greater than \$500 million.

Federal salary and wage payments totaled \$11.8 billion statewide. The value of such payments varied from a low of \$549,000 within Glades County to a high of \$1.6 billion within Duval County. Federal salary and wage payments totaled \$200 million or more in 13 counties: Alachua, Bay, Brevard, Broward, Duval, Escambia, Hillsborough, Miami-Dade, Okaloosa, Orange, Palm Beach, Pinellas, and Walton.

2. Per Capita Federal Direct Expenditures by Category

Table 2-2 on pages 26-27 lists the per capita federal direct expenditures by category within each county geographic area. Excluding Leon County from consideration due to the data coding of significant federal grant obligations to the seat of state government, per capita total direct

expenditures varied significantly from a low of \$3,832 within Osceola County to a high of \$16,628 within Okaloosa County.

Per capita direct payments to individuals for retirement and disability varied from a low of \$1,800 within Lafayette County to a high of \$5,465 within Lake County. Per capita direct payments to individuals other than for retirement and disability ranged from a low of \$760 within Clay County to a high of \$7,215 within Hamilton County.

Again excluding Leon County from consideration, per capita grants varied from a low of \$538 within Osceola County to a high of \$10,284 within Franklin County. Many of Florida's less populated, rural counties had high per capita dollar figures, which demonstrate the relative importance of federal grants as a potential source of revenue in these areas.

Per capita procurement contracts varied from a low of \$17 within Glades County to a high of \$6,212 within Okaloosa County. Per capita salary and wage payments ranged from a low of \$50 within Glades County to a high of \$6,775 within Walton County. Certainly, federal procurement and salary and wage spending associated with Eglin Air Force Base in northwest Florida are factors in Okaloosa and Walton counties' high per capita dollar figures, respectively.

3. Federal Direct Expenditures by Category as a Percentage of Total

Table 2-3 on pages 28-29 provides a county-by-county list of federal direct expenditures by category as a percentage of total expenditures. A number of factors explain differences in counties' proportional shares attributable to each expenditure category. For example, the relative share attributable to federal direct payments to individuals was generally highest in counties with large elderly or retiree populations, such as Clay, Flagler, and Lake; or with proportionately larger populations receiving certain benefits, such as Hamilton, Calhoun, and Dixie. The relative share attributable to federal grants (excluding Leon County) was highest in less populated, rural counties such as Franklin, Gilchrist, and Glades. The relative share attributable to federal procurement was highest in counties such as Brevard, Okaloosa, and Orange, which are engaged in significant military and space-related contracting. The relative share attributable to federal salary and wage payments was generally highest in those counties such as Duval, Escambia, Okaloosa, and Walton where military installations are located.

E. Conclusion

The economic impact of federal direct expenditures varies significantly from county to county. Past changes in federal spending have had unequal impacts on local economies. Likewise, future changes in the receipt of federal funding are likely to affect areas of the state quite differently. This information should be useful to policy makers as they assess the impact of future changes in federal direct expenditures on Florida's local economies.

Part Three: Federal Grants to Florida's State and Local Governments

A. Introduction

Federal grant expenditures to Florida's state and local governments totaled \$20 billion, or \$1,098 per capita, in fiscal year 2007. Florida had the 4th largest expenditure of all states, the 4th largest expenditure of the seven most populous states, and the 2nd largest expenditure of the southern states, after Texas.¹ Compared to 2006, Florida's rankings were unchanged. On a per capita basis, Florida ranked 45th among all states, last among the most populous states, and 14th among the southern states. The state's per capita rankings among the most populous and southern states were unchanged from 2006; however, Florida's per capita ranking among all states improved from 47th to 45th.

A summary of Florida's federal grant expenditures by department or agency can be found in **Table 3-1** on page 39. In addition to total reported expenditures, calculations of per capita expenditures have been included. Florida's rankings among the fifty states, the seven most populous states, and the other southern states on the basis of total and per capita expenditures are listed as well. Of the \$20 billion in total grant expenditures to Florida in 2007, the grant funding received from six federal departments: Health and Human Services, Transportation, Education, Housing and Urban Development, Agriculture, and Homeland Security totaled \$19.3 billion and accounted for 96 percent of all grant expenditures to Florida.

B. Data Sources

The data reported in this part was obtained from the U.S. Bureau of the Census publication entitled *Federal Aid to States for Fiscal Year 2007* issued September 2008. The Census Bureau's publication presents federal expenditures to state and local governments by state and U.S. outlying areas. However, the focus of this part is on the total expenditures made to the fifty states collectively and the expenditures by program category made to Florida.

The total grant expenditures to Florida of \$20 billion are less than the state's federal grant obligations of \$21.4 billion discussed previously in Part One. This difference results from the use of the *Federal Aid to States* (FAS) report as the data source here as opposed to the use of the *Consolidated Federal Funds Report* (CFFR). The FAS report presents state-by-state distributions of federal expenditures for grants to state and local governments only. By contrast, federal grants reported in the CFFR generally represent obligations. Obligations are federal funds designated state-by-state and available to be "drawn down" through a variety of program requirements. Additionally, the CFFR includes payments to state and local governments as well as nongovernmental recipients.

¹Based on July 1, 2007 population estimates prepared by the U.S. Census Bureau, the seven most populous states were California, Texas, New York, Florida, Illinois, Pennsylvania, and Ohio. The Census Bureau has classified 16 states in the South region. They are Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

Distributions and obligations will eventually translate into expenditures by the state and local governments, which are addressed in the Committee's reports *Federal Grants to Florida's Local Governments* and subsequent updates.² This report profiles grant expenditures reported to the Federal Audit Clearinghouse by local governments and is part of an ongoing effort by the Committee to assist local governments in maximizing their drawdown of federal awards. Furthermore, local government expenditures sorted by grant program have been compiled and are available for download on the committee's website.³

C. Federal Grants by Department or Agency

The tables in this part provide more detailed summaries of federal grant expenditures to Florida by department or agency. In the FAS report, these federal grant expenditures are reported by program categories. It is important to note that the majority of these program categories reflect the sum total of numerous individual grant programs.

In the Catalog of Federal Domestic Assistance (CFDA), federal grants are classified into one of two types: formula grants and project grants.⁴ Formula grants are allocations of money to states or their subdivisions in accordance with distribution formulas prescribed by law or administrative regulation for activities of a continuing nature not confined to a specific project. Currently, the CFDA lists 184 formula grant programs. Project grants are funding for specific projects for fixed or known periods of time and can include fellowships, scholarships, research grants, training grants, traineeships, experimental and demonstration grants, evaluation grants, planning grants, technical assistance grants, survey grants, and construction grants. The CFDA lists 1,028 project grant programs.

In total, 1,212 separate federal grant programs are currently listed in the CFDA. Data on states' participation in each of these programs is not part of the FAS report; however, such information is available from the U.S. Bureau of the Census. Due to the large number of such programs, a separate research project would be necessary to document Florida's participation in these formula and project grant programs relative to the other states.

Utilizing the data published in the FAS report, the following tables summarize federal grant expenditures to Florida by department or agency.

Table 3-2: U.S. Department of Agriculture (page 40)

Table 3-3: U.S. Department of Commerce (page 41)

³ www.floridalcir.gov/dataatof.cfm

⁴ The purpose of the CFDA is to provide a database of all federal programs available to state and local governments, including the District of Columbia; federally-recognized Indian tribal governments; territories and possessions of the United States; domestic public, quasi-public, and private profit and nonprofit organizations and institutions; specialized groups; and individuals. The Catalog is available online at www.cfda.gov. Programs in the Catalog are classified into 15 types of assistance, seven of which are financial types of assistance and eight are non-financial types of assistance.

Two additional tables summarize changes in federal grant expenditures to Florida by department or agency for the period of 1996 through 2007. **Table 3-16** on pages 54-57 lists the total expenditures, the percentage change in total expenditures from one year to the next, and Florida's rankings among the fifty states. **Table 3-17** on pages 58-59 lists the per capita expenditures and Florida's rankings among the fifty states. **Table 3-18** on pages 60-61 provides a comparison of each state's proportional receipt of federal grants by agency in 2007. If the state's proportional share by agency is roughly equivalent to the state's share of the national population, then perhaps a measure of equality has been satisfied. Supplemental information describing each federal department or agency and many of the grant programs can be obtained from their respective websites. A list of those websites can be found in the **Appendix**.

Chart 3-1 on page 62 illustrates total federal grant expenditures to states and their respective local governments plotted against the states' populations. A trend line is utilized to visually illustrate the expenditure level predicted by an individual state's population. Although this analysis does not consider the numerous other factors that affect states' receipts of grant funding, it does allow for a comparison similar to the analysis of per capita measures utilized in this report. Federal grant expenditures to state and local governments generally cluster around the trend line, indicating a high level of dependence on population. However, expenditures to a few states differ substantially, indicating that they receive more or less grant funding than would be predicted by population alone. Louisiana, Mississippi, and New York illustrate expenditures substantially above their predicted levels while Florida, Texas, and Virginia illustrate those substantially below their predicted levels.

D. Conclusion

Federal grant expenditures to Florida's state and local governments totaled \$20 billion, or \$1,098 per capita, in fiscal year 2007. In terms of total federal grants, Florida had the 4th largest expenditure of all states, the 4th largest expenditure of the seven most populous states, and the 2nd largest expenditure of the southern states. On a per capita basis, the state ranked 45th among all states, last among the most populous states, and 14th among the southern states.

For reporting purposes, the federal government aggregates expenditures of hundreds of separate grant programs into broad program categories. Consequently, it is difficult to determine why the state ranks so low, on a per capita basis, relative to other states in many program categories. Certainly, this aggregation of expenditure data masks differences from one grant program to another. Within the same program category, a high per capita ranking in an individual grant program may be offset to some degree by a low per capita ranking in another program.

According to past statements made by representatives of several state agencies, per capita measurements of certain federal grants receipts, while low compared to other states, may not reflect the fact that the amounts are adequately serving their target populations. Additionally, some grant funding formulas incorporate variables other than the population at large; therefore, the use of a per capita measure for comparisons among states may not be appropriate. Florida's per capita expenditures for select grants may be lower than for most other states because of the state's unique demographic composition, which features large elderly and retiree populations. However, when funding is compared in terms of actual dollars, or per target populations, the state may actually rank much higher nationally.

It is important to note that a number of factors determine how successful or not an individual state can be in maximizing federal grant funding. How a state fares in the receipt of grant funding is largely determined by formula. Although the total number of project grants outnumbers the total number of formula grants by a factor of five, the cumulative dollar value of project grants is small relative to the cumulative dollar value of the large formula grant programs that exist in education, health care, and transportation, for example.

Another factor that affects states' receipt of grant funding is the natural resources existing within their boundaries. States that typically do well in the receipt of grant funding are those that receive payments for the value of natural resources extracted from their public lands. The existence of such extractable natural resources favors states like Alaska, Louisiana, and Wyoming, relative to a state like Florida with fewer extractable natural resources.

Medicaid is another factor that affects how a state fares in the receipt of grant funding, given the size of the program itself. While Medicaid spending has been increasing, an individual state could experience a smaller than average increase if its Medicaid matching rate declines. Conversely, a state experiencing an increase in its matching rate could see a substantial increase in grant funding. Additionally, the type of Medicaid program run by the state, whether relatively modest and less expensive or more expansive and more expensive, will affect the level of federal reimbursements.

In spite of the caveats mentioned above, the data presented in this part suggest that it is possible for Florida to realize improvement in the acquisition of federal grants. Therefore, elected federal, state, and local officials should consider the development of a comprehensive strategy in the evaluation and acquisition of federal grants and identify federal and state policy changes to enhance the state's access and receipt of such funding.

Graph 3-1
States' FY 2007 Grants Expenditures Relative to Trend Line

Part Four:

Florida's Per Capita Federal Grant Expenditures by Agency as a Percentage of the National Per Capita Expenditures

A. Introduction

The purpose of this part is to illustrate how Florida's per capita federal grant expenditures by agency compare to the national per capita expenditures as well as those of the other states. This part analyzes changes in states' per capita expenditures, relative to national per capita expenditures, during fiscal years 1996 through 2007.

B. Data Sources

The figures reported in this part were calculated by the LCIR staff from data published in the U.S. Bureau of the Census publications: *Federal Expenditures to States* (FES) for fiscal years 1996 through 1997 and its successor *Federal Aid to States* (FAS) for fiscal years 1998 through 2007.

C. States' Per Capita Federal Grant Expenditures by Agency

In analyzing the federal grants data, the LCIR staff calculated per capita expenditures for each state, as well as the per capita expenditures of the fifty states collectively, by federal agency for each of the fiscal years 1996 through 2007. The per capita expenditures of the fifty states is hereafter referred to as the national per capita expenditures.

Each state's per capita expenditures, as a percentage of the national per capita expenditures, are calculated. The per capita expenditures of individual states are either less than, equal to, or greater than the national per capita expenditures. If a state's percentage value in a given year is less than 100 percent, then that state had a per capita expenditure less than the national per capita expenditure. If a state's percentage value is greater than 100 percent, then that state's per capita expenditure exceeded the national per capita expenditure.

Utilizing the data published in the relevant FES and FAS reports, the following tables summarize states' per capita federal grant expenditures as a percentage of national per capita expenditures.

Table 4-1: Florida Summary (page 65)

D. Conclusion

Part Three of this report discussed several shortcomings in using a per capita measure to evaluate federal grant expenditures to states, and those shortcomings apply here as well. The inherent assumption when comparing states' per capita expenditures is that federal grants are distributed solely on the basis of total population, which is not the case for all individual grant programs. Since grant funding formulas may incorporate variables other than states' total populations, the use of a per capita measure for comparative purposes may not always be appropriate.

However, in spite of these caveats, these analyses may provide some rough measure of how well Florida fares, relative to all other states, in the receipt of grant funding by agency after controlling for population differences among the states. The analyses demonstrate that Florida's per capita expenditures have been below the national per capita expenditures for the majority of federal agencies, in particular those agencies that provide the majority of grant funding to states. During 2007, the state's per capita expenditures were above the national per capita expenditures for only six of the 23 federal agencies that provided grant funding to Florida, and the combined grant funding provided by those six agencies accounted for only 15 percent of total grant funding provided to the state by all 23 agencies. Given the large number of federal grant programs (i.e., 1,212 currently), additional research into these programs would need to be conducted to assess the extent to which Florida's receipt of funding from individual grant programs could be increased in the future.
